Monthly yield at month end: **Income Distribution:** Daily, pays out monthly Annual Management Fee: Fixed fee of 0.25% (excl. VAT) per

Total Expense Ratio*

Total Expense	Included in TER			
Ratio	Trading Costs	Performance Component		
0.31%	0.00%	0.00%		

*A Total Expense Ratio (TER) is a measure of a portfolio's assets that are relinquished as operating expenses. It is expressed as a percentage of the average value of the portfolio, calculated for the year to the end of December 2006. Included in the TER is the proportion of costs that are incurred in performance component and trading costs. These are disclosed seperately as percentages of the net asset value.

Commentary

Money market rates have remained stable over the past month since the Monetary Policy Committee's decision to leave interest rates unchanged. We believe the risks of a weaker Rand remain and therefore remain cautious on the inflation outlook. The duration remains below the maximum 90 days.

Calculating the Running Yield

The daily published yields are effective annual yields based on the seven-day rolling average yield.

The monthly distribution is based on the actual interest accrued during that month.

Calculation: The accrual in cents per unit for the previous seven days is converted into an average annual nominal yield and divided by the compounding factor to obtain a periodic effective rate. This figure is then converted to an annual effective rate.

Performance

% Returns	Money Marl	Benchmark*		
Since Inception* (unannualised)	66.0	66.5	
Latest 5 years (an	nualised)	9.0	9.0	
Latest 3 years (an	nualised)	7.5	7.4	
Latest 1 year		8.1	8.0	

^{*} Since inception to 31 March 2003, the benchmark was the Alexander Forbes 3-Month Deposit Index.

The current benchmark is the Domestic Fixed Interest Money Market Unit Trust sector excluding the Allan Gray Money Market Fund.

Performance as calculated by Allan Gray.

Allan Gray Unit Trust Management Limited (Registration Number 1998/007756/06)

Collective Investment Schemes in Securities (unit trusts) are generally medium- to long-term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accrual and less any permissible deductions from the portfolio divided by the number of units in issue. Declaration of income accruals are made daily and paid out monthly. Fund valuations take place at approximately 16th00 each business day. Performance ligures are from Allan Gray Limited (GIPS compliant) are for lump sum investments using insufficient logical flowers. The Fund eductions may involve management responsible performance ligures are from Allan Gray Limited (GIPS compliant) are for lump sum investments using insufficient logicality. A schedule of less and charges and maximum commissions is available on request from Allan Gray Unit Trust Management Limited. Commission and incentives may be paid and if so, would be included in the overall costs. A constant price will be maintained. Member of the ACI. Total Expense Ratio (TER): When investing, costs are only a part of an investment decision. The investment objective of the Fund should be compared with the investor's objective and then the performance of the investment and whether it represents value for money should be evaluated as part of the financial planning process. All Allan Gray performance ligures and values are quoted after the deduction of costs incurred within the Fund so the TER is not a new cost. A high TER will not necessarily imply a poor return nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs.
