

FUND DETAILS AT 31 JULY 2010

Sector: Domestic AA - Targeted Absolute Return Inception date: 1 October 2002
Fund manager: Delphine Govender
Fund objective:

The Fund aims to exceed the return of the Daily Call Rate of FirstRand Bank.

Suitable for those investors who:

- Seek absolute (i.e. positive) returns regardless of stock market trends
- Are risk-averse and require a high degree of capital stability
- Are retired or nearing retirement
- Seek the diversification benefits of uncorrelated returns relative to shares or bonds
- Wish to diversify a portfolio of shares or bonds
- Wish to add a product with an alternative investment strategy to their overall portfolio

Price:	R 16.15
Size:	R 3 147 m
Minimum lump sum per investor account:	R20 000
Minimum lump sum per fund:	R5 000
Minimum debit order per fund:	R 500
Additional lump sum per fund:	R 500
No. of share holdings:	56

Income distribution: 01/07/09 - 30/06/10 (cents per unit)

Total 21.43

Distributes bi-annually. To the extent that the total expenses exceed the income earned in the form of dividends and interest, the Fund will not make a distribution.

Annual management fee:

The annual management fee rate is dependent on the return of the Fund relative to its benchmark. The benchmark is the return on call deposits with FirstRand Bank Limited (for amounts in excess of R5m). The fee hurdle (above which a fee greater than the minimum fee of 1% is charged) is performance equal to the benchmark. The manager's sharing rate is 20% of the outperformance of the benchmark. The fee is uncapped, however a high watermark principle applies which means that should the Fund underperform it would first be required to recover the underperformance before any further performance fees are payable.

COMMENTARY

The Fund invests in a portfolio of equities and substantially reduces stock market risk and exposure by selling equity derivatives against the equity portfolio. As a result, the Fund's return should not be correlated with equity markets, but it is dependent rather on the level of short-term interest rates and the ability of the Fund's equity portfolio to outperform the underlying benchmark equity index. In essence, the Fund's return comprises of two components: (1) the cash return implicit in the pricing of the sold futures contracts \pm (2) the out/underperformance of the equity portfolio versus the index (i.e. the alpha).

Following a weak second quarter, equity markets staged a substantial recovery in the month of July with the All Share Index (ALSI) increasing by over 8% for the month of July. Even though ALSI earnings are now close to trendline levels, we remain bearish on our expectations for overall growth in company profits. Accordingly we believe consensus expectations for earnings growth that are being discounted into current equity prices are too optimistic on the whole. We are cautious on the current level of equity markets in light of our view of the underlying fundamentals.

With an explicit mandate to minimise volatility, preserve capital (i.e. limit loss) and deliver uncorrelated returns versus equity markets, we feel the Optimal Fund is appropriately positioned to meet its objectives over the long term. In this broader environment of heightened uncertainty, volatility and extended valuations, we are particularly confident about the relevance of this Fund as a component of an investor's overall portfolio.

TOTAL EXPENSE RATIO FOR THE YEAR ENDED 30 JUNE 2010 2

	Included in TER			
Total expense ratio	Trading costs	Performance component	Fee at benchmark	Other expenses
1.29%	0.14%	0.00%	1.14%	0.01%

² A Total Expense Ratio (TER) is a measure of a portfolio's assets that are relinquished as operating expenses. The total operating expenses are expressed as a percentage of the average value of the portfolio, calculated for the year to the end of June 2010. Included in the TER is the proportion of costs that are incurred by the performance component, fee at benchmark, trading costs (including brokerage, VAT, STT, STRATE and insider trading levy) and other expenses. These are disclosed separately as percentages of the net asset value. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. The information provided is applicable to class A units.

ASSET ALLOCATION AS AT 31 JULY 2010

	% of portfolio	
Asset class	Total	
Net SA Equities	3.7	
Foreign Inward Listing on the JSE	0.2	
Hedged SA Equities	81.6	
Property	0.2	
Money Market and Bank Deposits	14.1	
Total	100.0	

Note: There may be slight discrepancies in the totals due to rounding.

Collective Investment Schemes in Securities (unit trusts) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to the future. Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals are made biannually. Purchase and redemption requests must be received by the manager by 14-00 each business day and fund valuations take place at approximately 16:00 each business day. Forward pricing is therefore used. Performance figures are from Allan Gray Limited (GIPS compliant) and are for lump sum investments with income distributions reinvested. Permissible deductions may include management fees, brokerage, STT, auditor's fees, bank charges and trustee fees. The Fund may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees and charges and maximum commissions is available on request from the manager. Commission and incentives may be paid and if so, would be included in the overall costs. The Fund may be closed to new investments at any time in order to be managed in administration and incentives may be paid and if so, would be included in the overall costs. The Fund may be closed to new investments at any time in order to be managed in administration and incentives may be paid and if so, would be included in the overall costs. The Fund may be closed to new investments at any time in order to be managed in administration and incentives may be paid and if so, would be included in the overall costs. The Fund may be closed to new investments at any time in order to be managed in a small and the summand of the performance of the investment and whether it represents value for money should be evaluated as part of the financial planning process. All Allan Gray performance of the investment and whether it represents value for money should be evaluated as part of the financial planning process. All
