

ALLAN GRAY AFRICA EQUITY FUND

Fund manager: Andrew Lapping Inception date: 1 July 1998 Registration number: 23261

Fund description and summary of investment policy

The Fund invests in a focused portfolio of companies with significant business interests in Africa, regardless of the location of the stock exchange listing. The Fund price is reported in US dollars but the underlying holdings are denominated in various currencies. Returns are likely to be volatile.

Fund objective and benchmark

The Fund aims to outperform African equity markets over the long term without taking on greater risk of loss. The Fund's benchmark is the MSCI Emerging and Frontier Markets (EFM) Africa Index (total returns).

How we aim to achieve the Fund's objective

We invest in shares that we believe offer superior fundamental value while taking into account risk and return. We research companies and assess their intrinsic value based on long-term fundamentals; we then invest in businesses where our assessment of intrinsic value exceeds the share price by a margin of safety. This approach allows us to identify shares that may be out of favour with the market because of poor near-term prospects, but offer good value over the long term. The Fund's holdings will deviate meaningfully from those in the index both in terms of individual holdings and sector exposure.

Suitable for those investors who

- Seek exposure to African equities
- Are comfortable with stock market and currency fluctuations
- Are prepared to take on the risk of capital loss
- Typically have an investment horizon of more than five years

The Fund is not available to South African residents.

Minimum investment amounts

Minimum initial investment	US\$50 000
Minimum subsequent investment	US\$1 000

Subscription and redemption charge

Investors are charged 0.5% when subscribing for Fund shares. Investors may be charged 0.5% when redeeming Fund shares in the case of significant redemptions. These charges are paid into the Fund to offset the costs associated with the transactions that are borne by the Fund. Allan Gray International Proprietary Limited (the 'Investment Manager') may waive these charges if transactions substantially offset one another.

Fund information on 31 December 2015

Fund currency	US\$ ¹
Fund size	US\$170m
Fund price	US\$129.89

Latest 5 years	-5.6	-5.2
Latest 3 years	-11.0	-9.1
Latest 2 years	-20.7	-11.7
Latest 1 year	-33.6	-24.8
Year-to-date (unannualised)	-33.6	-24.8
Risk measures (since inception, based on month-end prices)		
Maximum drawdown ³	-52.5	-60.5
Percentage positive months ⁴	57.6	57.1
Annualised monthly volatility ⁵	25.7	26.8

1. The Fund is currently priced in US dollars. From inception to 30 April 2012 the Fund was priced in South African rands.
2. The current benchmark is the MSCI EFM Africa Index (total returns). From inception to 30 April 2012 the benchmark was the FTSE/JSE All Share Index including income. Performance as calculated by Allan Gray as at 31 December 2015 (source: Bloomberg). Calculation based on the latest available data as supplied by third parties.
3. Maximum percentage decline over any period. The maximum drawdown occurred from October 2007 to February 2009 and maximum benchmark drawdown occurred from October 2007 to February 2009. Drawdown is calculated on the total return of the Fund/benchmark (i.e. including income).
4. The percentage of calendar months in which the Fund produced a positive monthly return since inception.
5. The standard deviation of the Fund's monthly return. This is a measure of how much an investment's return varies from its average over time.

Income distributions for the last 12 months

The Fund has not distributed income in the last 12 months.

Annual management fee

The annual management fee ranges from 0.5% to 2.5% depending on the relative return of the Fund to the benchmark, before fees. The fee is calculated on a base of 1.5% plus one twenty-fifth of the cumulative three-year relative performance, subject to a floor of 0.5% and cap of 2.5%. For example if the cumulative three year performance of the fund is 20% and that of the benchmark is 15%, the fee rate is: $1.5\% + (20\% - 15\%) / 25 = 1.7\%$.

Total expense ratio (TER)

The annual management fee charged is included in the TER. The TER is a measure of the actual expenses incurred by the Fund over a 12-month period. Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns.

TER breakdown for the year ending 30 September 2015	%
Fee for benchmark performance	1.50
Performance fees	0.41
Brokerage and custody fees	0.27
Other costs	0.06
Total expense ratio	2.23

ALLAN GRAY

ALLAN GRAY AFRICA EQUITY FUND

Fund manager quarterly commentary as at 31 December 2015

The Africa Equity Fund performed poorly in 2015, losing 33.6% over the year. What is encouraging is the exceptional value we find in our investments.

We have not changed our view on any of the shares that detracted significantly from returns. In fact we are still buyers of each of the top five detractors. Our worst-performing investment was Zimbabwean telecommunications group Econet Wireless, which fell from US\$0.60 to US\$0.21 per share. The country's difficult economic situation and tough regulation are pressuring Econet's profits. That said, the company is gaining voice revenue share and growing its ancillary money transfer business. Econet generates strong cash flow, which can be put towards highly accretive share buybacks and debt reduction. The market capitalisation is currently US\$344m and Econet bought back US\$23m worth of shares during the six months to September.

The share price of Eastern Tobacco, the Fund's largest holding, fell from EGP220 to EGP175 per share. Eastern is an Egyptian, state controlled, monopoly cigarette producer. Its operations performed well above our expectations in 2015, with earnings before interest, tax, depreciation and amortisation (EBITDA) growing 36% and net cash rising to EGP30 per share. The company trades on a historic enterprise value to EBITDA multiple of three and under six times forward earnings: an exceptional opportunity.

The biggest uncertainty for the year ahead is the potential devaluation of the Nigerian naira. The Fund has a 13.9% exposure to domestic Nigerian companies (this excludes oil and gas companies). In a perfect world we would wait for the naira to weaken and only then invest at the new, lower US dollar prices. We largely agree with the widely expected view that a naira devaluation is likely. However, we believe this view is already discounted in Nigerian equity valuations. We have chosen to invest now in what we think are extremely cheap shares rather than wait on the side-lines for a potentially cheaper entry point.

I wrote about our opposition to the merger of oil companies MPI and Maurel & Prom (MAU) in the September commentary. Unfortunately, shareholders approved the merger, which passed with the required majority, if only just. The terms were improved from two MPI shares and a EURO.45 dividend for each MAU share to 1.5 MPI shares and the dividend for each MAU share, but we were still against the deal. Amazingly for such a drastic change in the nature of the business, only 61% of shareholders saw fit to vote at the general meeting.

Over the past month we have been net buyers of South African equities. The South African market has been flat over the past year, but the 35% weaker rand led to poor dollar returns. The value disparity between domestically orientated companies and international businesses has recently widened sharply.

We believe the Fund is invested in a portfolio of very attractively priced shares which should yield good returns for investors in the years to come.

ALLAN GRAY AFRICA EQUITY FUND

Notes for consideration

Fund information

The Fund is incorporated and registered under the laws of Bermuda and is supervised by the Bermuda Monetary Authority. The Fund is also listed on, and regulated by, the Bermuda Stock Exchange. The primary custodian of the Fund is Citibank N.A. The custodian can be contacted at 399 Park Avenue, New York, New York, USA. The Investment Manager, an authorised Financial Services Provider in terms of the Financial Advisory and Intermediary Services Act 37 of 2002, is the appointed investment manager of the Fund.

The Fund may be closed to new investments at any time to be managed according to its mandate. Shares in the Fund are traded at ruling prices and the Fund can engage in borrowing and scrip lending. The Fund may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. This report does not constitute a financial promotion, a recommendation, an offer to sell or a solicitation to buy shares in the Fund. Investments in the Fund are made according to the terms and conditions and subject to the restrictions set out in the prospectus. Shares in the Fund are not offered to South African residents and the offering of shares in the Fund may be restricted in certain other jurisdictions. Please contact the Allan Gray service team to confirm if there are any restrictions that apply to you.

Performance

Collective Investment Schemes in Securities (unit trusts or mutual funds) are generally medium- to long-term investments. The value of shares may go down as well as up and past performance is not necessarily a guide to future performance. Movements in exchange rates may cause the value of underlying international investments to go up or down. Neither the Investment Manager nor the Fund provides any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. Actual investor performance may differ as a result of the investment date, the date of reinvestment and applicable taxes.

Benchmark data

The Fund's benchmark data is provided by MSCI who require that we include the following legal notes. Neither MSCI nor any other party involved in or related to compiling, computing or creating the MSCI data makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates or any third party involved in or related to compiling, computing or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Share price

Share prices are calculated on a net asset value basis, which is the total market value of all assets in the Fund including any income accruals and less any permissible deductions from the Fund divided by the number of shares in issue. Forward pricing is used. The weekly price of the Fund is normally calculated each Friday. Purchase requests must be received by the Registrar of the Fund (being Citibank International Limited, Luxembourg Branch) by 17:00 Bermuda time on that dealing day to receive that week's price. Redemption requests must be received by the

Registrar of the Fund by 12:00 Bermuda time, on the particular dealing day on which shares are to be redeemed to receive that week's price. Share prices are available on www.allangray.com.

Fees and charges

Permissible deductions from the Fund may include management fees, brokerage, Securities Transfer Tax (STT), auditor's fees, bank charges and custody fees. A schedule of fees, charges and maximum commissions is available on request from the Allan Gray Service Team.

Total expense ratio (TER)

The total expense ratio (TER) is the percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past year. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged), trading costs (including brokerage, STT and investor protection levies where applicable) and other expenses. Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns. As collective investment scheme expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money.

Foreign exposure

There are significant risks involved in investing in shares listed in the Fund's universe of emerging and developing countries including liquidity risks, sometimes aggravated by rapid and large outflows of 'hot money' and capital flight, concentration risk, currency risks, political and social instability, the possibility of expropriation, confiscatory taxation or nationalisation of assets and the establishment of foreign exchange controls which may include the suspension of the ability to transfer currency from a given country.

The Fund can use derivatives to manage its exposure to stock markets, currencies and/ or interest rates and this exposes the Fund to contractual risk. Contractual risk includes the risk that a counterparty will not settle a transaction according to its terms and conditions because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, causing the Fund to suffer a loss. Such contract counterparty risk is accentuated for contracts with longer maturities where events may intervene to prevent settlement, or where the Fund has concentrated its transactions with a single or small group of counterparties. Borrowing, leveraging, and trading securities on margin will result in interest charges and, depending on the amount of trading activity, such charges could be substantial. The low margin deposits normally required in futures and forward trading, which the Fund may utilise, permit a high degree of leverage. As a result, a relatively small price movement in a futures or forward contract may result in immediate and substantial losses to the investor.

Additional information

Additional information regarding the Fund including copies of the prospectus, application forms and annual report may be obtained by contacting the Allan Gray service team, at +3 531 622 4716 or by email at AGclientservice@citi.com.
