

FUND DETAILS AT 31 JANUARY 2009

Sector: Domestic - Fixed Interest - Bond
Inception date: 1 October 2004
Fund managers: Sandy McGregor, Andrew Lapping

Fund objective:

The objective of the Fund is to provide investors with a return superior to the All Bond Index, at no greater risk, over an interest rate cycle. The Fund will seek to preserve at least the nominal value of investors' capital.

Suitable for those investors who:

- Are looking for returns in excess of that provided by money market or cash investments.
- Seek a bond 'building block' for a diversified multi-asset class portfolio.
- Are prepared to accept some risk of capital depreciation in exchange for the prospect of earning increased returns.
- Want to draw a regular income stream without consuming capital.

Compliance with Prudential Investment Guidelines:

Retirement funds: The Portfolio is managed to comply with the limits of Annexure A to Regulation 28 of the Pension Funds Act. Exposures in excess of the limits will be corrected immediately, except where due to market value fluctuations or capital withdrawals, in which case they will be corrected within a reasonable time period. Allan Gray Unit Trust Management Limited does not monitor compliance by retirement funds with section 19(4) of the Pension Funds Act (item 9 of Annexure A to Regulation 28).

Income distribution: 01/01/08 - 31/12/08 (cents per unit) Total 93.68
Distributes quarterly.

Annual management fee:

The annual management fee rate is dependent on the return of the Fund relative to its benchmark, the BEASSA Total Return All Bond Index (adjusted for fund expenses and cash flows) over a rolling one-year period. The fee hurdle (above which a fee greater than the minimum fee of 0.25% is charged) is performance equal to the benchmark. The manager's sharing rate is 25% of the outperformance of the benchmark over a rolling one-year period with a maximum fee of 0.75% (excl. VAT) per annum.

COMMENTARY

We believe inflation will fall significantly in 2009, as a result of a collapse in commodity prices and recessionary conditions in South Africa. The Reserve Bank has already cut interest rates by 1.5% and further cuts are likely. The bond market is already discounting a big cut in rates. Accordingly we believe there is more value in short-dated assets than in long bonds. There are also significant risks to long bonds due to an increasing fiscal deficit. The Fund's portfolio remains concentrated in shorter duration assets which offer higher yields, but less risk.

0.89%	0.00%	0.50%	0.29%	0.10%

³A Total Expense Ratio (TER) is a measure of a portfolio's assets that are relinquished as operating expenses. The total operating expenses are expressed as a percentage of the average value of the portfolio, calculated for the year to the end of December 2008. Included in the TER is the proportion of costs that are incurred by the performance component, fee at benchmark, trading costs (including brokerage, VAT, STT, STRATE and insider trading levy) and other expenses. These are disclosed separately as percentages of the net asset value. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. The information provided is applicable to class A units.
