 Interest 76.52

Annual Management Fee: Performance fee orientated to outperformance of the All Bond Index over a one-year rolling period. The limits are 0.285 - 0.855% p.a. (incl. VAT)

Commentary

The Fund's 12-month return was 6.7% compared to 7.5% of the All Bond Index. The yield curve has continued to invert as the SARB has progressively raised short-term interest rates. The portfolio is focused on the short and middle areas of the yield curve. It does not include any of the very long bonds which the managers regard as relatively expensive.

Collective Investment Schemes in Securities (unit trusts) are generally medium- to long-term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit trust prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accrual and less any permissible deductions from the portfolio. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request from Allan Gray Unit Trust Management Limited. Commission and incentives may be paid and if so, would be included in the overall costs. Forward pricing is used. All of the unit trusts may be capped at any time in order for them to be managed in accordance with their mandates. Member of the ACI.
