

Sector: Domestic AA - Prudential - Medium Equity
Inception Date: 1 October 1999
Fund Managers: Stephen Mildenhall, Arjen Lugtenberg, Duncan Artus, Ian Liddle, Delphine Govender, Orbis Investment Management Limited

The Fund's investment strategy is to earn a higher rate of return than the market value-weighted average of the domestic medium equity prudential unit trust sector excluding the Allan Gray Balanced Fund without assuming any greater monetary risk.

Fund Details

Price: 5 014.52 cents
Size: R 24 106 269 662

Minimum monthly: R 500
Subsequent lump sums: R 500
No. of share holdings: 54
Income distribution: Bi-annually
01/07/06-30/06/07 dividend (cpu): Total 90.24
 Interest 42.49, Dividend 47.71, Foreign Interest and Dividend 0.04
Annual management fee:

Total Expense Ratio*

Total Expense Ratio	Included in TER	
	Trading Costs	Performance Component
2.10%	0.13%	0.59%

*A Total Expense Ratio (TER) is a measure of a portfolio's assets that are relinquished as operating expenses (incl. VAT). It is expressed as a percentage of the average value of the portfolio, calculated for the year to the end of March 2007. Included in the TER is the proportion of costs that are incurred in the performance component and trading costs. These are disclosed separately as percentages of the net asset value.

The annual management fee rate is dependent on the return of the Fund relative to its benchmark, the market value-weighted average of the domestic medium equity prudential unit trust sector excluding the Allan Gray Balanced Fund, over a rolling two-year period. The fee hurdle (above which a fee greater than the minimum fee of 0.5% is charged) is performance equal to the benchmark minus 5%. For performance equal to the benchmark a fee of 1.0% (excl. VAT) per annum is payable. The manager's sharing rate is 10% of the under- and outperformance of the benchmark over a rolling two-year period and a maximum fee of 1.5% (excl. VAT) applies.

Commentary

The ALSI reached a record 30,000 points during July - a fourfold increase over four years! We believe that the market is too complacent regarding the sustainability of company profits in the less favourable economic conditions that will surely come. Our caution is reflected not only in a further reduction in the Fund's net equity exposure to 63.2%, but also in our stock selection. The top three shares: MTN, Remgro (whose major asset is a stake in British American Tobacco) and SABMiller share some similar characteristics: relatively stable (non-cyclical) demand for their products, strong competitive advantages, global diversification and surprisingly strong growth prospects. While we are excited about the business prospects for MTN, SAB and BAT; it must be said that the shares are not outstanding bargains as they all trade at more than 15 times forward earnings. But then it is rare to find outstanding bargains when a stock market is up four times, and we encourage our clients to temper their return expectations.

Top 10 Share Holdings at 30 June 2007*

JSE Code	Company	% of portfolio
MTN	MTN Group	6.5
REM	Remgro	6.2
SAB	SAB	5.5

Collective Investment Schemes in Securities (unit trusts) are generally medium to long-term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accrual and less any permissible deductions from the portfolio divided by the number of units in issue. Declaration of income accruals are made bi-annually. Different classes of units apply to the Fund and are subject to different fees and charges. Fund valuations take place at approximately 16h00 each business day. Purchase and repurchase requests may be received by the manager by 14h00 each business day. Performance figures from Allan Gray Limited (GIPS compliant) are for lump sum investments using net asset value prices with income distributions reinvested. Permissible deductions may include management fees, brokerage, UST, auditor's fees, bank charges, trustee fees and RSC levies. The Fund may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees and charges and maximum commissions is available on request from Allan Gray Unit Trust Management Limited. Commission and incentives may be paid and if so, would be included in the overall costs. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. Forward pricing is used. This Fund may be capped at any time in order to be managed in accordance with the mandate. Member of the ACI. Total Expense Ratio (TER): When investing, costs are only a part of an investment decision. The investment objective of the Fund should be compared with the investor's objective and then the performance of the investment and whether it represents value for money should be evaluated as part of the financial planning process. All Allan Gray performance figures and values are quoted after the deduction of costs incurred within the Fund so the TER is not a new cost. A high TER will not necessarily imply a poor return nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.
