

## Fund description and summary of investment policy

The Fund invests in South African money market instruments with a term shorter than 13 months. These instruments can be issued by government, parastatals, corporates and banks. The Fund is managed to comply with regulations governing retirement funds.

While capital losses are unlikely, they can occur if, for example, one of the issuers of an instrument held by the Fund defaults. In this event losses will be borne by the Fund and its investors.

ASISA unit trust category: South African – Interest Bearing – Money Market

## Fund objective and benchmark

The Fund aims to preserve capital, maintain liquidity and generate a sound level of income. The Fund's benchmark is the Alexander Forbes Short Term Fixed Interest (STeFI) Composite Index.

## How we aim to achieve the Fund's objective

The Fund invests in selected money market instruments providing an income yield and a high degree of capital stability. We formulate an interest rate outlook, which is influenced by our inflation outlook and expectations of the resulting Reserve Bank policy response. Based on this analysis, we select investments for the Fund. These assets are typically held to maturity. We take a conservative approach to credit risk.

## Suitable for those investors who

- Require monthly income distributions
- Are highly risk-averse but seek returns higher than bank deposits
- Need a short-term investment account

## Minimum investment amounts

Minimum lump sum per investor account	R20 000
Additional lump sum	R500
Minimum debit order*	R500

\*Only available to investors with a South African bank account.

## Fund information on 30 June 2019

Fund size	R19.9bn
Number of units	19 760 983 065
Price (net asset value per unit)	R1.00
Monthly yield at month end	0.63
Fund duration (days)	87.9
Fund weighted average maturity (days)	118.9
Class	A

- The current benchmark is the Alexander Forbes Short Term Fixed Interest (STeFI) Composite Index. Since inception to 31 March 2003, the benchmark was the Alexander Forbes 3-Month Deposit Index. From 1 April 2003 to 31 October 2011 the benchmark was the Domestic Fixed Interest Money Market Collective Investment Scheme sector excluding the Allan Gray Money Market Fund, performance as calculated by Allan Gray as at 30 June 2019.
- This is based on the latest numbers published by IRESS as at 31 May 2019.
- These are the highest or lowest consecutive 12-month returns since inception. This is a measure of how much the Fund and the benchmark returns have varied per rolling 12-month period. The Fund's highest annual return occurred during the 12 months ended 31 July 2003 and the benchmark's occurred during the 12 months ended 31 July 2003. The Fund's lowest annual return occurred during the 12 months ended 30 September 2013 and the benchmark's occurred during the 12 months ended 31 October 2013. All rolling 12-month figures for the Fund and the benchmark are available from our Client Service Centre on request.

## Income distribution for the last 12 months

Actual payout (cents per unit), the Fund distributes monthly

Jul 2018	Aug 2018	Sep 2018	Oct 2018
0.63	0.63	0.61	0.64
Nov 2018	Dec 2018	Jan 2019	Feb 2019
0.62	0.64	0.65	0.59
Mar 2019	Apr 2019	May 2019	Jun 2019
0.65	0.63	0.65	0.63

## Performance net of all fees and expenses

% Returns	Fund	Benchmark <sup>1</sup>	CPI inflation <sup>2</sup>
<b>Cumulative:</b>			
Since inception (1 July 2001)	300.1	291.4	165.4
<b>Annualised:</b>

Lowest annual return <sup>3</sup>	5.2	5.2	n/a

## Meeting the Fund objective

The Fund has preserved capital, maintained liquidity and generated a sound level of income.

## Annual management fee

A fixed fee of 0.25% p.a. excl. VAT

## Total expense ratio (TER) and Transaction costs

The annual management fee is included in the TER. The TER is a measure of the actual expenses incurred by the Fund over a one and three-year period (annualised). Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns (refer to page 4 for further information). Transaction costs are disclosed separately.

TER and Transaction costs breakdown for the 1 and 3-year period ending 30 June 2019	1yr %	3yr %
<b>Total expense ratio</b>	<b>0.29</b>	<b>0.29</b>
Annual management fee	0.25	0.25
Other costs excluding transaction costs	0.00	0.00
VAT	0.04	0.04
<b>Transaction costs (including VAT)</b>	<b>0.00</b>	<b>0.00</b>
<b>Total investment charge</b>	<b>0.29</b>	<b>0.29</b>

## Exposure by issuer on 30 June 2019

	% of portfolio
<b>Government and parastatals</b>	<b>8.5</b>
Republic of South Africa	8.5
<b>Corporates</b>	<b>13.1</b>
Sanlam	2.5
Shoprite	2.2
Life Healthcare Group	2.1
Pick 'n Pay	2.0
Mercedes-Benz	1.8
Toyota Financial Services	1.3
The Thekwini Warehousing Conduit	0.8
Telkom	0.4
<b>Banks<sup>4</sup></b>	<b>78.5</b>
Nedbank	19.5
Absa Bank	17.0
Investec Bank	15.4
Standard Bank	14.2
FirstRand Bank	12.4
<b>Total (%)</b>	<b>100.0</b>

4. Banks include negotiable certificates of deposit (NCDs), fixed deposits and call deposits.

Note: There may be slight discrepancies in the totals due to rounding.

In last quarter's Fund commentary, we discussed our view that money market yields were unusually attractive due to high interest rates combined with low inflation. We didn't expect this to last. The decline started this quarter as the market started to price in future interest rate cuts, meaning the Fund is reinvesting cash at lower yields than recent years. We expect future Fund returns to drop but remain attractive relative to 4.5% inflation.

South Africa needs higher economic growth to move forward. Lower rates are often cited as the easiest solution, in the hope that this encourages borrowing and injects money into the economy. We agree that real rates are too high in South Africa and believe that rates will be cut by more than the market expects. There are few signs of global inflation, with global bonds signalling the opposite as developed market yields fall back towards zero. Local inflation remains similarly benign, despite external volatility caused by input prices and the exchange rate. This, plus growth challenges, suggests increasing pressure on the Reserve Bank to lower rates.

Unfortunately, we doubt that lower rates will have a meaningful impact on growth, even if we are right about aggressive rate cuts. A more lasting solution is to correct the structural deficiencies plaguing the economy. However, such actions are unpopular since they require a short-term cost to pay for long-term gain. Allan Gray's philosophy of prioritising the long term over the

short term applies to economic policies as well as investing, meaning we strongly favour a focus on improving the supply side of the economy despite the short-term pain. We are not policy nor macroeconomic experts, but there is sufficient low-hanging fruit among the country's many challenges to have a meaningful impact.

Over the quarter, the Fund favoured fixed-rate and longer-maturity instruments that should delay the impact of lower rates.

### New appointments

We recently welcomed two new fixed-income portfolio managers: Thalia Petousis and Londa Nxumalo. Thalia has over seven years' experience in fixed interest and joined Allan Gray in 2015 as a fixed-interest trader. She will co-manage the Allan Gray Money Market Fund. Londa also has seven years' investment experience and joined Allan Gray in 2017. She will co-manage the Allan Gray Bond Fund.

Both managers have proven to be invaluable members of the investment team, and their expanded roles will allow our clients to benefit further from their expertise.

Commentary contributed by Mark Dunley-Owen

commentary as at  
30 June 2019**

## Management Company

Allan Gray Unit Trust Management (RF) Proprietary Limited (the 'Management Company') is registered as a management company under the Collective Investment Schemes Control Act 45 of 2002, in terms of which it operates 11 unit trust portfolios under the Allan Gray Unit Trust Scheme, and is supervised by the Financial Sector Conduct Authority ('FSCA'). The Management Company is incorporated under the laws of South Africa and has been approved by the regulatory authority of Botswana to market its unit trusts in Botswana, however it is not supervised or licensed in Botswana. Allan Gray Proprietary Limited (the 'Investment Manager'), an authorised financial services provider, is the appointed Investment Manager of the Management Company and is a member of the Association for Savings & Investment South Africa ('ASISA'). The trustee/custodian of the Allan Gray Unit Trust Scheme is Rand Merchant Bank, a division of FirstRand Bank Limited. The trustee/custodian can be contacted at RMB Custody and Trustee Services: Tel: +27 (0)87 736 1732 or [www.rmb.co.za](http://www.rmb.co.za)

## Performance

Collective Investment Schemes in Securities (unit trusts or funds) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. The Management Company does not provide any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. Where annualised performance is mentioned, this refers to the average return per year over the period. Actual investor performance may differ as a result of the investment date, the date of reinvestment and applicable taxes.

## The Allan Gray Money Market Fund is not a bank deposit account

The Fund aims to maintain a constant price of 100 cents per unit. The total return an investor receives is made up of interest received and any gain or loss made on instruments held by the Fund. While capital losses are unlikely, they can occur if, for example, one of the issuers of an instrument defaults. In this event investors may lose some of their capital. To maintain a constant price of 100 cents per unit, investors' unit holdings will be reduced to the extent of such losses. The yield is calculated according to ASISA standards. Excessive withdrawals from the Fund may place it under liquidity pressure; if this happens withdrawals may be ring-fenced and managed over a period of time.

Purchase and redemption requests must be received by the Management Company by 14:00 each business day to receive that day's price. Unit trust prices are available daily on [www.allangray.co.za](http://www.allangray.co.za)

## Fees

Permissible deductions may include management fees, brokerage, Securities Transfer Tax (STT), auditor's fees, bank charges and trustee fees. A schedule of fees, charges and maximum commissions is available on request from Allan Gray.

## Total expense ratio (TER) and Transaction costs

The total expense ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past one and three-year periods. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged), VAT and other expenses like audit and trustee fees. Transaction costs (including brokerage, Securities Transfer Tax [STT], STRATE and Investor Protection Levy and VAT thereon) are shown separately. Transaction costs are a necessary cost in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and Transaction costs should not be deducted again from published returns. As unit trust expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money. The sum of the TER and Transaction costs is shown as the Total investment charge ('TIC').

## Compliance with Regulation 28

The Fund is managed to comply with Regulation 28 of the Pension Funds Act. Exposures in excess of the limits will be corrected immediately, except where due to a change in the fair value or characteristic of an asset, e.g. market value fluctuations, in which case they will be corrected within a reasonable time period. The Management Company does not monitor compliance by retirement funds with section 19(4) of the Pension Funds Act (item 6 of Table 1 to Regulation 28).
