C Class 30 June 2023

Investment team: Mark Dunley-Owen, Thalia Petousis Fund inception date: 27 March 2013 Registration number: 47091

### Fund description and summary of investment policy

The Fund invests in a focused portfolio of African securities that are selected for their expected risk and return profile. The Fund may invest a substantial portion of the assets in a single country or region rather than a diversified portfolio of assets.

Classification: Africa - Interest Bearing

### Fund objective and benchmark

The Fund seeks to achieve the maximum US dollar total return while minimising the risk of loss within the context of an African bond fund. The benchmark is the FTSE 3 Month US T Bill + 4% Index.

### African security markets

There are numerous risks involved in investing in African security markets. These risks may be significantly higher than in more developed markets and may include (but are not limited to) the following:

- Individual countries may impose capital controls preventing the repatriation of foreign currency
- Returns are expected to be more volatile, and the average drawdown may be higher, than in more developed markets
- Low liquidity whereby subscriptions into the Fund may have to be phased in, and redemptions from the Fund may be limited per dealing day
- Market prices may not accurately reflect the fair value of a Fund asset and fair value pricing may be used

There is no assurance that the investment approach of the Fund will be successful or that the Fund will achieve its investment objective.

See the "Important information for investors" section for more information.

### How we aim to achieve the Fund's objective

We assess an asset's intrinsic value based on long-term fundamentals and invest where our assessment of intrinsic value exceeds the price by a margin of safety. This approach allows us to identify assets that may be out of favour with the market because of poor near-term prospects, but offer good value over the long term.

### Suitable for those investors who

- Seek exposure to African interest-bearing assets
- Are comfortable with above-average market and currency fluctuations
- Are prepared to take on the risk of capital loss
- Have a minimum investment horizon of five years

#### Fund information on 30 June 2023

Fund currency	US\$
Fund size	US\$294m
Number of shares	1 887 726
Price (net asset value per share)	US\$148.79
Number of issuers	18
Dealing day	Weekly (Thursday)
Class	С
Class inception date	14 May 2020

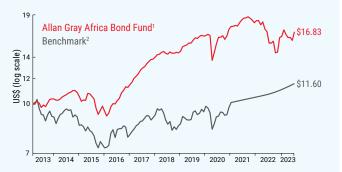

#### Minimum investment amounts

Minimum initial investment	US\$100 000
Minimum subsequent investment	US\$1 000

- Prior to the inception of this class of the Fund, the
  performance and risk measures are calculated using the
  A class performance of the Fund. The net of fee return
  is calculated as the gross of fee return reduced by an
  investment management fee of 0.7% per annum, which
  is accrued monthly in arrears.
- The current benchmark is the FTSE 3 Month US T Bill + 4% Index. From inception to 31 December 2020 the benchmark was the J.P. Morgan GBI-EM Global Diversified Index. Performance as calculated by Allan Gray as at 30 June 2023. Calculation based on the latest available data as supplied by third parties.
- Maximum percentage decline over any period calculated from monthly returns. The maximum drawdown occurred from August 2021 to September 2022 and maximum benchmark drawdown occurred from April 2013 to December 2015. Drawdown is calculated on the total return of the Fund/benchmark (i.e. including income).
- 4. The percentage of calendar months in which the Fund produced a positive monthly return since inception.
- 5. The standard deviation of the Fund's monthly return.
  This is a measure of how much an investment's return varies from its average over time.
- 6. This is the highest or lowest rolling 12-month return the Fund has experienced since inception. The Fund's highest annual return occurred during the 12 months ended 28 February 2017 and the benchmark's occurred during the 12 months ended 31 March 2021. The Fund's lowest annual return occurred during the 12 months ended 30 September 2022 and the benchmark's occurred during the 12 months ended 31 August 2015. All rolling 12-month figures for the Fund and the benchmark are available from the Allan Gray Service Team on request.

### Performance in US\$ net of all fees and expenses

Value of US\$10 invested at inception with all distributions reinvested

% Returns	Fund <sup>1</sup>	Benchmark <sup>2</sup>
Cumulative:		
Since inception (27 March 2013)	68.3	16.0
Annualised:		
Since inception (27 March 2013)	5.2	1.5
Latest 10 years	5.6	2.2
Latest 5 years	3.3	6.0
Latest 3 years	1.3	8.1
Latest 2 years	-4.8	6.0
Latest 1 year	8.6	7.8
Year-to-date (not annualised)	3.3	4.3
Risk measures (since inception. based on month-end prices)		
Maximum drawdown <sup>3</sup>	-22.8	-29.3
Percentage positive months <sup>4</sup>	65.3	66.9
Annualised monthly volatility <sup>5</sup>	10.4	10.2
Highest annual return <sup>6</sup>	28.4	22.3
Lowest annual return <sup>6</sup>	-22.0	-21.5

Investment team: Mark Dunley-Owen, Thalia Petousis Fund inception date: 27 March 2013 Registration number: 47091

### Meeting the Fund objective

The Fund seeks to achieve the maximum US dollar return while minimising the risk of loss within the context of an African bond fund. The Fund experiences periods of underperformance in pursuit of this objective. Since inception, the Fund has outperformed its benchmark and delivered positive absolute returns in US dollars.

### Subscription and redemption charge

Investors may be charged 0.5% when subscribing for Fund shares. Investors may be charged 0.5% when redeeming Fund shares in the case of significant redemptions. These charges are paid into the Fund to offset the costs associated with the transactions that are borne by the Fund. Allan Gray Bermuda Limited (the "Investment Manager") may waive these charges if transactions substantially offset one another.

### Annual management fee

The management fee consists of a fixed fee of 0.70% p.a.

### Total expense ratio (TER) and transaction costs7

The annual management fee charged is included in the TER. The TER is a measure of the actual expenses incurred by the Fund over a one- and three-year period (annualised). Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns (refer to page 4 for further information). Transaction costs are disclosed separately. The TER and transaction costs cannot be determined accurately because of the short life span of the class. Calculations are based on actual data where possible and best estimates where actual data is not available.

TER and transaction costs breakdown for the 1- and 3-year period ending 31 March 2023	1yr %	3yr %
Total expense ratio	0.76	0.82
Management fee	0.70	0.70
Custody fees	0.04	0.07
Other costs excluding transaction costs	0.02	0.05
Transaction costs	0.00	0.00
Total investment charge	0.76	0.82

<sup>7.</sup> Prior to the inception of this class of the Fund, the TER and transaction costs data is that of the A Class of the Fund, reduced by 0.3% p.a.

### Fund positioning on 30 June 20238

- The total Nigerian exposure includes accruals for naira-settled currency forwards, valued at the Nigerian Autonomous Foreign Exchange Rate (NAFEX), that are shown under cash.
- Cash is held in multiple currencies and includes USD treasury bills.
- 10. There may be slight discrepancies in the totals due to rounding.
- 11. Represents all non-cash holdings not denominated in local African currency or US\$ (eq. EUR)

# **Allan Gray Africa Bond Fund**

C Class 30 June 2023

Investment team: Mark Dunley-Owen, Thalia Petousis Fund inception date: 27 March 2013 Registration number: 47091

A lot happened in African markets during the second quarter of 2023. Much of this was positive for African credit, although it will need to be backed up by future actions to prove enduring.

Bola Tinubu was elected president of Nigeria. He surprised many by following through on his campaign promise of making Nigeria a more attractive foreign direct investment destination, notably cutting fuel subsidies and moving towards a market-determined exchange rate. The official naira to US dollar exchange rate weakened by 65% over the quarter while Nigerian Eurobonds rallied on the expectation of more sustainable government finances and improved dollar liquidity. The Fund had no Nigerian government exposure prior to the announcements. We bought some Nigerian Eurobonds on the news but continue to have no naira exposure.

Having defaulted on its debt in 2020, Zambia became the second developing country after Chad to reach a debt relief agreement with its official creditors under the G20 Common Framework. Importantly, its largest creditor, China, agreed to the relief package despite initial concerns around its participation. Indications are that the agreement will extend the repayment of US\$6.3 billion of Zambia's debt over 20 years at interest rates not exceeding 2.5%. A similar package is expected to be presented to Zambia's private creditors, including the Fund, which owns a small Zambian Eurobond position.

Zambia's creditors' agreement bodes well for Ghana which is following a similar path. Ghana's official creditors committed to providing debt relief to Ghana in May which allowed the International Monetary Fund (IMF) to begin payments to Ghana under its Extended Credit Facility. The Ghanaian government has since sent a debt restructuring proposal to the creditors' committee, starting formal negotiations. An outcome similar to what has been proposed for Zambia plus the already-announced restructuring of local currency debt would lower Ghana's interest payments – a key factor impacting the country's debt sustainability.

Egypt faces similar challenges with more than half of government revenue expected to be used to pay debt interest payments over the coming year.

Unlike Zambia and Ghana, Egypt continues to meet its foreign interest payment obligations and has expressed a desire to avoid default. To do so, the authorities are taking steps to attract foreign capital. They devalued the Egyptian pound for the second time in January, proposed incentives and new tax treatment for foreign direct investment, and are progressing with the privatisation of state-owned assets. For now, these measures appear insufficient, with the exchange rate remaining below the market clearing level and little foreign capital entering the country. Egyptian bonds therefore remain priced for default. While this is a possibility, Egypt's important regional and global role, strong relationship with Gulf states and willingness to engage with the IMF suggest that a default is less likely than in other stressed African borrowers.

Events in other African countries were less impactful but still important. South Africa's power crisis continued, while the country's relationship with the US was strained by allegations that it was selling arms to Russia. Senegalese authorities targeted the opposition leader, Ousmane Sonko, and convicted him of seemingly weak charges. This led to protests that left 16 people dead and more than 350 wounded. The Ruto administration in Kenya delivered its first budget, outlining a plan for fiscal consolidation and proposals for improving tax collection as Kenya works towards being able to repay its US\$2 billion Eurobond maturing in June 2024.

The takeaway from these events is that uncertainty remains high, but progress is being made. We believe this progress is not priced into African bonds, providing upside if reality turns out better than feared. Zambian Eurobonds, for example, rallied about 25% over the quarter on the restructuring news. We believe many of the Fund's holdings have similar potential.

During the quarter, we bought Nigerian Eurobonds and trimmed Egyptian and Ugandan local currency exposure. We also exited our First Quantum position and trimmed our Tullow corporate bond holdings.

While the Fund has been approved to market its shares to the public in Botswana by the Regulatory Authority of Botswana, the undertaking is not supervised or licensed in Botswana. The Fund is incorporated and registered under the laws of Bermuda and is supervised by the Bermuda Monetary Authority. The Fund's share classes are also listed on the Bermuda Stock Exchange. The primary custodian of the Fund is Standard Bank of South Africa Limited. The custodian can be contacted at Investor Services, 2nd Floor, 25 Pikley Ka Isaka Seme Street, Johannesburg, South Africa. Allan Gray Bermuda Limited (the "Investment Manager") has appointed Allan Gray Unit Trust Management (RF) Proprietary Limited (the "Representative") as its representative for the purpose of approval in terms of the Collective Investment Schemes Control Act 45 of 2002. The Representative is incorporated under the laws of South Africa and is supervised by the Financial Sector Conduct Authority (FSCA). The Fund may be closed to new investments at any time to be managed according to its mandate. Shares in the Fund are traded at ruling prices and the Fund can engage in borrowing and scrip lending. The Fund may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Investments in the Fund are made according to the terms and conditions and subject to the restrictions set out in the prospectus. The offering of shares in the Fund may be restricted in certain jurisdictions. Please contact the Allan Gray service team to confirm if there are any restrictions applicable to you.

#### Performance

Collective investment schemes (unit trusts or mutual funds) are generally medium- to long-term investments. Where annualised performance is mentioned, this refers to the average return per year over the period. The value of shares or the investment may go down as well as up and past performance is not necessarily a guide to future performance. Movements in exchange rates may cause the value of underlying international investments to go up or down. Neither the Investment Manager, the Fund, nor the Representative provides any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. The performance graph is for illustrative purposes only. Actual investor performance may differ as a result of the investment date, the date of reinvestment and applicable taxes. The yield is current, calculated as at month-end.

#### J.P. Morgan Index

Information has been obtained from sources believed to be reliable but J.P. Morgan does not warrant its completeness or accuracy. The Index is used with permission. The Index may not be copied, used, or distributed without J.P. Morgan's prior written approval. Copyright 2023, J.P. Morgan Chase & Co. All rights reserved.

#### FTSE Russell Index

Source: London Stock Exchange Group plc and its group undertakings (collectively, the "LSE Group") © LSE Group 2023. FTSE Russell is a trading name of certain of the LSE Group companies. "FTSE®" "Russell®", "FTSE Russell®", is/are a trade mark(s) of the relevant LSE Group companies and is/are used by any other LSE Group company under license. All rights in the FTSE Russell indexes or data vest in the relevant LSE Group company which owns the index or the data. Neither LSE Group nor its licensors accept any liability for any errors or omissions in the indexes or data and no party may rely on any indexes or data contained in this communication. No further distribution of data from the LSE Group is permitted without the relevant LSE Group company's express written consent. The LSE Group does not promote, sponsor or endorse the content of this communication.

#### Share price

Share prices are calculated on a net asset value basis, which is the total market value of all assets in the Fund, including any income accruals, less any permissible deductions from the Fund, divided by the number of shares in issue. Forward pricing is used. The weekly price of the Fund is normally calculated each Friday. Purchase requests must be received by the Registrar of the Fund by 17:00 South African time on that dealing day to receive that week's price. Redemption requests must be received by the Registrar by 17:00 South African time on the dealing day on which shares are to be redeemed to receive that week's price. Share prices are available on www.allangray.co.za.

Permissible deductions from the Fund may include management fees, brokerage, securities transfer tax, auditor's fees, bank charges and custody fees. A schedule of fees, charges and maximum commissions is available on request from the Representative.

#### Total expense ratio (TER) and transaction costs

The TER is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past one- and three-year periods. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance the animal management less that have been charged (both the less at benchmark and any performance component charged) and other expenses like audit fees. Transaction costs (including brokerage, securities transfer tax and investor protection levies where applicable) are shown separately. There are no explicit brokerage charges in global bond markets. The broker rather takes an undisclosed spread between the purchase and sale price. The spread (charge) can vary from negligible to substantial depending on the asset and market circumstances. The disclosed transaction charge is therefore zero but in reality, there are transaction costs which reflect in the Fund's returns. We aim to minimise costs by keeping our trading activity to a minimum and always seeking out the most favourable price when buying and selling assets. Transaction costs are necessary costs in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of fund, the investment decisions of the investment Manager and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted from published returns. As collective investment scheme expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money. The sum of the TER and transaction costs is shown as the total investment charge (TIC).

#### African markets

There are significant risks involved in investing in securities listed in the Fund's universe of emerging and developing countries, including liquidity risks, sometimes aggravated by rapid and large outflows of "hot money" and capital flight, concentration risk, currency risks, political and social instability, the possibility of expropriation, confiscatory taxation or nationalisation of assets and the establishment of foreign exchange controls which may include the suspension of the ability to transfer currency from a given country. African countries have varying laws and regulations and, in some, foreign investment is controlled or restricted in varying degrees.

#### Capacity

The Fund currently has limited capacity. The Investment Manager may, at its discretion, refuse a subscription or phase a subscription into the Fund over a number of dealing days. Total investor redemptions may be limited to US\$5m or 2.5% of the Fund (whichever is less) per dealing day. The Investment Manager retains the right to distribute all or part of any redemption proceeds in specie (in kind).

#### Fair value pricing

The board of directors of the Fund (the "Board") may fair value the Fund's assets in accordance with the Board's fair value pricing policies if: 1) the closing market quotations or official closing prices are not readily available or do not accurately reflect the fair value of a Fund asset; or 2) the value of a Fund asset has been materially affected by events occurring before the Fund's pricing time but after the close of the exchange or market on which the asset is principally traded. The Board delegates the responsibility for fair value pricing decisions to a valuation committee of the Investment Manager.

#### Contractual risk

The Fund can use derivatives to manage its exposure to currencies and/or interest rates and this exposes the Fund to contractual risk. Contractual risk includes the risk that a counterparty will not settle a transaction according to its terms and conditions because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, causing the Fund to suffer a loss. Such contract counterparty risk is accentuated for contracts with longer maturities where events may intervene to prevent settlement, or where the Fund has concentrated its transactions with a single or small group of counterparties.

#### Derivatives

Borrowing, leveraging and trading securities on margin will result in interest charges and, depending on the amount of trading activity, such charges could be substantial. The low margin deposits normally required in futures and forward trading, which the Fund may utilise, permit a high degree of leverage. As a result, a relatively small price movement in a futures or forward contract may result in immediate and substantial losses to the investor. Price movements of forward contracts and other derivative contracts in which the assets of the Fund may be invested are highly volatile and are influenced by, among other things, interest rates, changing supply and demand relationships, trade, fiscal, monetary and exchange control programmes and policies of governments, and national and international political and economic events and policies. Forward contracts are not traded on exchanges and are not standardised; rather, banks and dealers act as principals in these markets, negotiating each transaction on an individual basis. Trading in forward contracts is substantially unregulated and there is no limitation on daily price movements.

#### FTSE/JSE All Share Index and FTSE/JSE All Bond Index

The FTSE/JSE All Share Index and FTSE/JSE All Bond Index are calculated by FTSE International Limited ("FTSE") in conjunction with the JSE Limited ("JSE") in accordance with standard criteria. The FTSE/JSE All Share Index and FTSE/JSE All Bond Index are the proprietary information of FTSE and the JSE.
