

ALLAN GRAY BALANCED FUND

Fact sheet at 30 April 2007

Sector: Domestic AA Prudential Medium Equity
Inception Date: 1 October 1999
Fund Managers: Stephen Mildenhall, Arjen Lugtenberg, Duncan Artus, Ian Liddle, Delphine Govender, Orbis Investment Management Limited

The Fund's investment strategy is to earn a higher rate of return than the market value-weighted average of the domestic medium equity prudential unit trust sector excluding the Allan Gray Balanced Fund without assuming any greater monetary risk. Risk will be higher than the Stable Fund but less than the Equity Fund.

Fund Details

Price: 5 142.10 cents
Size: R 23 284 817 135
Minimum lump sum: R 5 000
Minimum monthly: R 500
Subsequent lump sums: R 500
No. of share holdings: 55

01/01/06-31/12/06 dividend (cpu): Total 91.62
 Interest 48.65, Dividend 42.95, Foreign Interest 0.02

Annual Management Fee: The monthly charge rate is directly related to the rolling two-year return of the Fund compared with that of its benchmark. The limits are 0.57-1.71% p.a. (incl. VAT).

Total Expense Ratio*

Total Expense Ratio	Included in TER	
	Trading Costs	Performance Component
1.99%	0.14%	0.50%

*A Total Expense Ratio (TER) is a measure of a portfolio's assets that are relinquished as operating expenses. It is expressed as a percentage of the average value of the portfolio, calculated for the year to the end of December 2006. Included in the TER is the proportion of costs that are incurred in performance component and trading costs. These are disclosed separately as percentages of the net asset value.

Commentary

The South African share market continued to make new highs in April. The volatility of the stockmarket will be reflected in the returns of the Fund as the major portion of the Balanced Fund is invested in equities. But volatility should be less than that of the Equity Fund. Unfortunately we are not able to predict future stockmarket movements. The net SA equity exposure of the Fund (63.9%) is not a result of a strategic asset allocation decision, but is rather the result of assessing the potential long-term returns of each share in the portfolio versus the potential long-term returns of property, bonds and the money market. It will be more difficult for equities to outperform alternative asset classes from today's starting point, because of the current high level of share prices. Nonetheless we remain confident that the shares in the Fund will deliver superior returns in the long-term, albeit with more volatility than the money market.

Collective Investment Schemes in Securities (unit trusts) are generally medium to long-term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accrual and less any permissible deductions from the portfolio divided by the number of units in issue. Declaration of income accruals are made bi-annually. Different classes of units apply to the Fund and are subject to different fees and charges. Fund valuations take place at approximately 16h00 each business day. Purchase and repurchase requests may be received by the manager by 14h00 each business day. Performance figures from Allan Gray Limited (GIPS compliant) are for lump sum investments using net asset value prices with income distributions reinvested. Permissible deductions may include management fees, brokerage, MST, auditor's fees, bank charges, trustee fees and RSC levies. The Fund may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees and charges and maximum commissions is available on request from Allan Gray Unit Trust Management Limited. Commission and incentives may be paid and if so, would be included in the overall costs. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. Forward pricing is used. This Fund may be capped at any time in order to be managed in accordance with the mandate. Member of the ACI. Total Expense Ratio (TER). When investing, costs are only a part of an investment decision. The investment objective of the Fund should be compared with the investor's objective and then the performance of the investment and whether it represents value for money should be evaluated as part of the financial planning process. All Allan Gray performance figures and values are quoted after the deduction of costs incurred within the Fund so the TER is not a new cost. A high TER will not necessarily imply a poor return nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.
