

Fund description and summary of investment policy

The Fund invests in a mix of shares, bonds, property, commodities and cash. The Fund may buy foreign assets up to a maximum of 30% of the Fund (with an additional 10% for African ex-SA investments). The Fund typically invests the bulk of its foreign allowance in a mix of funds managed by Orbis Investment Management Limited, our offshore investment partner. The maximum net equity exposure of the Fund is 75% and we may use exchange-traded derivative contracts on stock market indices to reduce net equity exposure from time to time. The Fund is managed to comply with the investment limits governing retirement funds. Returns are likely to be less volatile than those of an equity-only fund.

ASISA unit trust category: South African – Multi Asset – High Equity

Fund objective and benchmark

The Fund aims to create long-term wealth for investors within the constraints governing retirement funds. It aims to outperform the average return of similar funds without assuming any more risk. The Fund's benchmark is the market value-weighted average return of funds in the South African – Multi Asset – High Equity category (excluding Allan Gray funds).

How we aim to achieve the Fund's objective

We seek to buy shares at a discount to their intrinsic value. We thoroughly research companies to assess their intrinsic value from a long-term perspective. This long-term perspective enables us to buy shares which are shunned by the stock market because of their unexciting or poor short-term prospects, but which are relatively attractively priced if one looks to the long term. If the stock market offers few attractive shares we may increase the Fund's weighting to alternative assets such as bonds, property, commodities and cash, or we may partially hedge the Fund's stock market exposure. By varying the Fund's exposure to these different asset classes over time, we seek to enhance the Fund's long-term returns and to manage its risk. The Fund's bond and money market investments are actively managed.

Suitable for those investors who

- Seek steady long-term capital growth
- Are comfortable with taking on some risk of market fluctuation and potential capital loss, but typically less than that of an equity fund
- Wish to invest in a unit trust that complies with retirement fund investment limits
- Typically have an investment horizon of more than three years

Minimum investment amounts

Minimum lump sum per investor account	R20 000
Additional lump sum	R500
Minimum debit order*	R500

*Only available to investors with a South African bank account.

Fund information on 28 February 2018

Fund size	R144.6bn
Number of units	784 903 627
Price (net asset value per unit)	R106.72
Class	A

1. The market value-weighted average return of funds in the South African – Multi Asset – High Equity category (excluding Allan Gray funds). From inception to 31 January 2013 the benchmark was the market value-weighted average return of the funds in both the Domestic Asset Allocation Medium Equity and Domestic Asset Allocation Variable Equity sectors of the previous ASISA Fund Classification Standard, excluding the Allan Gray Balanced Fund. Source: Morningstar, performance as calculated by Allan Gray as at 28 February 2018.
2. This is based on the latest numbers published by IRESS as at 31 January 2018.
3. Maximum percentage decline over any period. The maximum drawdown occurred from 20 May 2008 to 27 October 2008 and maximum benchmark drawdown occurred from 20 May 2008 to 10 March 2009. Drawdown is calculated on the total return of the Fund/benchmark (i.e. including income).
4. The percentage of calendar months in which the Fund produced a positive monthly return since inception.
5. The standard deviation of the Fund's monthly return. This is a measure of how much an investment's return varies from its average over time.
6. These are the highest or lowest consecutive 12-month returns since inception. This is a measure of how much the Fund and the benchmark returns have varied per rolling 12-month period. The Fund's highest annual return occurred during the 12 months ended 30 April 2006 and the benchmark's occurred during the 12 months ended 30 April 2006. The Fund's lowest annual return occurred during the 12 months ended 28 February 2009 and the benchmark's occurred during the 12 months ended 28 February 2009. All rolling 12-month figures for the Fund and the benchmark are available from our Client Service Centre on request.

Performance net of all fees and expenses

Maximum drawdown ³	-15.4	-20.5	n/a
Percentage positive months ⁴	70.6	68.3	n/a
Annualised monthly volatility ⁵	8.9	9.0	n/a
Highest annual return ⁶	46.1	41.9	n/a
Lowest annual return ⁶	-8.3	-16.7	n/a

Meeting the Fund objective

The Fund has created wealth for its long-term investors. Since inception and over the latest 10 and five-year periods, the Fund has outperformed its benchmark, and its returns have exceeded CPI inflation by a significant margin. The Fund experiences periods of underperformance in pursuit of its objective of creating long-term wealth for investors, without taking on greater risk of loss than the average balanced fund. The maximum drawdown and lowest annual return numbers, in the 'Performance net of all fees and expenses' table, show that the Fund has successfully reduced downside risk in periods of negative market returns.

Income distributions for the last 12 months

To the extent that income earned in the form of dividends and interest exceeds expenses in the Fund, the Fund will distribute any surplus biannually.	30 Jun 2017	31 Dec 2017
Cents per unit	99.1583	102.0649

Annual management fee

Allan Gray charges a fee based on the net asset value of the Fund excluding the portion invested in Orbis funds. The fee rate is calculated daily by comparing the Fund's total performance over the last two years, to that of the benchmark.

Fee for performance equal to the Fund's benchmark: 1.00% p.a. excl. VAT

For each percentage of two-year performance above or below the benchmark we add or deduct 0.1%, subject to the following limits:

Maximum fee: 1.50% p.a. excl. VAT

Minimum fee: 0.50% p.a. excl. VAT

This means that Allan Gray shares in approximately 20% of annualised performance relative to the benchmark.

A portion of the Fund may be invested in Orbis funds. Orbis charges performance-based fees within these funds that are calculated based on each Orbis fund's performance relative to its own benchmark. Orbis pays a marketing and distribution fee to Allan Gray.

Total expense ratio (TER) and Transaction costs

The annual management fees charged by both Allan Gray and Orbis are included in the TER. The TER is a measure of the actual expenses incurred by the Fund over a one and three-year period (annualised). Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns (refer to page 4 for further information). Transaction costs are disclosed separately.

Top 10 share holdings on 31 December 2017 (SA and Foreign) (updated quarterly)⁸

Company	% of portfolio
Naspers ⁷	6.5
Sasol	6.0
Old Mutual	3.7
British American Tobacco	3.5
Standard Bank	3.1
Remgro	2.9
Investec	1.8
Life Healthcare	1.5

Bonds	11.5	9.7	0.8	0.9
Money market and bank deposits	13.3	9.5	0.7	3.1
Total (%)	100.0	71.0	2.5	26.5⁹

8. Underlying holdings of Orbis funds are included on a look-through basis.

9. Up to 30% of the Fund's value can be invested outside of Africa and 10% in Africa outside of South Africa. Market movements periodically cause the Fund to move beyond these limits. This must be corrected within 12 months.

Since inception, the Fund's month-end net equity exposure has varied as follows:

Minimum	(February 2000) 49.3%
Average	62.1%
Maximum	(July 2004) 72.7%

Note: There may be slight discrepancies in the totals due to rounding.

It has been an action-packed year on the market. Here are some things that stood out for us:

- Naspers, which is now 20% of the FTSE/JSE All Share Index (ALSI), started the year at R2 000 per share, traded all the way up to R4 100, and is currently R3 400. Only two of the top hundred companies have beaten Naspers: Kumba and Exxaro.
- Steinhoff started the year as a R300 billion company, and now has a smaller market cap than Italtile.
- Our government's financial position continued to deteriorate, but sentiment towards local firms turned positive when Cyril Ramaphosa was elected as head of the ANC. Barclays went from R150 to nearly R200 in the four days following the national conference.
- The rand has strengthened by 10% against the US dollar since January 2017.
- The price of Bitcoin increased fourteen-fold.

We did not know who would win the ANC election. We do not have an edge in predicting this sort of thing, which is why we structure the portfolio for different outcomes. We also focus on buying undervalued shares, preferably shares under a cloud of negative sentiment and with lots of bad news priced in. This approach has worked well for us through numerous bubbles, crises, and upheavals. It is why we owned shares like Mr Price, Standard Bank, Foschini and Remgro - all of which benefitted from the change in sentiment after the ANC conference.

We were substantial net sellers of equity in the fourth quarter given the price appreciation of some of our largest holdings. We reduced our British American Tobacco holding in November while we were substantial sellers of Standard Bank in the latter half of December. That said we did add to our Woolworths position and initiate a small position in Steinhoff. As of writing the Steinhoff purchase was a mistake and has detracted 0.4% of Fund. There are a few things to be said:

1. We make many mistakes. Steinhoff was not the largest mistake in recent years. Not buying Kumba Iron Ore at R26 or Richemont at R80 were both way worse mistakes, to name just two.

2. There are different senses of the word "mistake". We are not aware of any errors in our analysis, or process, only in how we weighed the upside versus the downside risks. These types of errors are always clear with the benefit of hindsight, never at the time!
3. The accounts of any business may be fraudulent. For some the probability of fraud is higher than for others. We do not take audited accounts at face value. We look for internal inconsistencies, pose questions to management, and evaluate the quality of the audit committee. We found plenty of cause for concern at Steinhoff. This did not lead us to blackball the share, but instead we put in place position limits and conservative valuation multiples. We only started investing when we thought the potential upside outweighed the risks.
4. For context, if you had owned a passive fund tracking the ALSI, your total loss would have been 2.4% for the year. This made Steinhoff the top contributor in 2017 to our performance relative to the market.
5. We don't yet know the final outcome or magnitude of the fraud. It is possible that the share recovers some of its losses.

If we were only concerned about avoiding embarrassment, or if we tried to avoid all shares with downside risk, this would almost surely dent our long-term returns.

The Fund's performance over the year was helped by positions in Standard Bank and Astral Foods, while it was hindered by positions in Sasol and Life Healthcare. Unfortunately, we did not find value in Richemont even when the share was below R90 in January 2017 and missed out on the share's strong performance in 2017. Fortunately we could also not find value in AngloGold or Aspen, two large companies that underperformed.

Strong returns from international markets, and outperformance by Orbis, contributed to the performance of the Fund in 2017.

Commentary contributed by Jacques Plaut

**Fund manager quarterly
commentary as at
31 December 2017**

Management Company

Allan Gray Unit Trust Management (RF) Proprietary Limited (the 'Management Company') is registered as a management company under the Collective Investment Schemes Control Act 45 of 2002, in terms of which it operates 11 unit trust portfolios under the Allan Gray Unit Trust Scheme, and is supervised by the Financial Services Board ('FSB'). The Management Company is incorporated under the laws of South Africa and has been approved by the regulatory authority of Botswana to market its unit trusts in Botswana, however it is not supervised or licensed in Botswana. Allan Gray Proprietary Limited (the 'Investment Manager'), an authorised financial services provider, is the appointed Investment Manager of the Management Company and is a member of the Association for Savings & Investment South Africa (ASISA). The trustee/custodian of the Allan Gray Unit Trust Scheme is Rand Merchant Bank, a division of FirstRand Bank Limited. The trustee/custodian can be contacted at RMB Custody and Trustee Services: Tel: +27 (0)87 736 1732 or www.rmb.co.za

Performance

Collective Investment Schemes in Securities (unit trusts or funds) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. Movements in exchange rates may also cause the value of underlying international investments to go up or down. The Management Company does not provide any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. Where annualised performance is mentioned, this refers to the average return per year over the period. Actual investor performance may differ as a result of the investment date, the date of reinvestment and dividend withholding tax.

Fund mandate

The Fund may be closed to new investments at any time in order to be managed according to its mandate. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The Fund may borrow up to 10% of its market value to bridge insufficient liquidity.

Unit price

Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the Fund including any income accruals and less any permissible deductions from the Fund divided by the number of units in issue. Forward pricing is used and fund valuations take place at approximately 16:00 each business day. Purchase and redemption requests must be received by the Management Company by 14:00 each business day to receive that day's price. Unit trust prices are available daily on www.allangray.co.za

Fees

Permissible deductions may include management fees, brokerage, Securities Transfer Tax (STT), auditor's fees, bank charges and trustee fees. A schedule of fees, charges and maximum commissions is available on request from Allan Gray.

Total expense ratio (TER) and Transaction costs

The total expense ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past one and three-year periods. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged), VAT and other expenses like audit and trustee fees. Transaction costs (including brokerage, Securities Transfer Tax [STT], STRATE and FSB Investor Protection Levy and VAT thereon) are shown separately. Transaction costs are a necessary cost in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and Transaction costs should not be deducted again from published returns. As unit trust expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money. The sum of the TER and Transaction costs is shown as the Total investment charge.

Compliance with Regulation 28

The Fund is managed to comply with Regulation 28 of the Pension Funds Act. Exposures in excess of the limits will be corrected immediately, except where due to a change in the fair value or characteristic of an asset, e.g. market value fluctuations, in which case they will be corrected within a reasonable time period. The Management Company does not monitor compliance by retirement funds with section 19(4) of the Pension Funds Act (item 6 of Table 1 to Regulation 28).

Foreign exposure

This fund may invest in foreign funds managed by Orbis Investment Management Limited, our offshore investment partner.
