

Fund description and summary of investment policy

The Fund invests in a mix of shares, bonds, property, commodities and cash. The Fund can invest a maximum of 45% offshore. The Fund typically invests the bulk of its foreign allowance in a mix of funds managed by Orbis Investment Management Limited, our offshore investment partner. The maximum net equity exposure of the Fund is 40%. The Fund's net equity exposure may be reduced from time to time using exchange-traded derivative contracts on stock market indices. The Fund is managed to comply with the investment limits governing retirement funds. Returns are likely to be less volatile than those of an equity-only fund or a balanced fund.

ASISA unit trust category: South African – Multi Asset – Low Equity

Fund objective and benchmark

The Fund aims to provide a high degree of capital stability and to minimise the risk of loss over any two-year period, while producing long-term returns that are superior to bank deposits. The Fund's benchmark is the daily interest rate, as supplied by FirstRand Bank Limited, plus 2%.

How we aim to achieve the Fund's objective

A major portion of the Fund is typically invested in money market instruments. We seek to deploy the Fund's cash by investing in shares when they can be bought at a significant discount to their intrinsic value. We thoroughly research companies to assess their intrinsic value from a long-term perspective. This long-term perspective enables us to buy shares which are shunned by the stock market because of their unexciting or poor short-term prospects, but which are relatively attractively priced if one looks to the long term. If the stock market offers few attractive shares, we may allocate a low weight to shares or partially hedge the Fund's stock market exposure in consideration of the Fund's capital preservation objectives. The Fund may also invest in bonds, property and commodities. The Fund's bond and money market investments are actively managed.

Suitable for those investors who

- Are risk-averse and require a high degree of capital stability
- Seek both above-inflation returns over the long term, and capital preservation over any two-year period
- Require some income but also some capital growth
- Wish to invest in a unit trust that complies with retirement fund investment limits

Fund information on 30 September 2025

Fund size	R59.2bn
Number of units	570 478 576
Price (net asset value per unit)	R50.92
Class	A

- The Fund's benchmark is the daily interest rate, as supplied by FirstRand Bank, plus 2%, performance as calculated by Allan Gray as at 30 September 2025.
- CPI inflation has been calculated based on the most recent rebased values from Stats SA, reflecting the data as at 31 August 2025 (source: IRESS).
- Maximum percentage decline over any period. The maximum drawdown occurred from 20 January 2020 to 23 March 2020. Drawdown is calculated on the total return of the Fund (i.e. including income).
- The percentage of calendar months in which the Fund produced a positive monthly return since inception.
- The standard deviation of the Fund's monthly return. This is a measure of how much an investment's return varies from its average over time.
- These are the highest or lowest consecutive 12-month returns since inception. This is a measure of how much the Fund and the benchmark returns have varied per rolling 12-month period. The Fund's highest annual return occurred during the 12 months ended 30 April 2006 and the benchmark's occurred during the 12 months ended 30 June 2003. The Fund's lowest annual return occurred during the 12 months ended 31 March 2020 and the benchmark's occurred during the 12 months ended 31 August 2021. All rolling 12-month figures for the Fund and the benchmark are available from our Client Service Centre on request.

Performance net of all fees and expenses

Annualised monthly volatility ⁵	5.0	0.6	n/a
Highest annual return ⁶	23.3	14.6	n/a
Lowest annual return ⁶	-7.4	4.6	n/a

Meeting the Fund objective

Since inception and over the latest 10- and five-year periods, the Fund has outperformed its benchmark. The Fund has provided returns in excess of CPI inflation for all three periods. The Fund aims to minimise the risk of loss over any two-year period.

Income distributions for the last 12 months

To the extent that income earned in the form of dividends and interest exceeds expenses in the Fund, the Fund will distribute any surplus quarterly.	31 Dec 2024	31 Mar 2025	30 Jun 2025	30 Sep 2025
Cents per unit	37.6557	38.9637	51.5956	43.8841

Annual management fee

Allan Gray charges a fee based on the net asset value of the Fund excluding the portion invested in Orbis funds. The fee rate is calculated daily by comparing the Fund's total performance over the last two years, to that of the benchmark. If the Fund's return over two years is equal to or less than 0%, Allan Gray will not charge a fee.

Fee for performance equal to the Fund's benchmark: 1.00% p.a. excl. VAT

For each percentage of two-year performance above or below the benchmark we add or deduct 0.1%, subject to the following limits:

Maximum fee: 1.50% p.a. excl. VAT
Minimum fee: 0.50% p.a. excl. VAT

This means that Allan Gray shares in approximately 20% of annualised performance relative to the benchmark.

A portion of the Fund may be invested in Orbis funds. Orbis charges performance-based fees within these funds that are calculated based on each Orbis fund's performance relative to its own benchmark. Orbis pays a marketing and distribution fee to Allan Gray.

Total expense ratio (TER) and transaction costs

The annual management fees charged by both Allan Gray and Orbis are included in the TER. The TER is a measure of the actual expenses incurred by the Fund over a one and three-year period (annualised). Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns (refer to page 4 for further information). Transaction costs are disclosed separately.

Top 10 share holdings on 30 September 2025 (SA and Foreign) (updated quarterly)⁷

9. Includes the impact of any currency hedging.

10. The Fund can invest a maximum of 45% offshore. Market movements may periodically cause the Fund to move beyond these limits. This must be corrected within 12 months.

Since inception, the Fund's month-end net equity exposure has varied as follows:

Minimum	12.4% (January 2010)
Average	26.4%
Maximum	39.6% (December 2018)

Note: There may be slight discrepancies in the totals due to rounding.

The FTSE/JSE All Share Index (ALSI) added to its impressive gains in the latest quarter, returning 12.9% and taking its year-to-date return to a remarkable 31.7%. It is seldom that returns from the local equity market rank near the top of global performance tables across multiple time periods, but now is such a time. Over the last five years, the ALSI has generated a US dollar return of 18.3% per annum, ahead of both the S&P 500 and the MSCI World indices at 16.5% and 14.4% respectively.

Key to the recent bout of outperformance has been gold, with the price of the metal up 47% thus far this year, including 12% in the last month alone. This last leg higher coincided with the market starting to price in multiple US Federal Reserve interest rate cuts owing to a weakening labour market in the United States. Concerns around increasing political influence on the central bank's actions also likely contributed. Prospects for looser monetary policy conditions ahead, while US inflation continues to run stubbornly above target, heighten the appeal of gold. Only 1979, when inflation concerns were widespread, saw better returns for the metal at this point in the year.

On the back of this move, the share prices of local gold miners have more than doubled so far in 2025. Platinum group metal producers have recently joined the market rally, with the shares up nearly 50% just in September. This, as platinum regained its allure as a precious metal. We have previously highlighted the concentrated nature of the local index, with precious metal producers now holding a 24% weight. Historically, the return profile from this sector has been highly erratic due to the cyclical nature of metal prices and the economics for the miners being eroded over time by cost creep and value-destructive capital allocation decisions.

Similarly, the local bond market continued its rally, with the FTSE/JSE All Bond Index (ALBI) adding 6.9% in the last quarter, taking the year-to-date return to 14.0%. While the South African Reserve Bank (SARB) opted to hold rates at its most recent Monetary Policy Committee meeting, the shift towards a more

dovish future stance is evident. The SARB has also introduced the possibility of lowering the inflation objective to 3% versus the previous 3% to 6% band. Experience elsewhere suggests that once inflation settles in the 1% to 3% range, it usually stays there. The current band is too high and wide relative to the low prevailing inflation that the SARB wishes to lock in. With administered prices and public sector wages still expected to outpace overall inflation, government support is clearly required. While discussions between the SARB and National Treasury are ongoing, the bond market has cheered the prospect of a new, lower target.

At quarter end, roughly 30% of the Fund was invested in direct offshore assets. Although the stronger rand this year has presented a headwind, performance from the underlying Orbis funds has been strong on both an absolute and relative basis.

The Fund has returned 11.6% year to date, outperforming its benchmark by 5.2%. With many asset prices, both locally and offshore, at or near multi-year highs, the prospect of future benchmark returns remaining elevated looks less clear. In our opinion, the Fund's current defensive positioning, in terms of its stock selection, 24% net equity weight (which is below the 40% maximum), sizeable asset allocation towards hedged equities, and lower-duration bond holdings should assist it in meeting its return objective, even if markets consolidate and digest their recent rallies in the near term.

During the quarter, the Fund continued to lighten its exposure to floating-rate notes in favour of fixed instruments. On the equities side, we initiated a new position in Shoprite, added to existing positions in Richemont and Spar, and trimmed the Fund's exposure to British American Tobacco and gold miners.

Management Company

Allan Gray Unit Trust Management (RF) (Pty) Ltd (the "Management Company") is registered as a management company under the Collective Investment Schemes Control Act 45 of 2002, in terms of which it operates unit trust portfolios under the Allan Gray Unit Trust Scheme, and is supervised by the Financial Sector Conduct Authority (FSCA). The Management Company is incorporated under the laws of South Africa and has been approved by the regulatory authority of Botswana to market its unit trusts in Botswana, however, it is not supervised or licensed in Botswana. Allan Gray (Pty) Ltd (the "Investment Manager"), an authorised financial services provider, is the appointed investment manager of the Management Company and is a member of the Association for Savings & Investment South Africa (ASISA). The trustee/custodian of the Allan Gray Unit Trust Scheme is Rand Merchant Bank, a division of FirstRand Bank Limited. The trustee/custodian can be contacted at RMB Custody and Trustee Services: Tel: +27 (0)11 301 6335 or www.rmb.co.za.

Performance

Collective investment schemes in securities (unit trusts or funds) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. Movements in exchange rates may also cause the value of underlying international investments to go up or down. The Management Company does not provide any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. Actual investor performance may differ as a result of the investment date, the date of reinvestment and dividend withholding tax.

Fund mandate

Funds may be closed to new investments at any time in order to be managed according to their mandates. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The funds may borrow up to 10% of their market value to bridge insufficient liquidity.

Unit price

Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the Fund, including any income accruals and less any permissible deductions from the Fund, divided by the number of units in issue. Forward pricing is used and fund valuations take place at approximately 16:00 each business day. Purchase and redemption requests must be received by the Management Company by 14:00 each business day to receive that day's price. Unit trust prices are available daily on www.allangray.co.za.

Fees

Permissible deductions may include management fees, brokerage, securities transfer tax, auditor's fees, bank charges and trustee fees. A schedule of fees, charges and maximum commissions is available on request from Allan Gray. For more information about our annual management fees, refer to the [frequently asked questions](#), available via the Allan Gray website.

Total expense ratio (TER) and transaction costs

The total expense ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past one- and three-year periods. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged), VAT and other expenses like audit and trustee fees. Transaction costs (including brokerage, securities transfer tax, Share Transactions Totally Electronic (STRATE) and FSCA Investor Protection Levy and VAT thereon) are shown separately. Transaction costs are necessary costs in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager, and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns. As unit trust expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money. The sum of the TER and transaction costs is shown as the total investment charge (TIC).

Compliance with Regulation 28

The Fund is managed to comply with Regulation 28 of the Pension Funds Act 24 of 1956 (the "Pension Funds Act"). Exposures in excess of the limits will be corrected immediately, except where due to a change in the fair value or characteristic of an asset, e.g. market value fluctuations, in which case they will be corrected within the prescribed regulatory time period. The Management Company does not monitor compliance by retirement funds with section 19(4) of the Pension Funds Act (item 6 of Table 1 to Regulation 28).
