Annual Management Fee: The monthly charge rate is directly related to the rolling two-year return of the fund compared with that of its benchmark. The limits are 0-3.42% p.a. (incl. VAT).

Commentary

As the table below indicates, the Fund continues to be overweight in Industrial shares. Many industrial shares are trading on attractive multiples on depressed earnings and provide the opportunity for superior long-term returns. Retail shares in particular are very attractively priced with the Fund owning large positions in Woolworths, Foschini and Edgars. The Fund's underweight position in resource shares has reduced as some shares have derated to more attractive levels. The overall market is now considered to offer good long-term value. The Fund's recent quarterly report, which is available by e-mail or via the website, describes in more detail our investment outlook.

Unit trusts are generally medium to long term investments. The value of units may go down as well as up and past performance is not necessarily a guide to the future. Unit trusts are traded at ruling prices. Different classes of units apply to this Fund and are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available on request from the company/scheme. Commission and incentives may be paid and if so, would be included in the overall costs.
