

Fund description and summary of investment policy

The Fund invests in South African interest bearing securities. Securities include national government, parastatal, municipal, corporate bonds and money market instruments. The Fund price is sensitive to interest rate movements because of the long-term nature of the Fund's investments. The duration of the Fund may differ materially from the benchmark. The Fund is managed to comply with investment limits governing retirement funds.

ASISA unit trust category: South African – Interest Bearing – Variable Term

Fund objective and benchmark

The Bond Fund's goal is to deliver returns that exceed inflation and cash over the long term, without taking on undue risk. The Fund's benchmark is the FTSE/JSE All Bond Index.

How we aim to achieve the Fund's objective

We try to balance credit risk, duration risk and liquidity risk when selecting investments. We target total returns for investors rather than trying to mirror the returns of the FTSE/JSE All Bond Index. When we cannot find value in the bond markets, our portfolio will be weighted towards cash to get better returns.

Suitable for those investors who

- Seek a bond 'building block' for a diversified multi-asset class portfolio
- Are looking for returns in excess of those provided by money market or cash investments
- Are prepared to accept more risk of capital depreciation than in a money market or cash investment

Minimum investment amounts*

Initial lump sum per investor account	R50 000
Additional lump sum	R1 000
Debit order**	R1 000

*Lower minimum investment amounts apply for investments in the name of an investor younger than 18. Please refer to our website for more information.

**Only available to investors with a South African bank account.

Fund information on 30 June 2022

Fund size	R6.3bn
Number of units	569 682 724
Price (net asset value per unit)	R10.46
Modified duration	5.7
Gross yield (before fees)	10.7
Class	A

1. FTSE/JSE All Bond Index (source: IRESS), performance as calculated by Allan Gray as at 30 June 2022.
2. This is based on the latest available numbers published by IRESS as at 31 May 2022.
3. Maximum percentage decline over any period. The maximum drawdown occurred from 27 February 2020 to 24 March 2020 and maximum benchmark drawdown occurred from 26 February 2020 to 23 March 2020. Drawdown is calculated on the total return of the Fund/benchmark (i.e. including income).
4. The percentage of calendar months in which the Fund produced a positive monthly return since inception.
5. The standard deviation of the Fund's monthly return. This is a measure of how much an investment's return varies from its average over time.
6. These are the highest or lowest consecutive 12-month returns since inception. This is a measure of how much the Fund and the benchmark returns have varied per rolling 12-month period. The Fund's highest annual return occurred during the 12 months ended 31 January 2015 and the benchmark's occurred during the 12 months ended 31 January 2015. The Fund's lowest annual return occurred during the 12 months ended 31 January 2016 and the benchmark's occurred during the 12 months ended 31 January 2016. All rolling 12-month figures for the Fund and the benchmark are available from our Client Service Centre on request.

Performance net of all fees and expenses

Value of R10 invested at inception with all distributions reinvested

% Returns	Fund	Benchmark ¹	CPI inflation ²
Cumulative:			
Since inception (1 October 2004)	332.1	310.4	159.0
Annualised:			
Since inception (1 October 2004)	8.6	8.3	5.5
Latest 10 years	7.6	7.2	5.1
Latest 5 years	7.8	7.8	4.5
Latest 3 years	5.5	5.8	4.6
Latest 2 years	6.1	7.3	5.9
Latest 1 year	1.6	1.3	6.5
Year-to-date (not annualised)	-2.1	-1.9	3.7
Risk measures (since inception)			
Maximum drawdown ³	-18.9	-19.3	n/a
Percentage positive months ⁴	71.8	68.5	n/a
Annualised monthly volatility ⁵	5.9	7.4	n/a
Highest annual return ⁶	18.0	21.2	n/a
Lowest annual return ⁶	-2.6	-5.6	n/a

Meeting the Fund objective

Since inception and over the latest 10-year period, the Fund has outperformed its benchmark. Over the last five-year period, the Fund has performed in line with its benchmark. The Fund has provided returns in excess of CPI inflation for all three periods. The Fund aims to take no greater risk than its benchmark. The maximum drawdown and lowest annual return numbers, in the 'Performance net of all fees and expenses' table, show that the Fund has successfully reduced downside risk in periods of negative market returns.

Income distributions for the last 12 months

Actual payout, the Fund distributes quarterly	30 Sep 2021	31 Dec 2021	31 Mar 2022	30 Jun 2022
Cents per unit	23.8985	24.6430	23.9256	24.5459

Annual management fee

A fixed fee of 0.5% p.a. excl. VAT

Total expense ratio (TER) and transaction costs

The annual management fee is included in the TER. The TER is a measure of the actual expenses incurred by the Fund over a one and three-year period (annualised). Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns (refer to page 4 for further information). Transaction costs are disclosed separately.

TER and transaction costs breakdown for the 1- and 3-year period ending 30 June 2022	1yr %	3yr %
Total expense ratio	0.47	0.46
Fee for benchmark performance*	0.40	0.30
Performance fees*	0.00	0.09
Other costs excluding transaction costs	0.01	0.01
VAT	0.06	0.06
Transaction costs (including VAT)	0.00	0.00
Total investment charge	0.47	0.46

*On 1 December 2021, the Fund's annual management fee changed from the previous performance-based fee to the current fixed fee of 0.5% p.a. excl. VAT.

Maturity profile on 30 June 2022

Note: There may be slight discrepancies in the totals due to rounding.

With the ongoing Russia-Ukraine conflict and supply chain disruptions, as a result of both the war and the COVID-19 pandemic, global inflation has continued to rise and spread. As a consequence, the quarter saw a flurry of central bank activity as monetary authorities sought to rein in inflation, which has risen to multi-decade highs in some cases. Not only have central banks sprung into action, but they have actually been accelerating their interventions: The US Federal Reserve stepped up its interest rate hikes from 50 basis points in May to 75 basis points in June; the European Central Bank signalled an end to its bond-buying programme by the end of June and an interest rate hike in July. Not one to be left behind, the South African Reserve Bank stepped up its interest rate increments from 25 basis points earlier in the year to 50 basis points in May. A notable exception was the Bank of Japan, which reiterated its commitment to negative interest rates and further bond buying. Against this backdrop of quickening central bank action, there are valid concerns that developed country policymakers have been too tardy – and that their unavoidable, aggressive actions now may trigger a global recession.

This quarter, South Africa faced its fair share of misfortune, with KwaZulu-Natal being hit by severe flooding in April and again in May. The loss of lives and livelihoods, infrastructure damage, relocation of displaced families, rebuilding costs and port disruptions are all major setbacks for the country, given that the economy has yet to fully recover from the pandemic. South Africans were

understandably concerned about flood relief being stolen, given past experience with emergency COVID-19 spending. Disappointingly, this jaundiced view was almost immediately vindicated by reports of municipal officials attempting to appropriate donated relief supplies and a water tanker being diverted to the provincial premier's private residence instead of serving the disaster-stricken community. Interestingly, the eThekweni Municipality held its inaugural bond auction towards the end of May; it was a poor auction, with only one anchor bidder taking up the entire R1 billion on offer.

Attractively priced opportunities remain few and far between in the local credit market, with spreads still tight by longer-term historical standards. During the quarter, we sold inflation-linked bonds after yields compressed to expensive levels. While these instruments may be attractive in a high-inflation environment, they have a higher duration than their nominal equivalents and are more vulnerable to a correction in yields. Nominal bonds are currently offering similar real yields to inflation-linked bonds, but with lower duration risk and better liquidity. The duration of the Fund is 0.5 less than that of the FTSE/JSE All Bond Index.

Information and content

The information in and content of this publication are provided by Allan Gray as general information about the company and its products and services. Allan Gray does not guarantee the suitability or potential value of any information or particular investment source. The information provided is not intended to, nor does it constitute financial, tax, legal, investment or other advice. Before making any decision or taking any action regarding your finances, you should consult a qualified financial adviser. Nothing contained in this publication constitutes a solicitation, recommendation, endorsement or offer by Allan Gray; it is merely an invitation to do business.

Allan Gray has taken and will continue to take care that all information provided, in so far as this is under its control, is true and correct. However, Allan Gray shall not be responsible for and therefore disclaims any liability for any loss, liability, damage (whether direct or consequential) or expense of any nature whatsoever which may be suffered as a result of or which may be attributable, directly or indirectly, to the use of or reliance on any information provided.

Allan Gray is an authorised financial services provider.

Management Company

Allan Gray Unit Trust Management (RF) (Pty) Ltd (the "Management Company") is registered as a management company under the Collective Investment Schemes Control Act 45 of 2002, in terms of which it operates unit trust portfolios under the Allan Gray Unit Trust Scheme, and is supervised by the Financial Sector Conduct Authority (FSCA). The Management Company is incorporated under the laws of South Africa and has been approved by the regulatory authority of Botswana to market its unit trusts in Botswana, however, it is not supervised or licensed in Botswana. Allan Gray (Pty) Ltd (the "Investment Manager"), an authorised financial services provider, is the appointed investment manager of the Management Company and is a member of the Association for Savings & Investment South Africa (ASISA).

The trustee/custodian of the Allan Gray Unit Trust Scheme is Rand Merchant Bank, a division of FirstRand Bank Limited. The trustee/custodian can be contacted at RMB Custody and Trustee Services: Tel: +27 (0)11 301 6335 or www.rmb.co.za.

Performance

Collective investment schemes in securities (unit trusts or funds) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. The Management Company does not provide any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. Actual investor performance may differ as a result of the investment date, the date of reinvestment and applicable taxes.

Fund mandate

Funds may be closed to new investments at any time in order to be managed according to their mandates. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The funds may borrow up to 10% of their market value to bridge insufficient liquidity.

Unit price

Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the Fund, including any income accruals and less any permissible deductions from the Fund, divided by the number of units in issue. Forward pricing is used and fund valuations take place at approximately 16:00 each business day. Purchase and redemption requests must be received by the Management Company by 14:00 each business day to receive that day's price. Unit trust prices are available daily on www.allangray.co.za.

Yield

The Allan Gray Bond Fund yield is current, calculated as at month-end.

Fees

Permissible deductions may include management fees, brokerage, securities transfer tax, auditor's fees, bank charges and trustee fees. A schedule of fees, charges and maximum commissions is available on request from Allan Gray.

Total expense ratio (TER) and transaction costs

The total expense ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past one- and three-year periods. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged), VAT and other expenses like audit and trustee fees. Transaction costs (including brokerage, securities transfer tax, Share Transactions Totally Electronic (STRATE) and FSCA Investor Protection Levy and VAT thereon) are shown separately. Transaction costs are necessary costs in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager, and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns. As unit trust expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money. The sum of the TER and transaction costs is shown as the total investment charge (TIC).

Compliance with Regulation 28

The Fund is managed to comply with Regulation 28 of the Pension Funds Act 24 of 1956. Exposures in excess of the limits will be corrected immediately, except where due to a change in the fair value or characteristic of an asset, e.g. market value fluctuations, in which case they will be corrected within a reasonable time period. The Management Company does not monitor compliance by retirement funds with section 19(4) of the Pension Funds Act (item 6 of Table 1 to Regulation 28).

FTSE/JSE All Bond Index

The FTSE/JSE All Bond Index is calculated by FTSE International Limited ("FTSE") in conjunction with the JSE Limited ("JSE") in accordance with standard criteria. The FTSE/JSE All Bond Index is the proprietary information of FTSE and the JSE. All copyright subsisting in the FTSE/JSE All Bond Index values and constituent lists vests in FTSE and the JSE jointly.
