PORTFOLIO

Commentary

The South African stockmarket suffered a slight setback during the quarter ended 31 March 2000, however, the Fund avoided part of this decline.

The Fund continues to be substantially underweight financials relative to the benchmark. At their recently higher share prices, the insurers were considered to offer only fair value and the Fund therefore sold them.

Profit margins in South African banking are coming under pressure as competition intensifies following substantial new capital being committed to the industry. While we consider the financial sector overvalued, we find some companies, such as AMB Holdings (AMB), to be exceptionally attractive.
