## ALLAN GRAY OPTIMAL FUND

## Fact sheet at 31 May 2005

Sector: Inception Date: Fund Manager: Qualification: Domestic AA Targeted Absolute Return 1 October 2002 Stephen Mildenhall B Com(Hons), CA(SA), CFA

This is a long-term absolute return fund for the investor who wishes to avoid the volatility generally associated with stock and bond markets, but still wants exposure to specialist stockpicking skills and to enjoy a positive rate of return which is higher than that of cash. This is a low risk fund.

| Fund Details   | Commentary   |
|--|--|
| Price:1217.59 centsSize:R 1 287 926 051Minimum lump sum:R 25 000Minimum monthly:R 2 500Subsequent lump sums:R 2 500Subsequent lump sums:R 2 500No. of share holdings:4601/01/04-31/12/04 dividend (cpu):Total 26.39Interest 7.63, Dividend 18.76Total 20.30Annual Management Fee:Fixed fee of 1% (excl.VAT) per annum.Performance-fee of 20% of the<br>daily outperformance of the benchmark. In times<br>of underperformance, no performance fees are<br>charged until the underperformance is recovered. | The Fund invests in a portfolio of equities and<br>substantially reduces stock market risk by using<br>equity derivatives. As a result, the Fund's return<br>should not be correlated with equity markets but it<br>is rather dependent on the level of short-term<br>interest rates and the ability of the Fund's equity<br>portfolio to outperform the underlying benchmark<br>equity index. The Fund has outperformed its<br>benchmark since inception and has marginally<br>outperformed its benchmark over the last 12<br>months. The return over the last 12 months has<br>however only marginally outperformed cash as the<br>share portfolio performed roughly in line with its<br>benchmark. With the larger disparity in the<br>market, we believe that the opportunities for stock-<br>pickers like ourselves are currently better than<br>they have been over the last year or so. |

Collective Investment Schemes in Securities (unit trusts) are generally medium- to long-term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit trust prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accrual and less any permissible deductions from the portfolio. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request from Allan Gray Unit Trust Management Limited. Commission and incentives may be paid and if so, would be included in the overall costs. Forward pricing is used. All of the unit trusts may be capped at any time in order for them to be managed in accordance with their mandates. Member of the ACI.
