

Fund description and summary of investment policy

The Fund invests in a mix of shares, bonds, property, commodities and cash. The Fund can invest a maximum of 45% offshore. The Fund typically invests the bulk of its foreign allowance in a mix of funds managed by Orbis Investment Management Limited, our offshore investment partner. The maximum net equity exposure of the Fund is 75% and we may use exchange-traded derivative contracts on stock market indices to reduce net equity exposure from time to time. The Fund is managed to comply with the investment limits governing retirement funds. Returns are likely to be less volatile than those of an equity-only fund.

ASISA unit trust category: South African – Multi Asset – High Equity

Fund objective and benchmark

The Fund aims to create long-term wealth for investors within the constraints governing retirement funds. It aims to outperform the average return of similar funds without assuming any more risk. The Fund's benchmark is the market value-weighted average return of funds in the South African – Multi Asset – High Equity category (excluding Allan Gray funds).

How we aim to achieve the Fund's objective

We seek to buy shares at a discount to their intrinsic value. We thoroughly research companies to assess their intrinsic value from a long-term perspective. This long-term perspective enables us to buy shares which are shunned by the stock market because of their unexciting or poor short-term prospects, but which are relatively attractively priced if one looks to the long term. If the stock market offers few attractive shares we may increase the Fund's weighting to alternative assets such as bonds, property, commodities and cash, or we may partially hedge the Fund's stock market exposure. By varying the Fund's exposure to these different asset classes over time, we seek to enhance the Fund's long-term returns and to manage its risk. The Fund's bond and money market investments are actively managed.

Suitable for those investors who

- Seek steady long-term capital growth
- Are comfortable with taking on some risk of market fluctuation and potential capital loss, but typically less than that of an equity fund
- Wish to invest in a unit trust that complies with retirement fund investment limits
- Typically have an investment horizon of more than three years

Meeting the Fund objective

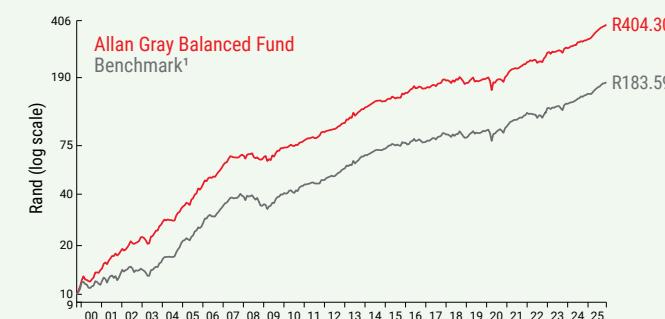

The Fund has created wealth for its long-term investors. Since inception and over the latest 10- and five-year periods, the Fund has outperformed its benchmark. The Fund experiences periods of underperformance in pursuit of its objective of creating long-term wealth for investors, without taking on greater risk of loss than the average balanced fund.

Fund information on 31 December 2025

Fund size	R242.3bn
Number of units	609 038 235
Price (net asset value per unit)	R192.26

Annual management fee

Allan Gray charges a fee based on the net asset value of the Fund excluding the portion invested in Orbis funds. The fee rate is calculated daily by comparing the Fund's total performance over the last two years, to that of the benchmark.

Fee for performance equal to the Fund's benchmark: 1.00% p.a. excl. VAT

For each percentage of two-year performance above or below the benchmark we add or deduct 0.1%, subject to the following limits:

Maximum fee: 1.50% p.a. excl. VAT

Minimum fee: 0.50% p.a. excl. VAT

This means that Allan Gray shares in approximately 20% of annualised performance relative to the benchmark.

A portion of the Fund may be invested in Orbis funds. Orbis charges performance-based fees within these funds that are calculated based on each Orbis fund's performance relative to its own benchmark. Orbis pays a marketing and distribution fee to Allan Gray.

Total expense ratio (TER) and transaction costs

The annual management fees charged by both Allan Gray and Orbis are included in the TER. The TER is a measure of the actual expenses incurred by the Fund over a one and three-year period (annualised). Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns (refer to page 4 for further information). Transaction costs are disclosed separately.

Top 10 share holdings on 31 December 2025 (SA and Foreign) (updated quarterly)⁷

Company	% of portfolio
AB InBev	4.1
Naspers & Prosus	3.6
AngloGold Ashanti	3.1
Glencore	2.8
British American Tobacco	2.6
Standard Bank	2.3
Nedbank	2.0
The Walt Disney Company	1.7
Woolworths	1.6
Remgro	1.5
Total (%)	25.2

Asset allocation on 31 December 2025⁷

Asset class	Total	South Africa	Foreign
Net equities	65.8	39.0	26.8
Hedged equities	9.3	3.5	5.8
Property	1.2	0.2	1.0
Commodity-linked	3.6	3.1	0.4
Bonds	15.6	11.0	4.6

Total (%)	100.0	60.3	39.7⁹

7. Underlying holdings of foreign funds are included on a look-through basis.

8. Includes the impact of any currency hedging.

9. The Fund can invest a maximum of 45% offshore. Market movements may periodically cause the Fund to move beyond these limits. This must be corrected within 12 months.

Total expense ratio (TER) and transaction costs for periods ending 31 December 2025 (updated quarterly)

1- and 3-year TER and transaction costs breakdown	1yr %	3yr %
Total expense ratio	1.55	1.64
Fee for benchmark performance	1.02	1.02
Performance fees	0.37	0.44
Other costs excluding transaction costs	0.04	0.04
VAT	0.12	0.14
Transaction costs (including VAT)	0.07	0.06
Total investment charge	1.62	1.70

Since inception, the Fund's month-end net equity exposure has varied as follows:

Minimum	49.3% (February 2000)
Average	63.4%
Maximum	72.9% (May 2021)

Note: There may be slight discrepancies in the totals due to rounding.

The Fund delivered 24% in 2025, outperforming its benchmark by 5%. Over the last three years, the Fund has achieved an annualised return of 16% compared to an inflation rate of 4%. Some investors may prefer to think in hard currency. With the rand relatively strong, US dollar returns have been very healthy at 41% over one year and 17% per annum over three years. These results were supported by robust returns from both local and global markets. Pleasingly, the Fund kept pace, outperforming its peers, with its offshore exposure making a particularly helpful contribution over the year. It is important to remember that such outcomes are well ahead of long-term averages, so a degree of caution and moderation of expectations is warranted.

A key feature of the local market's strength in 2025 was its narrowness. Index performance was driven by a handful of shares rather than broad-based gains. Gold and platinum mining companies were notable winners, benefiting from exceptionally strong precious metal prices. This strength is at least partly the result of speculative buying, which could reverse. A striking development is that these mining shares now account for roughly a quarter of the FTSE/JSE All Share Index, so further gains or a reversal in these shares would have an outsized impact. However, the market's narrow performance is a source of some concern. Our approach has been to take profits in some areas that have done exceptionally well. At the end of the year, the weight of South African gold and platinum mining shares was 14% of South African equities, or 6% of the Fund as a whole. In our view, this remains a sizeable exposure to further upside while limiting downside risk. Another aspect of this narrow performance is that, despite the index being near record highs, many local shares have performed poorly. With valuations in several areas of the market now well below their historical averages, this is where we are finding more opportunities.

Alongside the bull market in precious metals, the other important story in South African financial markets in 2025 was the exceptional strength of the local bond market. Compared to two years ago, the contrast is stark: At that time, both local and foreign investors were decidedly sceptical about South African bonds as the country faced the uncertainty of looming national elections, weak economic growth and severe loadshedding. Since the May 2024 elections, South Africa has been among the top-performing bond markets globally, with the FTSE/JSE All Bond Index returning 44% over this period. South African bonds have rerated significantly versus our emerging market peers, such as Brazil. We think that the balance of risk in the bond market is now to the downside, and therefore, we prefer an allocation to local shares over local bonds.

Global markets also ended 2025 on a strong note, and the Fund's offshore holdings contributed positively to relative performance. While global equity markets as a whole appear expensive, this masks a wide dispersion: A number of businesses we own still trade at levels we regard as attractive. As a result, the Fund's global equity portfolio bears little resemblance to the broad market – a deliberate choice that may allow us to deliver better long-term outcomes than the index but with a different pattern of risk along the way. Elevated starting valuations in major markets, however, limit the scope for high returns in the future. In our view, global bonds do not yet offer compelling compensation for the risks, particularly given the possibility that inflation may prove to be more persistent than markets currently expect.

During the quarter, we added to the Fund's positions in AB InBev and Naspers and reduced its exposure to Prosus and the platinum-linked ETF.

Information and content

The information in and content of this publication are provided by Allan Gray as general information about the company and its products and services. Allan Gray does not guarantee the suitability or potential value of any information or particular investment source. The information provided is not intended to, nor does it constitute financial, tax, legal, investment or other advice. Before making any decision or taking any action regarding your finances, you should consult a qualified financial adviser. Nothing contained in this publication constitutes a solicitation, recommendation, endorsement or offer by Allan Gray; it is merely an invitation to do business. Allan Gray has taken and will continue to take care that all information provided, in so far as this is under its control, is true and correct. However, Allan Gray shall not be responsible for and therefore disclaims any liability for any loss, liability, damage (whether direct or consequential) or expense of any nature whatsoever which may be suffered as a result of or which may be attributable, directly or indirectly, to the use of or reliance on any information provided. Allan Gray is an authorised financial services provider.

Management Company

Allan Gray Unit Trust Management (RF) (Pty) Ltd (the "Management Company") is registered as a management company under the Collective Investment Schemes Control Act 45 of 2002, in terms of which it operates unit trust portfolios under the Allan Gray Unit Trust Scheme, and is supervised by the Financial Sector Conduct Authority (FSCA). The Management Company is incorporated under the laws of South Africa and has been approved by the regulatory authority of Botswana to market its unit trusts in Botswana, however, it is not supervised or licensed in Botswana. Allan Gray (Pty) Ltd (the "Investment Manager"), an authorised financial services provider, is the appointed investment manager of the Management Company and is a member of the Association for Savings & Investment South Africa (ASISA). The trustee/custodian of the Allan Gray Unit Trust Scheme is Rand Merchant Bank, a division of FirstRand Bank Limited. The trustee/custodian can be contacted at RMB Custody and Trustee Services: Tel: +27 (0)11 301 6335 or www.rmb.co.za.

Performance

Collective investment schemes in securities (unit trusts or funds) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. Movements in exchange rates may also cause the value of underlying international investments to go up or down. The Management Company does not provide any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. Actual investor performance may differ as a result of the investment date, the date of reinvestment and dividend withholding tax.

Fund mandate

Funds may be closed to new investments at any time in order to be managed according to their mandates. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The funds may borrow up to 10% of their market value to bridge insufficient liquidity.

Unit price

Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the Fund, including any income accruals and less any permissible deductions from the Fund, divided by the number of units in issue. Forward pricing is used and fund valuations take place at approximately 16:00 each business day. Purchase and redemption requests must be received by the Management Company by 14:00 each business day to receive that day's price. Unit trust prices are available daily on www.allangray.co.za.

Fees

Permissible deductions may include management fees, brokerage, securities transfer tax, auditor's fees, bank charges and trustee fees. A schedule of fees, charges and maximum commissions is available on request from Allan Gray. For more information about our annual management fees, refer to the [frequently asked questions](#), available via the Allan Gray website.

Compliance with Regulation 28

The Fund is managed to comply with Regulation 28 of the Pension Funds Act 24 of 1956 (the "Pension Funds Act"). Exposures in excess of the limits will be corrected immediately, except where due to a change in the fair value or characteristic of an asset, e.g. market value fluctuations, in which case they will be corrected within the prescribed regulatory time period. The Management Company does not monitor compliance by retirement funds with section 19(4) of the Pension Funds Act (item 6 of Table 1 to Regulation 28).

Important information for investors

Total expense ratio (TER) and transaction costs

The total expense ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past one- and three-year periods. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged), VAT and other expenses like audit and trustee fees. Transaction costs (including brokerage, securities transfer tax, Share Transactions Totally Electronic (STRATE) and FSCA Investor Protection Levy and VAT thereon) are shown separately. Transaction costs are necessary costs in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager, and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns. As unit trust expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money. The sum of the TER and transaction costs is shown as the total investment charge (TIC).

Foreign securities

The Fund invests in foreign securities. Depending on their markets, trading in those securities may carry risks relating to, among others, macroeconomic and political circumstances, constraints on liquidity or the repatriation of funds, foreign exchange rate fluctuations, taxation and trade settlement.
