

FUND DETAILS AT 31 MAY 2009

Sector: Domestic - Equity - General
Inception date: 1 October 1998
Fund managers: Ian Liddle, Duncan Artus, Delphine Govender, Andrew Lapping, Simon Raubenheimer

Fund objective:

The Fund aims to earn a higher total rate of return than that of the average of the South African equity market as represented by the FTSE/JSE All Share Index, including income, without assuming greater risk.

Suitable for those investors who:

- Seek long-term wealth creation.
- Are comfortable with market fluctuation i.e. short-term volatility.
- Typically have an investment horizon of five years plus.
- Seek an equity 'building block' for a diversified multi-asset class portfolio.

Price: R 137.58
Size: R 16 470 m
Minimum lump sum per investor account: R 20 000
Minimum lump sum per fund: R 5 000
Additional lump sum per fund: R 500
No. of share holdings: 57
Income distribution: 01/04/08 - 31/03/09 (cents per unit) Total 1465.25

Distributes bi-annually. To the extent that the total expenses exceed the income earned in the form of dividends and interest, the Fund will not make a distribution.

Income distributions are higher than normal because the Fund was a shareholder of Remgro and Richemont when they unbundled in October 2008. For more information about this, please contact our Client Service Centre or refer to our website, details of which are below.

Annual management fee:

The annual management fee rate is dependent on the return of the Fund relative to its benchmark, the FTSE/JSE All Share Index including income (adjusted for Fund expenses and cash flows), over a rolling two-year period. The fee hurdle (above which a fee greater than the minimum fee of 0% is charged) is performance equal to the benchmark minus 15%. For performance equal to the benchmark a fee of 1.5% (excl.VAT) per annum is payable. The manager's sharing rate is 10% of the under- and outperformance of the benchmark over a rolling two-year period and a maximum fee of 3% (excl.VAT) applies.

COMMENTARY

Investors around the world have been rediscovering their appetite for risk as they begin to perceive the 'green shoots' of economic recovery. The jury is still out on whether these supposed 'green shoots' herald a return to sustainable growth, or are merely a stabilisation of economic activity at current levels.

This growing risk appetite has manifested itself in rapidly rising prices for 'risk' assets such as emerging market shares and currencies. The South African stock market and the rand have been particularly strong. The FTSE/JSE All Share Index has risen by more than 50% in US dollar terms over the last three months. Indeed, it has now recovered all the way back to its November 2007 record high relative to global stock market indices.

The Fund contains a number of cyclical stocks (such as Sappi and Mondi), which are up substantially off their March lows. But the bias of the Fund leans towards the more defensive, high quality, non-cyclical companies such as SABMiller, MTN and British American Tobacco. Not surprisingly therefore, the Fund has lagged the market advance over the last three months.

The strength in the rand may be partly owing to recent lumpy capital inflows into South Africa, such as the sale of 15% of Vodacom to Vodafone, and the sale of Anglo American's last remaining stake in AngloGold Ashanti. If the proposed MTN - Bharti transaction were to be executed, it would result in a further significant inflow into South Africa.

However, we believe that the probabilities favour a weaker rand in the fullness of time and we use a weaker rand exchange rate when estimating the normal earnings power of South African mines and exporters.

TOTAL EXPENSE RATIO FOR THE YEAR ENDED 31 MARCH 2009²

Total expense ratio	Included in TER			
	Trading costs	Performance component	Fee at benchmark	Other expenses
2.68%	0.12%	0.84%	1.71%	0.01%

²A Total Expense Ratio (TER) is a measure of a portfolio's assets that are relinquished as operating expenses. The total operating expenses are expressed as a percentage of the average value of the portfolio, calculated for the year to the end of March 2009. Included in the TER is the proportion of costs that are incurred by the performance component, fee at benchmark, trading costs (including brokerage, VAT, STT, STRATE and insider trading levy) and other expenses. These are disclosed separately as percentages of the net asset value. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. The information provided is applicable to class A units.

SECTOR ALLOCATION AT 31 MARCH 2009³

Sector	% of portfolio	ALSI
Oil & gas	8.1	6.3

⁵ Maximum percentage decline over any period.

Collective Investment Schemes in Securities (unit trusts) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to the future. Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio divided by the number of units in issue. Declaration of income accruals are made bi-annually. Purchase and redemption requests must be received by the manager by 14:00 each business day and fund valuations take place at approximately 16:00 each business day. Forward pricing is therefore used. Performance figures are from Allan Gray Limited (GIPS compliant) and are for lump sum investments with income distributions reinvested. Permissible deductions may include management fees, brokerage, STT, auditor's fees, bank charges, trustee fees and RSC levies. The Fund may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees and charges and maximum commissions is available on request from the manager. Commission and incentives may be paid and if so, would be included in the overall costs. The Fund may be closed to new investments at any time in order to be managed in accordance with its mandate. The manager is a member of the Association for Savings & Investment SA (ASISA). Total Expense Ratio (TER): When investing, costs are only a part of an investment decision. The investment objective of the Fund should be compared with the investor's objective and then the performance of the investment and whether it represents value for money should be evaluated as part of the financial planning process. All Allan Gray performance figures and values are quoted after the deduction of costs incurred within the Fund so the TER is not a new cost. The FTSE/JSE All Share Index is calculated by FTSE International Limited ("FTSE") in conjunction with the JSE Limited ("JSE") in accordance with standard criteria. The FTSE/JSE Africa Series is the proprietary information of FTSE and the JSE. All copyright subsisting in the FTSE/JSE All Share Index values and constituent lists vests in FTSE and the JSE jointly. All their rights are reserved. Compliance with Prudential Investment Guidelines: Retirement Funds: The Portfolio is managed to comply with the limits of Annexure A to Regulation 28 of the Pension Funds Act, except for the overall/total equity distribution limit, due to it being an equity portfolio. Exposures in excess of the limits will be corrected immediately except where due to market value fluctuations or capital withdrawals whereby it will be corrected within a reasonable time period. Allan Gray Unit Trust Management Limited does not monitor compliance by retirement funds with section 19(4) of the Pension Funds Act (item 9 of Annexure A to Regulation 28.)
