

FUND DETAILS AT 28 FEBRUARY 2010

Sector: Foreign - Equity - General
Inception date: 1 April 2005
Fund manager: Ian Liddle
 (The underlying Orbis Global Equity Fund is managed by Orbis)

Fund objective:
 The Fund remains fully invested in global equities.
 The objective of the Fund is to outperform the FTSE World Index at no greater-than-average risk of loss in its sector.

Suitable for those investors who:
 - Would like to invest in global shares and benefit from offshore exposure
 - Want to gain exposure to markets and industries that are not necessarily available locally

Price: R 17.10
Size: R 3 864 m
Minimum lump sum per investor account: R20 000
Minimum lump sum per fund: R5 000
Minimum debit order per fund: R 500
Additional lump sum per fund: R 500

Income distribution: 01/01/09 - 31/12/09 (cents per unit) Total 0.65
 Distributes annually. To the extent that the total expenses exceed the income earned in the form of dividends and interest, the Fund will not make a distribution.

Annual management fee:
 No fee. The underlying funds, however, have their own fee structure. Allan Gray is paid a marketing and distribution fee by Orbis on the underlying Orbis funds.

COMMENTARY

A year ago, risky businesses such as those that are highly cyclical, heavily indebted or whose future existence remained uncertain, were discounted substantially by the market. When the pessimistic expectations did not materialise, these shares experienced strong recoveries. Orbis believes that many of these companies now fail to match companies with higher quality earnings, especially once the riskiness of such an investment is taken into consideration. An example of such a share is Micron Technology, which has risen more than 300% off its bottom. Orbis has sold off its holdings in Micron and invested in higher quality businesses such as Intel, which remained profitable and debtless throughout the recession. Intel currently sells at 11 times 2010 earnings.

The Fund's return for the past 12 months to February 2010 was 63.0% in US dollars versus the return of 58.5% for the benchmark.

GLOBAL EQUITY FEEDER FUND

TOTAL EXPENSE RATIO FOR THE YEAR ENDED 31 DECEMBER 2009¹

Total expense ratio	Included in TER			
	Trading costs	Performance component	Fee at benchmark	Other expenses
2.48%	0.16%	0.78%	1.49%	0.05%

¹ A Total Expense Ratio (TER) is a measure of a portfolio's assets that are relinquished as operating expenses. The total operating expenses are expressed as a percentage of the average value of the portfolio, calculated for the year to the end of December 2009. Included in the TER is the proportion of costs that are incurred by the performance component, fee at benchmark, trading costs (including brokerage, VAT, STT, STRATE and insider trading levy) and other expenses. These are disclosed separately as percentages of the net asset value. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. The information provided is applicable to class A units.

PERFORMANCE IN RANDS

Fund performance shown net of all fees and expenses as per the TER disclosure.

Long-term cumulative performance (log scale)

PERFORMANCE

Fund performance shown net of all fees and expenses as per the TER disclosure.

Collective Investment Schemes in Securities (unit trusts) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to the future. Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio divided by the number of units in issue. Declarations of income accruals are made annually. Purchase and redemption requests must be received by the manager by 14:00 each business day and fund valuations take place at approximately 16:00 each business day. Forward pricing is therefore used. Performance figures are from Allan Gray Limited (GIPS compliant) and are for lump sum investments with income distributions reinvested. A fund of funds unit trust may only invest in other unit trusts, which levy their own charges, that could result in a higher fee structure for these portfolios. Permissible deductions may include management fees, brokerage, STT, auditor's fees, bank charges and trustee fees. Fluctuations and movements in exchange rates may also cause the value of underlying international investments to go up or down. The Fund may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees and charges and maximum commissions is available on request from the manager. No commissions or incentives are paid. The fund may be closed to new investments at any time in order to be managed in accordance with its mandate. The manager is a member of the Association for Savings & Investment SA (ASISA). Total Expense Ratio (TER): When investing, costs are only a part of an investment decision. The investment objective of the Fund should be compared with the investor's objective and then the performance of the investment and whether it represents value for money should be evaluated as part of the financial planning process. All Allan Gray performance figures and values are quoted after the deduction of costs incurred within the Fund so the TER is not a new cost.
