

ALLAN GRAY

ALLAN GRAY STABLE FUND

Fund managers: Ian Liddle, Mark Dunley-Owen. (Most foreign assets are invested in Orbis funds.) **Inception date:** 1 July 2000

Fund description and summary of investment policy

The Fund invests in a mix of shares, bonds, property, commodities and cash. The Fund may buy foreign assets up to a maximum of 25% of the Fund (with an additional 5% for African ex-SA investments). The Fund typically invests the bulk of its foreign allowance in a mix of funds managed by Orbis Investment Management Limited, our offshore investment partner. The maximum net equity exposure of the Fund is 40%. The Fund's net equity exposure may be reduced from time to time using exchange-traded derivative contracts on stock market indices. The Fund is managed to comply with the investment limits governing retirement funds. Returns are likely to be less volatile than those of an equity-only fund or a balanced fund.

ASISA unit trust category: South African - Multi Asset - Low Equity

Fund objective and benchmark

The Fund aims to provide a high degree of capital stability and to minimise the risk of loss over any two-year period, while producing long-term returns that are superior to bank deposits. The Fund's benchmark is the daily interest rate, as supplied by FirstRand Bank Limited, plus 2%.

How we aim to achieve the Fund's objective

A major portion of the Fund is typically invested in money market instruments. We seek to deploy the Fund's cash by investing in shares when they can be bought at a significant discount to their intrinsic value. We thoroughly research companies to assess their intrinsic value from a long-term perspective. This long-term perspective enables us to buy shares which are shunned by the stock market because of their unexciting or poor short-term prospects, but which are relatively attractively priced if one looks to the long term. If the stock market offers few attractive shares, we may allocate a low weight to shares or partially hedge the Fund's stock market exposure in consideration of the Fund's capital preservation objectives. The Fund may also invest in bonds, property and commodities. The Fund's bond and money market investments are actively managed.

Suitable for those investors who

- Are risk-averse and require a high degree of capital stability
- Seek both above-inflation returns over the long term, and capital preservation over any two-year period
- Require some income but also some capital growth
- Wish to invest in a unit trust that complies with retirement fund investment limits

Minimum investment amounts

Minimum lump sum per investor account	R20 000
Additional lump sum	R500
Minimum debit order*	R500

*Only available to investors with a South African bank account.

Lowest annual return ⁶	3.3	7.9	n/a

1. The Fund's benchmark is the daily interest rate, as supplied by FirstRand Bank Limited plus 2%, performance as calculated by Allan Gray as at 31 July 2015.

2. This is based on the latest numbers published by INET BFA as at 30 June 2015.

3. Maximum percentage decline over any period. The maximum drawdown occurred from 12 May 2006 to 14 June 2006. Drawdown is calculated on the total return of the Fund (i.e. including income).

4. The percentage of calendar months in which the Fund produced a positive monthly return since inception.

5. The standard deviation of the Fund's monthly return. This is a measure of how much an investment's return varies from its average over time.

6. This is the highest or lowest consecutive 12-month returns the Fund has experienced since inception, along with the benchmark performance for the corresponding period. This is a measure of how much the Fund's returns have varied per rolling 12-month period. The highest annual return occurred from 1 May 2005 to 30 April 2006 and the lowest annual return occurred from 1 November 2009 to 31 October 2010. All rolling 12-month figures for the Fund and the benchmark are available from our Client Service Centre on request.

ALLAN GRAY

ALLAN GRAY STABLE FUND

Meeting the Fund objective

Since inception and over the latest 10 and five-year periods, the Fund has outperformed its benchmark and CPI inflation, while providing a high degree of capital stability. The Fund aims to minimise the risk of loss over any two-year period. The lowest annual return numbers, in the 'Performance net of all fees and expenses' table, show that the Fund has not yet experienced a negative return over any rolling 12-month period.

Income distributions for the last 12 months

To the extent that income earned in the form of dividends and interest exceeds expenses in the Fund, the Fund will distribute any surplus quarterly.	30 Sep 2014	31 Dec 2014	31 Mar 2015	30 Jun 2015
Cents per unit	19.6174	17.1442	20.4196	20.3439

Annual management fee

Allan Gray charges a fee based on the net asset value of the Fund excluding the portion invested in Orbis funds. The fee rate is calculated daily by comparing the Fund's total performance over the last two years, to that of the benchmark. If the Fund's return over two years is equal to or less than 0%, Allan Gray will not charge a fee.

Fee for performance equal to the Fund's benchmark: 1.00% p.a. excl. VAT

For each percentage of two-year performance above or below the benchmark we add or deduct 0.1%, subject to the following limits:

Maximum fee: 1.50% p.a. excl. VAT

Minimum fee: 0.50% p.a. excl. VAT

This means that Allan Gray shares in approximately 20% of annualised performance relative to the benchmark.

A portion of the Fund may be invested in Orbis funds. Orbis charges performance-based fees within these funds that are calculated based on each Orbis fund's performance relative to its own benchmark.

Total expense ratio (TER)

The annual management fees charged by both Allan Gray and Orbis are included in the TER. The TER is a measure of the actual expenses incurred by the Fund over a 12-month period. Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns (refer to page 4 for further information).

TER breakdown for the year ending 30 June 2015	%
Fee for benchmark performance	1.03
Performance fees	0.38
Other costs including trading costs	0.09
VAT	0.16
Total expense ratio	1.66

Top 10 share holdings on 30 June 2015 (SA and Foreign) (updated quarterly)⁸

8. Underlying holdings of Orbis funds are included on a look-through basis.

9. The Fund is above its foreign exposure limit due to market value movements.

Since inception, the Fund's month-end net equity exposure has varied as follows:

Minimum	12.4% (January 2010)
Average	23.1%
Maximum	39.4% (August 2004)

Note: There may be slight discrepancies in the totals due to rounding.

ALLAN GRAY

ALLAN GRAY STABLE FUND

Fund manager quarterly commentary as at 30 June 2015

The Stable Fund is on a constant lookout for opportunities that can beat bank deposit returns with limited risk. These opportunities are relatively scarce in today's markets, because many JSE-listed companies can only be bought for valuations significantly in excess of their historical averages. What is more, many South African mining and manufacturing companies, which trade on historically low valuations, face structural challenges which increase their risk and may justify their seemingly low prices.

However, the market will always present some opportunities. The Fund bought the Zambezi Platinum preference share on its listing on the JSE. Zambezi Platinum is the black economic empowerment shareholder of Northam Platinum. The preference share yields a dividend equal to prime interest rates plus 3.5% on its par value. There is potential downside should Northam's mines perform poorly over the next decade, but the downside risk is substantially mitigated by a guarantee written by Northam.

Over the quarter, the Fund added to its position in Old Mutual. Disciplined capital allocation is essential in a life insurer. It has been a powerful driver of Sanlam's strong performance over the last decade. While we expect Sanlam to continue to allocate capital rationally, so does the market, and the share trades at a 45% premium to its disclosed group equity value. On the other hand, the market still seems somewhat sceptical about Old Mutual's Damascene conversion to disciplined capital allocation, and the share still trades at a price close to its disclosed group equity value and yields a dividend of 3.9%.

The Fund recently re-established a position in Sappi. Although the company still has more debt than it would like, we expect it to continue to use its free cash flow to reduce its debt. The company has refinanced some of its debt on more favourable terms, which will reduce interest costs. Sappi's South African pulp mills are relatively high quality South African export businesses, and they currently contribute the lion's share of the company's profits. Its European and North American paper mills have struggled with falling paper demand, but Sappi has adopted a disciplined approach, which means it is unlikely to tolerate cash flow losses in any of its older European mills for too long. This somewhat mitigates downside risk. However, paper companies are operationally geared and vulnerable to a turn in the economic cycle, and so the Fund's current exposure to Sappi is 0.4%.

Over the last quarter, the Fund reduced its exposure to mining company Glencore and further reduced its property exposure. It continued to add to its platinum metal exposure (see Quarterly Commentary 1, 2015 for broader discussions on property and platinum).

Commentary contributed by Ian Liddle

ALLAN GRAY

ALLAN GRAY STABLE FUND

Notes for consideration

Management Company

Allan Gray Unit Trust Management (RF) Proprietary Limited (the 'Management Company') is registered as a management company under the Collective Investment Schemes Control Act 45 of 2002, in terms of which it operates 10 unit trust portfolios under the Allan Gray Unit Trust Scheme, and is supervised by the Financial Services Board ('FSB'). The Management Company is incorporated under the laws of South Africa and has been approved by the regulatory authority of Botswana to market its unit trusts in Botswana, however it is not supervised or licensed in Botswana. Allan Gray Proprietary Limited (the 'Investment Manager'), an authorised financial services provider, is the appointed Investment Manager of the Management Company and is a member of the Association for Savings & Investment South Africa (ASISA). The trustee/custodian of the Allan Gray Unit Trust Scheme is Rand Merchant Bank, a division of FirstRand Bank Limited. The trustee/custodian can be contacted at RMB Custody and Trustee Services: Tel: +27 (0)87 736 1732 or www.rmb.co.za

Performance

Collective Investment Schemes in Securities (unit trusts or funds) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. Movements in exchange rates may also cause the value of underlying international investments to go up or down. The Management Company does not provide any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. Actual investor performance may differ as a result of the investment date, the date of reinvestment and dividend withholding tax.

Fund mandate

The Fund may be closed to new investments at any time in order to be managed according to its mandate. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The Fund may borrow up to 10% of its market value to bridge insufficient liquidity.

Unit price

Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the Fund including any income accruals and less any permissible deductions from the Fund divided by the number of units in issue. Forward pricing is used and fund valuations take place at approximately 16:00 each business day. Purchase and redemption requests must be received by the Management Company by 14:00 each business day to receive that day's price. Unit trust prices are available daily on www.allangray.co.za

Fees

Permissible deductions may include management fees, brokerage, Securities Transfer Tax (STT), auditor's fees, bank charges and trustee fees. A schedule of fees, charges and maximum commissions is available on request from Allan Gray.

Total expense ratio (TER)

The total expense ratio (TER) is the percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past year. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged), trading costs (including brokerage, Securities Transfer Tax [STT], STRATE and FSB Investor Protection Levy), VAT and other expenses. Since Fund returns are quoted after the deduction of these expenses, the TER should not be deducted from published returns. As unit trust expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money.

Compliance with Regulation 28

The Fund is managed to comply with Regulation 28 of the Pension Funds Act. Exposures in excess of the limits will be corrected immediately, except where due to a change in the fair value or characteristic of an asset, e.g. market value fluctuations, in which case they will be corrected within a reasonable time period. The Management Company does not monitor compliance by retirement funds with section 19(4) of the Pension Funds Act (item 6 of Table 1 to Regulation 28).

Foreign exposure

This fund may invest in foreign funds managed by Orbis Investment Management Limited, our offshore investment partner.
