

Fund description and summary of investment policy

The Fund invests primarily in shares listed on the Johannesburg Stock Exchange (JSE). The Fund can invest a maximum of 45% offshore. The Fund invests the bulk of its foreign allowance in equity funds managed by Orbis Investment Management Limited, our offshore investment partner. The Fund is typically fully invested in shares. Returns are likely to be volatile, especially over short- and medium-term periods.

ASISA unit trust category: South African – Equity – General

Fund objective and benchmark

The Fund aims to create long-term wealth for investors. It aims to outperform the average return of South African General Equity Funds over the long term, without taking on greater risk of loss. To pursue its objective the Fund’s portfolio may differ materially from those of its peers. This will result in the Fund underperforming its benchmark materially at times. The Fund aims to compensate for these periods of underperformance by delivering outperformance over the long term. The Fund’s benchmark is the market value-weighted average return of funds in the South African – Equity – General category (excluding Allan Gray funds).

How we aim to achieve the Fund’s objective

We seek to buy shares offering the best relative value while maintaining a diversified portfolio. We thoroughly research companies to assess their intrinsic value from a long-term perspective. This long-term perspective enables us to buy shares from sellers who over-react to short-term difficulties or undervalue long-term potential. We invest in a selection of shares across all sectors of the stock market, and across the range of large, mid and smaller cap shares.

Suitable for those investors who

- Seek exposure to listed equities to provide long-term capital growth
- Are comfortable with stock market fluctuation, i.e. short- to medium-term volatility
- Are prepared to accept the risk of capital loss
- Typically have an investment horizon of more than five years
- Wish to use the Fund as an equity ‘building block’ in a diversified multi-asset class portfolio

Fund information on 30 November 2025

Fund size	R56.0bn
Number of units	47 335 402
Price (net asset value per unit)	R737.40
Class	A

1. The market value-weighted average return of funds in the South African – Equity – General category, excluding Allan Gray funds. (Effective 1 October 2024, this category started excluding funds that can only invest in South African equities.) Source: Morningstar, performance as calculated by Allan Gray as at 30 November 2025. From inception to 28 February 2015 the benchmark was the FTSE/JSE All Share Index including income. Source: Iress.
2. CPI inflation has been calculated based on the most recent rebased values from Stats SA, reflecting the data as at 31 October 2025 (source: Iress).
3. Maximum percentage decline over any period. The maximum drawdown occurred from 3 September 2018 to 23 March 2020 and maximum benchmark drawdown occurred from 22 May 2008 to 20 November 2008. Drawdown is calculated on the total return of the Fund/benchmark (i.e. including income).
4. The percentage of calendar months in which the Fund produced a positive monthly return since inception.
5. The standard deviation of the Fund’s monthly return. This is a measure of how much an investment’s return varies from its average over time.
6. These are the highest or lowest consecutive 12-month returns since inception. This is a measure of how much the Fund and the benchmark returns have varied per rolling 12-month period. The Fund’s highest annual return occurred during the 12 months ended 30 September 1999 and the benchmark’s occurred during the 12 months ended 30 April 2006. The Fund’s lowest annual return occurred during the 12 months ended 31 March 2020 and the benchmark’s occurred during the 12 months ended 28 February 2009. All rolling 12-month figures for the Fund and the benchmark are available from our Client Service Centre on request.

Performance net of all fees and expenses

Percentage positive months ⁴	66.9	61.0	n/a
Annualised monthly volatility ⁵	14.8	16.1	n/a
Highest annual return ⁶	125.8	73.0	n/a
Lowest annual return ⁶	-24.3	-37.6	n/a

Meeting the Fund objective

The Fund has created wealth for its long-term investors. Since inception and over the latest 10- and five-year periods, the Fund has outperformed its benchmark. The Fund experiences periods of underperformance in pursuit of its objective of creating long-term wealth for investors, without taking on greater risk of loss than the average equity fund. The maximum drawdown and lowest annual return numbers, in the 'Performance net of all fees and expenses' table, show that the Fund has successfully reduced downside risk in periods of negative market returns.

Income distributions for the last 12 months

To the extent that income earned in the form of dividends and interest exceeds expenses in the Fund, the Fund will distribute any surplus biannually.	31 Dec 2024	30 Jun 2025
Cents per unit	635.7956	838.4062

Annual management fee

Allan Gray charges a fee based on the net asset value of the Fund excluding the portion invested in Orbis funds. The fee rate is calculated daily by comparing the Fund's total performance for the day to that of the benchmark.

Fee for performance equal to the Fund's benchmark: 1.00% p.a. excl. VAT

For each annualised percentage point above or below the benchmark we add or deduct 0.2%. The maximum fee is uncapped and if the fee would have been negative, 0% will be charged for the day and the negative fee will be carried forward to reduce the next day's fee (and all subsequent days until the underperformance is recovered).

This means that Allan Gray shares in approximately 20% of annualised performance relative to the benchmark.

A portion of the Fund may be invested in Orbis funds. Orbis charges performance-based fees within these funds that are calculated based on each Orbis fund's performance relative to its own benchmark. Orbis pays a marketing and distribution fee to Allan Gray.

Total expense ratio (TER) and transaction costs

The annual management fees charged by both Allan Gray and Orbis are included in the TER. The TER is a measure of the actual expenses incurred by the Fund over a one and three-year period (annualised). Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns (refer to page 4 for further information). Transaction costs are disclosed separately.

Top 10 share holdings on 30 September 2025 (SA and Foreign) (updated quarterly)⁷

Company	% of portfolio
Naspers & Prosus	5.6

10. Includes the impact of any currency hedging.

11. The Fund can invest a maximum of 45% offshore. Market movements may periodically cause the Fund to move beyond these limits. This must be corrected within 12 months.

Note: There may be slight discrepancies in the totals due to rounding.

The Fund has returned 22% year to date, ahead of its benchmark by 1%. On a long-term basis, the absolute level of real returns is above what we would expect the Fund to deliver through the cycle.

The Fund benefited from the strong relative performance of the offshore allocation. The global shares held in the Fund continue to look very different from the World Index. The performance might surprise some clients, given that the Nasdaq and S&P 500 are recording new highs propelled by the mega-cap technology shares, which we are significantly underweight in favour of lesser-known names, such as Alnylam Pharmaceuticals or AI infrastructure company Nebius Group, both of which hold top 10 positions in the Orbis Global Equity Fund. We remain underweight US equities. Please refer to the latest Orbis factsheet commentaries for more insight.

Locally, the FTSE/JSE All Share Index (ALSI) is also reaching new highs when measured both in rands and US dollars, breaching the 100 000 level for the first time. The index has been driven by Prosus/Naspers and the precious metal shares. In contrast, many SA Inc shares have been weak, and we are looking for opportunities among them.

We highlighted the strong performance of the gold sector in the Fund's Q2 2025 commentary. This has continued and then some! Gold Fields, AngloGold, DRDGOLD and Pan African Resources are all at all-time highs. Gold Fields and AngloGold are now jointly valued at R1.3 trillion and make up 13% of the index. While each of the stocks has its own idiosyncratic fundamentals, the significant price moves have been driven by the strong gold price. Although we have been positive on the gold price for a long period, we are very aware of the difficulty in predicting the gold price in the short and medium term. Long-standing clients would be aware that we have been attracted to the diversification that gold shares can bring to portfolios, but we are also cognisant that they have been poor businesses over the long term.

We manage this tension by carefully thinking about position size and capping the Fund's exposure to the sector. We encourage readers who are interested in finding out more about our view of gold and gold mining shares to read our [article on gold](#) in our Q2 2025 *Quarterly Commentary* and to [listen to episode 28](#) of *The Allan Gray Podcast*. Unfortunately, given strong price performance, we were underweight the platinum sector, with our only exposure being Northam Platinum.

One long-term holding in the Fund which has found favour with investors is British American Tobacco (BAT). The British pound share price has risen by more than 40% over the last 12 months. Part of this was an attractive starting valuation, as we have highlighted on many occasions, but the rerating was also driven by improving fundamentals. We believe the business is in a better position today than it was two years ago. The market has increasingly focused on the growth of the modern oral business within its next-generation product portfolio. Modern oral is the nicotine pouch business, which is growing quickly, especially in the US. While BAT's product, Velo, is a distant number two to Philip Morris's Zyn product in the US market, it is rapidly gaining share. BAT is the global leader outside of the US. BAT is trading on a 9 times price-to-earnings (PE) multiple compared to Philip Morris at 24 times. While we have reduced the position given the price movement, there remains further rerating potential relative to Philip Morris should BAT continue to deliver in its next-generation product portfolio.

During the quarter, the Fund purchased AB InBev and Glencore and sold BAT and MultiChoice.

Allan Gray is an authorised financial services provider.

Management Company

Allan Gray Unit Trust Management (RF) (Pty) Ltd (the "Management Company") is registered as a management company under the Collective Investment Schemes Control Act 45 of 2002, in terms of which it operates unit trust portfolios under the Allan Gray Unit Trust Scheme, and is supervised by the Financial Sector Conduct Authority (FSCA). The Management Company is incorporated under the laws of South Africa and has been approved by the regulatory authority of Botswana to market its unit trusts in Botswana, however, it is not supervised or licensed in Botswana. Allan Gray (Pty) Ltd (the "Investment Manager"), an authorised financial services provider, is the appointed investment manager of the Management Company and is a member of the Association for Savings & Investment South Africa (ASISA). The trustee/custodian of the Allan Gray Unit Trust Scheme is Rand Merchant Bank, a division of FirstRand Bank Limited. The trustee/custodian can be contacted at RMB Custody and Trustee Services: Tel: +27 (0)11 301 6335 or www.rmb.co.za.

Performance

Collective investment schemes in securities (unit trusts or funds) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. Movements in exchange rates may also cause the value of underlying international investments to go up or down. The Management Company does not provide any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. Actual investor performance may differ as a result of the investment date, the date of reinvestment and dividend withholding tax.

Fund mandate

Funds may be closed to new investments at any time in order to be managed according to their mandates. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The funds may borrow up to 10% of their market value to bridge insufficient liquidity.

Unit price

Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the Fund, including any income accruals and less any permissible deductions from the Fund, divided by the number of units in issue. Forward pricing is used and fund valuations take place at approximately 16:00 each business day. Purchase and redemption requests must be received by the Management Company by 14:00 each business day to receive that day's price. Unit trust prices are available daily on www.allangray.co.za.

Fees

Permissible deductions may include management fees, brokerage, securities transfer tax, auditor's fees, bank charges and trustee fees. A schedule of fees, charges and maximum commissions is available on request from Allan Gray. For more information about our annual management fees, refer to the [frequently asked questions](#), available via the Allan Gray website.

Total expense ratio (TER) and transaction costs

The total expense ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past one- and three-year periods. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged), VAT and other expenses like audit and trustee fees. Transaction costs (including brokerage, securities transfer tax, Share Transactions Totally Electronic (STRATE) and FSCA Investor Protection Levy and VAT thereon) are shown separately. Transaction costs are necessary costs in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager, and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns. As unit trust expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money. The sum of the TER and transaction costs is shown as the total investment charge (TIC).

Foreign securities

The Fund invests in foreign securities. Depending on their markets, trading in those securities may carry risks relating to, among others, macroeconomic and political circumstances, constraints on liquidity or the repatriation of funds, foreign exchange rate fluctuations, taxation and trade settlement.
