ALLANGRAY

FUND DETAILS AT 31 JANUARY 2010

Sector:	Foreign - Asset Allocation - Flexible
Inception date:	3 February 2004
Fund manager:	Ian Liddle
	(The underlying Orbis funds are managed by Orbis)

Fund objective:

To earn a higher rate of return than the benchmark of 60% of the FTSE World Index and 40% of the JP Morgan Global Government Bond Index, at no greater-thanaverage risk of loss in its sector.

Suitable for those investors who:

- Wish to hedge their investments against any rand depreciation - Want to gain exposure to markets and industries that are not necessarily
- available locally
- Wish to invest in rands but benefit from offshore exposure
- Would like to invest in an offshore balanced fund

Price:	R 14.08
Size:	R 6 922 m
Minimum lump sum per investor account:	R20 000
Minimum lump sum per fund:	R5 000
Minimum debit order per fund:	R 500
Additional lump sum per fund:	R 500

Income distribution: 01/01/09 - 31/12/09 (cents per unit)

Distributes annually. To the extent that the total expenses exceed the income

Annual management fee:

No fee. The underlying funds, however, have their own fee structure.

COMMENTARY

The Orbis Optimal (SA) Funds performed well in January, reflecting the positive alpha generated by the underlying selection of shares. Since exposure to global stock markets are hedged out using index futures, investors in these Funds experience the alpha from Orbis' stock picks. The biggest performance contributors came from the Japanese and European shares. The Global Fund of Funds also benefited directly from Orbis' overweight position to the Japanese stock market.

The Fund slightly increased its exposure to Japanese shares over the month and remains overweight relative to the benchmark. The Fund also remains slightly overweight relative to the US dollar, overweight the yen and Asia-ex Japan currencies and underweight the euro. The Fund's return for the past 12 months to January 2010 was 28.7% in US dollars versus the return of 26.7% for the henchmark

Total 1 26 earned in the form of dividends and interest, the Fund will not make a distribution.

¹A Total Expense Ratio (TER) is a measure of a portfolio's assets that are relinquished as operating expenses. The total operating expenses are expressed as a percentage of the average value of the portfolio, calculated for the year to the end of December 2009. Included in the TER is the proportion of costs that are incurred by the performance component, fee at benchmark, trading costs (including brokerage, VAT, STT, STRATE and insider trading levy) and other expenses. These are disclosed separately as percentages of the net asset value. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. The information provided is applicable to class A units.

ALLOCATION OF OFFSHORE FUNDS AT 31 JANUARY 2010

Collective Investment Schemes in Securities (unit trusts) are generally medium-to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to the future. Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio divided by the number of units in issue. Declarations of income accruals are made annually. Purchase and redemption requests must be received by the manager by 14:00 each business day and fund valuations take place at approximately 16:00 each business day. Forward pricing is therefore used. Performance figures are from Allan Gray Limited (GIPS compliant) and are for lump sum investments with income distributions reinvested. Permissible deductions may include management fees, brokerage, STT, auditor's fees. The Fund may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees and charges and maximum commissions is available on request from the manager. No commissions or incentives are paid. The fund may be closed to new investments at any time in order to be managed in accordance with its mandate. The manager is a member of the Association for Savings & Investment SA (ASISA). Total Expense Ratio (TER): When investing, costs are only a part of an investment decision. The investment objective of the Fund should be compared with the investor's objective and then the performance of the investment and whether it represents value for money should be evaluated as part of the financial planning process. All Allan Gray performance figures and values are quoted after the deduction of costs incurred within the Fund so the TER is not a new cost.
