

Fund description and summary of investment policy

The Fund is a feeder fund and invests only in the Orbis Global Equity Fund, managed by Allan Gray's offshore investment partner, Orbis Investment Management Limited. The Orbis Global Equity Fund invests in shares listed on stock markets around the world and aims to be fully invested at all times. Returns are likely to be volatile, especially over short- and medium-term periods. Although the Fund's investment universe is global, the units in the Fund are priced and traded daily in rands.

ASISA unit trust category: Global – Equity – General

Fund objective and benchmark

The Fund aims to outperform global stock markets over the long term, without taking on greater risk. Its benchmark is the FTSE World Index, including income.

How we aim to achieve the Fund's objective

The Fund invests only in the Orbis Global Equity Fund. The Orbis Global Equity Fund is managed to remain fully invested in selected global equities. Orbis uses in-house research to identify companies around the world whose shares can be purchased for less than Orbis' assessment of their long-term intrinsic value. This long-term perspective enables Orbis to buy shares which are shunned by the stock market because of their unexciting or poor short-term prospects, but which are relatively attractively priced if one looks to the long term. This is the same approach as that used by Allan Gray to invest in South African equities, except that Orbis is able to choose from many more shares, listed internationally.

Suitable for those investors who

- Seek exposure to diversified international equities to provide long-term capital growth
- Wish to invest in international assets without having to personally expatriate rands
- Are comfortable with global stock market and currency fluctuation and risk of capital loss
- Typically have an investment horizon of more than five years
- Wish to use the Fund as a fully invested global equity 'building block' in a diversified multi-asset class portfolio

Minimum investment amounts

Minimum lump sum per investor account	R20 000
Additional lump sum	R500
Minimum debit order*	R500

*Only available to investors with a South African bank account.

Fund information on 31 March 2018

Fund size	R18.1bn
Number of units	302 859 354
Price (net asset value per unit)	R59.74
Class	A

1. FTSE World Index including income (source: Bloomberg), performance as calculated by Allan Gray as at 31 March 2018.
2. This is based on the latest numbers published by IRESS as at 28 February 2018.
3. Maximum percentage decline over any period. The maximum rand drawdown occurred from 6 June 2008 to 10 March 2009 and maximum benchmark drawdown occurred from 5 June 2008 to 6 March 2009. Drawdown is calculated on the total return of the Fund/benchmark (i.e. including income).
4. The percentage of calendar months in which the Fund produced a positive monthly return since inception.
5. The standard deviation of the Fund's monthly return. This is a measure of how much an investment's return varies from its average over time.
6. These are the highest or lowest consecutive 12-month returns since inception. This is a measure of how much the Fund and the benchmark returns have varied per rolling 12-month period. The Fund's highest annual return occurred during the 12 months ended 31 December 2013 and the benchmark's occurred during the 12 months ended 31 December 2013. The Fund's lowest annual return occurred during the 12 months ended 31 March 2009 and the benchmark's occurred during the 12 months ended 31 March 2009. All rolling 12-month figures for the Fund and the benchmark are available from our Client Service Centre on request.

Performance net of all fees and expenses

Annualised monthly volatility ⁵	15.0	16.6	13.5	15.3	n/a	n/a
Highest annual return ⁶	78.2	63.0	54.2	58.4	n/a	n/a
Lowest annual return ⁶	-29.7	-44.8	-32.7	-47.3	n/a	n/a

Meeting the Fund objective

Since inception and over the last 10 years and five-year periods the Fund has outperformed its benchmark. The fund has provided returns significantly in excess of CPI inflation for all three periods. The Fund experiences periods of underperformance in pursuit of its objective of creating long-term wealth for investors, without taking on greater risk of loss than the global stock market. The maximum drawdown and lowest annual return numbers, in the 'Performance net of all fees and expenses' table, show that the Fund has successfully reduced downside risk in periods of negative market returns.

Income distributions for the last 12 months

To the extent that income earned in the form of dividends and interest exceeds expenses in the Fund, the Fund will distribute any surplus annually.	31 Dec 2017
Cents per unit	0.5811

Annual management fee

Allan Gray does not charge an annual management fee but is paid a marketing and distribution fee by Orbis.

Orbis charges an annual management fee within the underlying Orbis Global Equity Fund. The fee rate is calculated based on the Orbis fund's performance relative to its benchmark. For more information please refer to the Orbis Global Equity Fund factsheet, which can be found at www.allangray.co.za

Total expense ratio (TER) and Transaction costs

The annual management fee charged by Orbis is included in the TER. The TER is a measure of the actual expenses incurred by the Fund over a one and three-year period (annualised). Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns (refer to page 4 for further information). Transaction costs are disclosed separately.

TER and Transaction costs breakdown for the 1 and 3-year period ending 31 March 2018	1yr %	3yr %
Total expense ratio	2.10	1.98
Fee for benchmark performance	1.50	1.50
Performance fees	0.54	0.42
Other costs excluding transaction costs	0.05	0.05
VAT	0.01	0.01
Transaction costs (including VAT)	0.13	0.14
Total investment charge	2.23	2.12

Note: There may be slight discrepancies in the totals due to rounding.

In his excellent book *The Art of Learning*, former junior chess prodigy and International Master Josh Waitzkin observed: "The stronger chess player is often the one who is less attached to a dogmatic interpretation of the principles." While the Orbis investment philosophy is firmly rooted in a set of core principles - taking a long-term perspective, analysing individual companies, focusing on intrinsic value, and demanding a margin of safety - we have never been dogmatic in our interpretation of these principles.

For instance, we are not dogmatic about valuation methods (e.g. discounted cash flow, multiples, replacement value), or levels (e.g. maximum multiple of earnings, minimum dividend yield), nor are we dogmatic about investment style or factors such as "value" or "growth". Instead we recognise that markets are dynamic and discounts to intrinsic value can arise in all types of businesses. While this may frustrate those who want to categorise our investment style, we believe it affords us the agility to uncover opportunities in a variety of market environments. Indeed, we have historically outperformed in both value and growth markets.

One thing we do insist on is a significant discount to our estimate of intrinsic value - defined as the value of a business to a long-term buyer who will own it in its entirety and hold it in perpetuity - but even then we allow our analysts flexibility to use their independent judgement and creativity.

An important consequence of this less dogmatic approach is greater resilience when the traditional rules of the game appear to break down. In chess, Waitzkin would seek to create chaos by radically deviating from convention. His opponents, who were often schooled strictly in the traditional principles, would struggle amidst the chaos. Leveraging an exceptional foundation in the fundamentals, innate creativity, and a less dogmatic interpretation of the way the game was "supposed to be" played, Waitzkin was able to exploit the opportunities created in the disorder.

This reminds us of the current market environment, in which longstanding "rules" have been upended. For instance, there remain trillions of dollars of sovereign bonds with negative nominal yields, something that shouldn't happen according to conventional economic models. Central banks have printed extraordinary amounts of money, yet inflation in the real economy has been absent until recently. Growth stocks have outperformed value stocks for the longest stretch on record. At the same time, the extraordinary growth of passive funds and the rise of algorithmic traders are impacting the market in ways that are still difficult to understand.

The result is a strange and confusing environment for those who rely exclusively on rigid or formulaic interpretations of what worked in the past. But we believe there are compelling investment opportunities for those who think differently and aren't afraid to look in less obvious places.

The US market is a good example. By any traditional valuation measures, the US market looks expensive. Yet the Orbis Global Equity Fund has retained meaningful exposure to the US market in recent years, and our stock selections there have added significant value. We have done this by being highly selective, taking a longer-term view than most, and by focusing on company-specific circumstances that others have overlooked or misunderstood.

Most concentrations in the Fund were unchanged over the quarter. In software, we trimmed positions in selected winners as they approached intrinsic value, and in biotechnology, we added to AbbVie and Celgene. Vale, Nike, and Naspers entered the top ten as we continued to build those positions. Imperial Brands and British American Tobacco fell out of the top ten, largely due to underperformance, and we trimmed Charter Communications.

Management Company

Allan Gray Unit Trust Management (RF) Proprietary Limited (the 'Management Company') is registered as a management company under the Collective Investment Schemes Control Act 45 of 2002, in terms of which it operates 11 unit trust portfolios under the Allan Gray Unit Trust Scheme, and is supervised by the Financial Services Board ('FSB'). The Management Company is incorporated under the laws of South Africa and has been approved by the regulatory authority of Botswana to market its unit trusts in Botswana, however it is not supervised or licensed in Botswana. Allan Gray Proprietary Limited (the 'Investment Manager'), an authorised financial services provider, is the appointed Investment Manager of the Management Company and is a member of the Association for Savings & Investment South Africa (ASISA). The trustee/custodian of the Allan Gray Unit Trust Scheme is Rand Merchant Bank, a division of FirstRand Bank Limited. The trustee/custodian can be contacted at RMB Custody and Trustee Services: Tel: +27 (0)87 736 1732 or www.rmb.co.za

Performance

Collective Investment Schemes in Securities (unit trusts or funds) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. Movements in exchange rates may also cause the value of underlying international investments to go up or down. The Management Company does not provide any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. Where annualised performance is mentioned, this refers to the average return per year over the period. Actual investor performance may differ as a result of the investment date, the date of reinvestment and dividend withholding tax.

Fund mandate

The Fund may be closed to new investments at any time in order to be managed according to its mandate. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The Fund may borrow up to 10% of its market value to bridge insufficient liquidity.

Unit price

Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the Fund including any income accruals and less any permissible deductions from the Fund divided by the number of units in issue. Forward pricing is used and fund valuations take place at approximately 16:00 each business day. Purchase and redemption requests must be received by the Management Company by 14:00 each business day to receive that day's price. Unit trust prices are available daily on www.allangray.co.za

Fees

Permissible deductions may include management fees, brokerage, Securities Transfer Tax (STT), auditor's fees, bank charges and trustee fees. A schedule of fees, charges and maximum commissions is available on request from Allan Gray.

Total expense ratio (TER) and Transaction costs

The total expense ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past one and three-year periods. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged), VAT and other expenses like audit and trustee fees. Transaction costs (including brokerage, Securities Transfer Tax [STT], STRATE and FSB Investor Protection Levy and VAT thereon) are shown separately. Transaction costs are a necessary cost in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and Transaction costs should not be deducted again from published returns. As unit trust expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money. The sum of the TER and Transaction costs is shown as the Total investment charge.

FTSE World Index

FTSE is a trademark of the London Stock Exchange Group of Companies. The FTSE World Index is calculated by FTSE International Limited ('FTSE') in accordance with standard criteria and is the proprietary information of FTSE. All copyright subsisting in the FTSE World Index values and constituent lists vests in FTSE. All its rights are reserved.

Feeder fund

A feeder fund is a unit trust that invests in another single unit trust which charges its own fees. Allan Gray does not charge any additional fees in its feeder funds.

Foreign exposure

The Fund invests in a foreign fund managed by Orbis Investment Management Limited, our offshore investment partner.
