

FUND DETAILS AT 31 JANUARY 2009

Sector: Domestic AA - Targeted Absolute Return
Inception date: 1 October 2002
Fund manager: Delphine Govender

Fund objective:

The Fund aims to exceed the return of the Daily Call Rate of FirstRand Bank.

Suitable for those investors who:

- Seek absolute (i.e. positive) returns regardless of stock market trends.
- Are risk-averse and require a high degree of capital stability.
- Are retired or nearing retirement.
- Seek the diversification benefits of uncorrelated returns relative to shares or bonds.
- Wish to diversify a portfolio of shares or bonds.
- Wish to add a product with an alternative investment strategy to their overall portfolio.

Price: R 15.47
Size: R 1 336 m
Minimum lump sum: R 25 000
Minimum monthly: R 2 500
Subsequent lump sums: R 2 500
No. of share holdings: 54

Income distribution: 01/01/08 - 31/12/08 (cents per unit) Total 109.87
Distributes bi-annually. To the extent that the total expenses exceed the income earned in the form of dividends and interest, the Fund will not make a distribution.

Income distributions are higher than normal because the Fund was a shareholder of Remgro and Richemont when they unbundled in October 2008. For more information about this, please contact our Client Service Centre or refer to our website, details of which are below.

Annual management fee:

The annual management fee rate is dependent on the return of the Fund relative to its benchmark. The benchmark is the return on call deposits with FirstRand Bank Limited (for amounts in excess of R5m). The fee hurdle (above which a fee greater than the minimum fee of 1% is charged) is performance equal to the benchmark. The manager's sharing rate is 20% of the outperformance of the benchmark. The fee is uncapped, however a high watermark principle applies which means that should the Fund underperform it would first be required to recover the underperformance before any further performance fees are payable.

COMMENTARY

The Fund invests in a portfolio of equities and substantially reduces stock market risk and exposure by selling equity derivatives against the equity portfolio. As a result, the Fund's return should not be correlated with equity markets, but it is dependent rather on the level of short-term interest rates and the ability of the Fund's equity portfolio to outperform the underlying benchmark equity index.

In essence, therefore, the Fund's return comprises two components: (1) the cash return implicit in the pricing of the sold futures contracts +/- (2) the out/underperformance of the equity portfolio versus the index (i.e. the alpha). Since inception the Fund has returned 88.8%, outperforming the benchmark return of 64.8%. For the 12 months ended 31 January 2009, the Fund has delivered a pleasing 15.4% outperforming the benchmark return of 11% and versus a return of -22.1% from the FTSE/JSE All Share Index (ALSI). Over the past 12 months, the Fund has therefore considerably outperformed South African equities (as measured by the ALSI), by in excess of 35%. This clearly demonstrates the core objective of the Fund, which is to deliver absolute and uncorrelated returns irrespective of the level of equity markets.

Following considerable widespread declined in share prices over the past 12 months, share valuations are starting to look broadly attractive on a longer-term view. However, given considerably weaker economic growth prospects for the year ahead, we believe there will be few positive catalysts for a substantial re-rating of South African equities in the near-term. In this environment, we believe that the Optimal Fund's very low net equity exposure and corresponding potential to deliver long term absolute returns, uncorrelated with overall equity markets, continues to make it a particularly compelling component of an investor's overall portfolio.

TOTAL EXPENSE RATIO FOR THE YEAR ENDED 31 DECEMBER 2008²

Total expense ratio	Included in TER			
	Trading costs	Performance component	Fee at benchmark	Other expenses
1.98%	0.28%	0.54%	1.14%	0.02%

²A Total Expense Ratio (TER) is a measure of a portfolio's assets that are relinquished as operating expenses. It is expressed as a percentage of the average value of the portfolio, calculated for the year to the end of December 2008. Included in the TER is the proportion of costs that are incurred by the performance component, fee at benchmark, trading costs (including brokerage, VAT, STT, STRATE and insider trading levy) and other expenses. These are disclosed separately as percentages of the net asset value. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. The information provided is applicable to class A units.

ASSET ALLOCATION

Asset class	% of portfolio
Net SA equities	6.4
Hedged SA equities	67.7
Listed property	0.5
Foreign	0.8
Money market and cash	24.6
Total	100
