

## ALLAN GRAY-ORBIS GLOBAL EQUITY FEEDER FUND

**Fund managers:** This Fund invests solely into the Orbis Global Equity Fund, managed by Orbis Investment Management Limited.  
**Inception date:** 1 April 2005

### Fund description and summary of investment policy

The Fund is a feeder fund and invests only in the Orbis Global Equity Fund, managed by Allan Gray's offshore investment partner, Orbis Investment Management Limited. The Orbis Global Equity Fund invests in shares listed on stock markets around the world and aims to be fully invested at all times. Returns are likely to be volatile, especially over short- and medium-term periods. Although the Fund is fully invested outside South Africa, the units in the Fund are priced and traded daily in rands.

**ASISA unit trust category:** Global – Equity – General

### Fund objective and benchmark

The Fund aims to outperform global stock markets over the long term, without taking on greater risk. Its benchmark is the FTSE World Index, including income.

### How we aim to achieve the Fund's objective

The Fund invests only in the Orbis Global Equity Fund. The Orbis Global Equity Fund is managed to remain fully invested in selected global equities. Orbis uses in-house research to identify companies around the world whose shares can be purchased for less than Orbis' assessment of their long-term intrinsic value. This long-term perspective enables Orbis to buy shares which are shunned by the stock market because of their unexciting or poor short-term prospects, but which are relatively attractively priced if one looks to the long term. This is the same approach as that used by Allan Gray to invest in South African equities, except that Orbis is able to choose from many more shares, listed internationally.

### Suitable for those investors who

- Seek exposure to diversified international equities to provide long-term capital growth
- Wish to invest in international assets without having to personally expatriate rands
- Are comfortable with global stock market and currency fluctuation and risk of capital loss
- Typically have an investment horizon of more than five years
- Wish to use the Fund as a fully invested global equity 'building block' in a diversified multi-asset class portfolio

### Minimum investment amounts

Minimum lump sum per investor account	<b>R20 000</b>
Additional lump sum	<b>R500</b>
Minimum debit order*	<b>R500</b>

\*Only available to investors with a South African bank account.

1. FTSE World Index including income (source: Bloomberg), performance as calculated by Allan Gray as at 31 May 2017.

2. This is based on the latest numbers published by INET BFA as at 30 April 2017.

3. Maximum percentage decline over any period. The maximum rand drawdown occurred from 6 June 2008 to 10 March 2009 and maximum benchmark drawdown occurred from 5 June 2008 to 6 March 2009. Drawdown is calculated on the total return of the Fund/benchmark (i.e. including income).

4. The percentage of calendar months in which the Fund produced a positive monthly return since inception.

5. The standard deviation of the Fund's monthly return. This is a measure of how much an investment's return varies from its average over time.

6. These are the highest or lowest consecutive 12-month returns since inception. This is a measure of how much the Fund and the benchmark returns have varied per rolling 12-month period. The Fund's highest annual return occurred during the 12 months ended 31 December 2013 and the benchmark's occurred during the 12 months ended 31 December 2013. The Fund's lowest annual return occurred during the 12 months ended 31 March 2009 and the benchmark's occurred during the 12 months ended 31 March 2009. All rolling 12-month figures for the Fund and the benchmark are available from our Client Service Centre on request.

## ALLAN GRAY-ORBIS GLOBAL EQUITY FEEDER FUND

### Meeting the Fund objective

Since inception and over the last 10 years and five-year periods the Fund has outperformed its benchmark. The fund has provided returns significantly in excess of CPI inflation for all three periods. The Fund experiences periods of underperformance in pursuit of its objective of creating long-term wealth for investors, without taking on greater risk of loss than the global stock market. The maximum drawdown and lowest annual return numbers, in the 'Performance net of all fees and expenses' table, show that the Fund has successfully reduced downside risk in periods of negative market returns.

### Income distributions for the last 12 months

To the extent that income earned in the form of dividends and interest exceeds expenses in the Fund, the Fund will distribute any surplus annually.	<b>31 Dec 2016</b>
<b>Cents per unit</b>	<b>0.3806</b>

### Annual management fee

Allan Gray does not charge an annual management fee but is paid a marketing and distribution fee by Orbis.

Orbis charges an annual management fee within the underlying Orbis Global Equity Fund. The fee rate is calculated based on the Orbis fund's performance relative to its benchmark. For more information please refer to the Orbis Global Equity Fund factsheet, which can be found at [www.allangray.co.za](http://www.allangray.co.za).

### Total expense ratio (TER) and Transaction costs

The annual management fee charged by Orbis is included in the TER. The TER is a measure of the actual expenses incurred by the Fund over a 3-year period (annualised). Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns (refer to page 4 for further information). Transaction costs are disclosed separately.

TER and Transaction costs breakdown for the 3-year period ending 31 March 2017	%
<b>Total expense ratio</b>	<b>2.09</b>
Fee for benchmark performance	1.50
Performance fees	0.53
Other costs excluding transaction costs	0.06
VAT	0.00
<b>Transaction costs (including VAT)</b>	<b>0.15</b>
<b>Total investment charge</b>	<b>2.24</b>

## ALLAN GRAY-ORBIS GLOBAL EQUITY FEEDER FUND

## Fund manager quarterly commentary as at 31 March 2017

Historically, Orbis has protected capital by avoiding the speculative, bubble-like areas of global equity markets. For example, the Fund had minimal exposure to both Japanese equities in the early 1990s and to the Technology, Media & Telecommunication (TMT) sector at the height of its bubble in 2000. Orbis' relative performance lagged as a result of not owning some of the most rapidly rising shares followed by meaningful outperformance as the prices of those same shares fell sharply. During these periods the attraction of the most rapidly rising parts of the market sapped the interest out of other large sectors of the stock market. Valuations in those sectors became sufficiently low that they offered both high prospective returns and lower risk of medium-term price declines. That opportunity enabled Orbis to meet the Fund's investment mandate in that era.

During the 2008 Global Financial Crisis (GFC), Orbis was less successful at avoiding losses. Prior to the crisis, the Fund had exposure to shares trading at low valuation measures, but when economies collapsed and credit markets ceased to function properly, those low valuations provided little protection, given the magnitude of the deterioration in earnings most companies experienced. Many financial sector and highly levered equities suffered permanent capital impairments as they either became insolvent or sought rescue financing on highly dilutive terms. Investors avoided participating in a valuation-driven bubble, but instead were caught by a less discernible credit bubble.

Today, as we enter the ninth year of the bull market that started with 2009 lows, Orbis is presented with a more challenging environment than the 1990 and TMT eras in that it does not appear that there are large sectors of the market which offer meaningfully lower risk of medium-term price declines. Governments and central banks have injected so much low-cost money into the global economy that investors do not face a trade-off to sell shares to buy others. Combined with economic activity being brought forward through borrowing and stimulus, the majority of share prices, valuations and earnings are elevated.

The shares that are traditionally most attractive after long bull markets, being those in stable, predictable but therefore less glamorous businesses, are not. Amid unprecedented low interest rates, investors have been attracted to the steady dividends these shares offer and have driven up their prices. On the other end of the spectrum, shares of companies with heightened economic sensitivity, secular challenges or dependency on credit markets also carry risk as the allure of economic growth has attracted investors' attention – or enough to keep prices above bargain levels. With no large sectors of the equity markets unpopular, there is very little opportunity to invest where current prices present low risk of short- to medium-term losses.

The risk Orbis is most concerned about is permanent impairment of capital – the risk that in time a share ends up being worth less than was paid for it. Orbis believes that the Fund's exposure to that risk is limited. Orbis is enthusiastic about the long-term business prospects of the companies its bottom-up research process has identified. Many are led by outstanding management teams who appear capable of enduring troubled times and taking advantage of distressed market conditions. The Fund also includes a number of shares of businesses that are protected by wide economic moats. For example, Berkshire Hathaway and Air Products and Chemicals possess large cash balances that can be readily deployed towards attractive investment opportunities in the event of large price declines.

Investments such as Charter Communications, Rolls-Royce Holdings and CDK Global, which makes software for car dealers, are undergoing transformations which should enhance their intrinsic value. Others, such as Amazon.com, online travel agent Priceline Group, Latin American online marketplace MercadoLibre and Chinese ecommerce company JD.com, benefit from innovation and secular change. And lastly, some investments, such as the US health insurers and Sberbank of Russia, are available at attractive valuations due to concerns about uncertain conditions in their industries or countries. The Fund retains very little exposure to businesses that rely on ongoing access to capital and are therefore at greater risk of suffering permanent capital impairments. Overall, Orbis believes the Fund's holdings possess strong economic characteristics and are well-positioned for a range of long-term outcomes.

There have been no material changes to the Fund's geographical exposures or currency exposures in the last quarter. With regard to individual holdings, British American Tobacco, the leading international tobacco company, entered the top 10 holdings as Orbis took advantage of share price weakness to increase the Fund's position in what they believe to be a high-quality, cash-generative business trading at a meaningful discount to intrinsic value. By contrast, NetEase, one of China's largest online game operators, exited the top 10 as Orbis have trimmed the Fund's position size following its strong outperformance which caused the gap between its share price and its intrinsic value to narrow. Share price movements largely accounted for the exposure to Amazon.com, the world's largest e-commerce business, to increase, replacing Qualcomm, a US manufacturer of chipsets for use in mobile phones, in the top 10 holdings.

## ALLAN GRAY-ORBIS GLOBAL EQUITY FEEDER FUND

### Notes for consideration

The availability of the Fund is subject to offshore capacity constraints. Please contact our Client Service Centre for further information about any constraints that may apply.

### Management Company

Allan Gray Unit Trust Management (RF) Proprietary Limited (the 'Management Company') is registered as a management company under the Collective Investment Schemes Control Act 45 of 2002, in terms of which it operates 11 unit trust portfolios under the Allan Gray Unit Trust Scheme, and is supervised by the Financial Services Board ('FSB'). The Management Company is incorporated under the laws of South Africa and has been approved by the regulatory authority of Botswana to market its unit trusts in Botswana, however it is not supervised or licensed in Botswana. Allan Gray Proprietary Limited (the 'Investment Manager'), an authorised financial services provider, is the appointed Investment Manager of the Management Company and is a member of the Association for Savings & Investment South Africa (ASISA). The trustee/custodian of the Allan Gray Unit Trust Scheme is Rand Merchant Bank, a division of FirstRand Bank Limited. The trustee/custodian can be contacted at RMB Custody and Trustee Services: Tel: +27 (0)87 736 1732 or [www.rmb.co.za](http://www.rmb.co.za)

### Performance

Collective Investment Schemes in Securities (unit trusts or funds) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. Movements in exchange rates may also cause the value of underlying international investments to go up or down. The Management Company does not provide any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. Where annualised performance is mentioned, this refers to the average return per year over the period. Actual investor performance may differ as a result of the investment date, the date of reinvestment and dividend withholding tax.

### Fund mandate

The Fund may be closed to new investments at any time in order to be managed according to its mandate. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The Fund may borrow up to 10% of its market value to bridge insufficient liquidity.

### Unit price

Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the Fund including any income accruals and less any permissible deductions from the Fund divided by the number of units in issue. Forward pricing is used and fund valuations take place at approximately 16:00 each business day. Purchase and redemption requests must be received by the Management Company by 14:00 each business day to receive that day's price. Unit trust prices are available daily on [www.allangray.co.za](http://www.allangray.co.za)

### Fees

Permissible deductions may include management fees, brokerage, Securities Transfer Tax (STT), auditor's fees, bank charges and trustee fees. A schedule of fees, charges and maximum commissions is available on request from Allan Gray.

### Total expense ratio (TER) and Transaction costs

The total expense ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past three years. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged), VAT and other expenses like audit and trustee fees. Transaction costs (including brokerage, Securities Transfer Tax [STT], STRATE and FSB Investor Protection Levy and VAT thereon) are shown separately. Transaction costs are a necessary cost in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and Transaction costs should not be deducted again from published returns. As unit trust expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money. The sum of the TER and Transaction costs is shown as the Total investment charge.

### FTSE World Index

FTSE is a trademark of the London Stock Exchange Group of Companies. The FTSE World Index is calculated by FTSE International Limited ('FTSE') in accordance with standard criteria and is the proprietary information of FTSE. All copyright subsisting in the FTSE World Index values and constituent lists vests in FTSE. All its rights are reserved.

### Feeder fund

A feeder fund is a unit trust that invests in another single unit trust which charges its own fees. Allan Gray does not charge any additional fees in its feeder funds.

### Foreign exposure

The Fund invests in a foreign fund managed by Orbis Investment Management Limited, our offshore investment partner.
