ALLANGRAY

FUND DETAILS AT 31 JULY 2010		
Sector:	Domestic - Equity - General	
Inception date:	1 October 1998	
Fund managers:	Ian Liddle, Duncan Artus, Delphine Govender,	
	Andrew Lapping, Simon Raubenheimer	
Fund objective:		

The Fund aims to earn a higher total rate of return than that of the average of the South African equity market as represented by the FTSE/JSE All Share Index, including income, without assuming greater risk.

Suitable for those investors who:

- Seek long-term wealth creation

- Are comfortable with market fluctuation i.e. short-term volatility - Typically have an investment horizon of five years plus
- Seek an equity 'building block' for a diversified multi-asset class portfolio

Price:	R 170.01
Size:	R 22 834 m
Minimum lump sum per investor account:	R20 000
Minimum lump sum per fund:	R5 000
Minimum debit order per fund:	R 500
Additional lump sum per fund:	R 500
No. of share holdings:	78

Income distribution: 01/07/09 - 30/06/10 (cents per unit)

Distributes bi-annually. To the extent that the total expenses exceed the income earned in the form of dividends and interest, the Fund will not make a distribution.

Total 0.00

Annual management fee:

The annual management fee rate is dependent on the return of the Fund relative to its benchmark, the FTSE/JSE All Share Index including income (adjusted for Fund expenses and cash flows), over a rolling two-year period. The fee hurdle (above which a fee greater than the minimum fee of 0% is charged) is performance equal to the benchmark minus 15%. For performance equal to the benchmark a fee of 1.5% (excl.VAT) per annum is payable. The manager's sharing rate is 10% of the out- and underperformance of the benchmark over a rolling two-year period and a maximum fee of 3% (excl.VAT) applies.

COMMENTARY

We strive to act with conviction when our research leads us to believe that a share is significantly undervalued. This can result in our clients collectively owning close to 25% of a company (and in rarer cases up to 30%).

Some worry that a significant shareholding in a listed company is somehow more risky than a relatively smaller position in the same company as it may prove difficult to sell that holding one day. Our experience suggests otherwise - on a number of occasions over the last decade we have been presented with the opportunity to sell our clients' entire stake in a listed company in one transaction. The recent offer made for Didata by NTT is the latest such example.

We believe that the key determinant of the risk one takes in buying a share is the price one pays. If the price one pays is too high, then the risk (of losing money) is high and vice versa if the price one pays is below intrinsic value then the risk is lower.

Thus our policy group report written in March 2000 identified Didata as an extremely unattractive and risky investment when its shares were each trading for R57.70. But subsequent reports written in April 2005 and October 2008 identified Didata as an attractive and much less risky investment when its shares were trading at R3.59 and R5.10 respectively. We were thus prepared to buy a significant stake in the company, for which NTT is now offering GBP1.20 per share (R13.68 at current exchange rates).

Of course, things don't always work out so well as they have done with Didata, but when they don't work out so well this usually has much more to do with us overestimating intrinsic value (and thus overpaying or not selling when we should), than it has to do with the size of the position that we establish. We continue to work hard to maximise our Didata-type successes and minimise our mistakes.

3.23%	0.11%	1.40%	1.71%	0.01%

² A Total Expense Ratio (TER) is a measure of a portfolio's assets that are relinquished as operating expenses. The total operating expenses are expressed as a percentage of the average value of the portfolio, calculated for the year to the end of June 2010. Included in the TER is the proportion of costs that are incurred by the performance component, fee at benchmark, trading costs (including brokerage, VAT, STT, STRATE and insider trading levy) and other expenses. These are disclosed separately as percentages of the net asset value. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. The information provided is applicable to class A units

Collective Investment Schemes in Securities (unit trusts) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to the future. Unit trust prices are calculated on a net sexet value basis, which is the total market value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio divided by the number of units in issue. Declaration of income accruals are made bi-annually. Purchase and redemption requests must be received by the manager by 14:00 each business day and fund valuations take place at approximately 16:00 each business day. Forward pricing is therefore used. Performance figures are from Allan Gray Limited (GIPS compliant) and are for lump sum investments with income distributions reinvested. Permissible deductions may include management fees, brokerage, STT, auditor's fees, bank charges and trustee fees. The Fund may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees and charges and maximum commissions is available on request from the manager. Commission and incentives may be paid and if so, would be included in the overall costs. The Fund value of the portion to bridge insufficient liquidity. A schedule of tees and charges and maximum commissions is available on request from the manager. Commission and incentives may be paid and 1 so, would be included in the overall costs. The Hund may be closed to new investments at any time in order to be managed in accordance with its mandate. Total Expense Ratio (TER): When investing, costs are only a part of an investment bidective of the Fund should be compared with the investor's objective and then the performance of the investment and whether it represents value for money should be evaluated as part of the financial planning process. All Allan Gray performance figures and values are quoted after the deduction of costs incurred within the Fund so the TER is not a new cost. The FTSE/JSE All Share Index values and constitutent list vests in FTSE in the USE. Limited ("VSE") in accordance with standard orlieria.
