

ALLAN GRAY EQUITY FUND

Fact sheet at 31 October 2007

Sector: Domestic - Equity - General
Inception Date: 1 October 1998
Fund Managers: Stephen Mildenhall, Arjen Lugtenburg, Duncan Artus, Ian Liddle, Delphine Govender, Orbis Investment Management Limited

The Fund aims to earn a higher total rate of return than that of the average of the South African equity market as represented by the FTSE/JSE All Share Index, including income without assuming greater risk.

Fund Details

Price: 17 584.26 cents
Size: R 19 218 121 474
Minimum lump sum: R 10 000
Minimum monthly: R 500
Subsequent lump sums: R 500
No. of share holdings: 42
Income distribution: Bi-annually
01/07/03-30/06/04 dividend(cpu): Total 25.79: Interest 0.65, Dividend 25.14

Annual management fee:

The annual management fee rate is dependent on the return of the Fund relative to its benchmark, the FTSE/JSE All Share Index (adjusted for fund expenses and cash flows), over a rolling two-year period. The fee hurdle (above which a fee greater than the minimum fee of 0% is charged) is performance equal to the benchmark minus 15%. For performance equal to the benchmark a fee of 1.5% (excl.VAT) per annum is payable. The manager's sharing rate is 10% of the under- and outperformance of the benchmark over a rolling two-year period and a maximum fee of 3% (excl.VAT) applies.

Total Expense Ratio*

Total Expense Ratio	Included in TER			
	Trading Costs	Performance Component	Fee at Benchmark	Other Expenses
3.56%	0.15%	1.70%	1.71%	0.00%

*A Total Expense Ratio (TER) is a measure of a portfolio's assets that are relinquished as operating expenses (incl. VAT). It is expressed as a percentage of the average value of the portfolio, calculated for the year to the end of June 2007. Included in the TER is the proportion of costs that are incurred in the performance component and trading costs. These are disclosed separately as percentages of the net asset value.

Commentary

The Fund has returned 32.5% over the last year and 34.3% p.a. over the last five years. This has been an exceptional period for South African equities. While the Fund has delivered outperformance over the last five years it has lagged the return of the benchmark FTSE/JSE All Share Index over the last year. After an extended period of strong equity returns by the market it is not unusual for disparity within the market to diverge with parts of the market becoming extremely overvalued. We have previously discussed the types of investments that we are finding attractive in what is now an expensive overall market. SAB, MTN, Remgro and Richemont are the Fund's largest holdings. They are all high quality companies with good management whose earnings are likely to outperform the market and which can still be acquired at reasonably attractive prices. The Fund is however very underweight cyclical companies whose earnings are now at extremely high levels. While their earnings may go higher in the short-term, we believe that they are likely to substantially underperform the earnings growth of the Fund's holdings over the medium-term. Should these shares move from expensive to irrational levels the Fund may very well underperform its benchmark in the short-term. As you know, in terms of our investment philosophy which we have consistently applied over the last 34 years, we are willing to accept short-term underperformance by being different to the benchmark and by not buying shares that are trading above their underlying intrinsic value even if they could rise further in the short-term. This philosophy reduces the risk of capital loss and enables the Fund to take advantage of the opportunities for long-term outperformance that arise during times like this. While overall market levels imply much lower future return prospects for all equities we remain confident of our ability to outperform the benchmark index and through our proprietary fundamental research continue to find investments that should generate attractive long-term returns for our investors without assuming greater risk than the market.

Top 10 Share Holdings at 30 September 2007*

JSE Code	Company	% of portfolio
SAB	SAB	9.6
MTN	MTN Group	9.2
REM	Remgro	9.1

The FTSE/JSE All Share Index is calculated by FTSE International Limited ("FTSE") in conjunction with the JSE Limited ("JSE") in accordance with standard criteria. The FTSE/JSE Africa Series is the proprietary information of FTSE and the JSE. All copyright subsisting in the FTSE/JSE All Share Index values and constituent lists vests in FTSE and the JSE jointly. All their rights are reserved. Collective Investment Schemes in Securities (unit trusts) are generally medium to long-term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accrual and less any permissible deductions from the portfolio divided by the number of units in issue. Declaration of income accruals are made bi-annually. Different classes of units apply to the Fund and are subject to different fees and charges. Fund valuations take place at approximately 16h00 each business day. Purchase and repurchase requests may be received by the manager by 14h00 each business day. Performance figures from Allan Gray Limited (GIPS compliant) are for lump sum investments using net asset value prices with income distributions reinvested. Permissible deductions may include management fees, brokerage, UST, auditor's fees, bank charges, trustee fees and RSC levies. The Fund may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees and charges and maximum commissions is available on request from Allan Gray Unit Trust Management Limited. Commission and incentives may be paid and if so, would be included in the overall costs. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. Forward pricing is used. This Fund may be capped at any time in order to be managed in accordance with the mandate. Member of the ACI. Total Expense Ratio (TER): When investing, costs are only a part of an investment decision. The investment objective of the Fund should be compared with the investor's objective and then the performance of the investment and whether it represents value for money should be evaluated as part of the financial planning process. All Allan Gray performance figures and values are quoted after the deduction of costs incurred within the Fund so the TER is not a new cost. A high TER will not necessarily imply a poor return nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. The Portfolio is managed to comply with the individual asset class limits of Annexure A to Regulation 28 of the Pension Funds Act. Exposures in excess of the limits will be corrected immediately except where due to market value fluctuations or capital withdrawals in which case they will be corrected within a reasonable time period. Allan Gray Unit Trust Management Limited does not monitor compliance by retirement funds with section 19(4) of the Pension Funds Act (item 9 of Annexure A to Regulation 28).
