

Fund description and summary of investment policy

The Fund invests in a focused portfolio of Frontier Market Equities. The Fund price is reported in US dollars, but the underlying holdings are denominated in various currencies. Returns are likely to be volatile.

Fund objective and benchmark

The Fund aims to outperform Frontier Markets over the long term without taking on greater risk of loss. The Fund’s benchmark is the MSCI Frontier Emerging Markets (FEM) Index. The Fund does not seek to mirror the benchmark but instead may deviate meaningfully from this performance benchmark in pursuit of superior returns. To the extent that its investments differ from those in the benchmark, the Fund faces the risk of underperforming the benchmark.

There are significant risks involved in investing in Frontier Market Equities and thus there is no assurance that the investment approach of the Fund will be successful or that the Fund will achieve its investment objective.

How we aim to achieve the Fund’s objective

We invest in equities that we believe offer superior fundamental value while taking into account risk and return. We research companies and assess their intrinsic value based on long-term fundamentals; we then invest in businesses where our assessment of intrinsic value exceeds the share price by a margin of safety. This approach allows us to identify shares that may be out of favour with the market because of poor near-term prospects, but offer good value over the long term. The Fund’s holdings will deviate meaningfully from those in the index both in terms of individual holdings and sector exposure.

Suitable for those investors who

- Seek exposure to Frontier Market equities
- Are comfortable with stock market and currency fluctuations
- Are prepared to take on the risk of capital loss
- Typically have an investment horizon of more than five years

Capacity

The Fund currently has no capacity constraints. Allan Gray Bermuda Limited (the ‘Investment Manager’) may, at its discretion, refuse a subscription or phase a subscription into the Fund over a number of dealing days. Redemptions may be limited to US\$5m or 2.5% of the Fund (whichever is less) per dealing day.

Fair value pricing

The board of directors of the Fund (‘the board’) may fair value the Fund’s assets in accordance with the board’s fair value pricing policies if:

- The closing market quotations or official closing prices are not readily available or do not accurately reflect the fair value of a Fund asset
- The value of a Fund asset has been materially affected by events occurring before the Fund’s pricing time but after the close of the exchange or market on which the asset is principally traded

The board delegates the responsibility for fair value pricing decisions to a Valuation Committee of the Investment Manager.

Fund information on 31 December 2021

Fund currency	US\$
Fund size	US\$649m
Number of shares	4 545 153
Price (net asset value per share)	US\$135.43
Number of share holdings	41
Dealing day	Weekly (Thursday)
Class	C
Class inception date	21 January 2021

Minimum investment amounts

Minimum initial investment	US\$50 000
Minimum subsequent investment	US\$1 000

1. Prior to the inception of this class of the Fund, the performance and risk measures are calculated using the A class performance of the Fund.
2. MSCI Frontier Emerging Markets Index (source: MSCI), performance as calculated by Allan Gray. Calculation based on the latest available data as supplied by third parties.
3. Maximum percentage decline over any period calculated from monthly returns. The maximum drawdown occurred from 31 March 2018 to 31 March 2020 and maximum benchmark drawdown occurred from 31 January 2018 to 31 March 2020. Drawdown is calculated on the total return of the Fund/benchmark (i.e. including income).
4. The percentage of calendar months in which the Fund produced a positive monthly return since inception.
5. The standard deviation of the Fund’s monthly return. This is a measure of how much an investment’s return varies from its average over time.
6. This is the highest or lowest rolling 12-month return the Fund has experienced since inception. The Fund’s highest annual return occurred during the 12 months ended 31 March 2021 and the benchmark’s occurred during the 12 months ended 31 March 2021. The Fund’s lowest annual return occurred during the 12 months ended 31 March 2020 and the benchmark’s occurred during the 12 months ended 31 March 2020. All rolling 12-month figures for the Fund and the benchmark are available from the Allan Gray Service Team on request.

Lowest annual return ⁶	-27.8	-28.7

Relative to benchmark return required to reach high watermark: 0.0%.

Meeting the Fund objective

The Fund aims to outperform Frontier Markets over the long term without taking on greater risk of loss. The Fund may experience periods of underperformance in pursuit of this objective. As the Fund is less than five years old it is too early to tell if it has met its objective.

Subscription and redemption charge

Investors may be charged 1% when subscribing for Fund shares. Investors may be charged 1% when redeeming Fund shares in the case of significant redemptions. These charges are paid into the Fund to offset the costs associated with the transactions that are borne by the Fund. The Investment Manager may waive these charges if transactions substantially offset one another.

Annual management fee

The management fee consists of a base fee of 0.7% and a performance component. The fee rate is calculated weekly by comparing the Fund's total performance for the week, after the base fee is deducted, to that of the benchmark.

Fee for performance equal to the Fund's benchmark: 0.7% p.a.

For each percentage point above or below the benchmark we add or deduct 0.2%. This means that Allan Gray shares in approximately 20% of the performance relative to the benchmark. The fee can decrease to a minimum of 0%. If the fee would have been negative, the negative fee will be carried forward to reduce the next week's fee (and all subsequent weeks until the underperformance is recovered).

Total expense ratio (TER) and Transaction costs

The annual management fee charged is included in the TER. The TER is a measure of the actual expenses incurred by the Fund over a one and three-year period (annualised). Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns (refer to page 4 for further information). Transaction costs are disclosed separately. The TER and Transaction costs cannot be determined accurately because of the short life span of the class. Calculations are based on actual data where possible and best estimates where actual data is not available.

Country of primary listing on 31 December 2021

Country	% of Equities	Benchmark ²
United Kingdom	20.6	0.0
Philippines	16.4	28.7
Nigeria	15.0	2.4
Kazakhstan	10.3	4.5
Egypt	7.5	3.5

Fee for benchmark performance	0.70	0.70
Performance fees	3.06	0.94
Custody fees	0.12	0.19
Other costs excluding transaction costs	0.06	0.07
Transaction costs	0.12	0.31
Total investment charge	4.06	2.21

2021 provided good returns in many equity markets, notably in the US, with the S&P 500 gaining 28.7% in US dollars, supported by low real interest rates and large net inflows into equities. Frontier markets continued to underperform the US market, with the MSCI Frontier Emerging Markets Index returning 4.3% for the year and 1.9% for the fourth quarter in US dollars, whereas the Fund returned 16.0% and 2.4% respectively over these periods.

The underperformance relative to the US market is partly driven by higher real interest rates in many frontier nations and lower inflows into frontier equities. Furthermore, 2021 saw considerable volatility within frontier markets, as the news flow around COVID-19 variants and related restrictions ebbed and flowed. These factors resulted in many instances where there is a large disparity in valuation multiples between companies in the frontier universe and comparable companies in developed markets, presenting attractive investment opportunities.

There were no material changes to the Fund in Q4. We added to some existing holdings on price weakness and started building positions in two Pakistani stocks.

15% of the Fund is invested in Filipino stocks. Conglomerates together with their listed subsidiaries account for over 50% of the Filipino index. Most of them own a few mature businesses which are leaders in their respective industries and, in addition, some are building holdings in smaller businesses with high growth prospects. There is a large disparity between the valuation multiples of these conglomerates, with the smaller ones trading at significant discounts despite being owner-managed and owning wonderful assets. We have been taking advantage of this. Furthermore, all our Filipino holdings are benefitting from lower tax rates after the Corporate Recovery and Tax Incentives for Enterprises (CREATE) Act became effective in 2021.

32% of the Fund is invested in banks with over half of the exposure held in Halyk Bank (Kazakhstan) and TBC Bank Group (Georgia). Both of these banks have large market shares, extensive branch networks and impressive digital offerings. They have very low cost-to-income ratios, with Halyk Bank currently below 30%. Despite being well capitalised and achieving a five-year average return on equity comfortably above 15%, they trade on 1 times to 1.4 times price-to-book.

Consumer goods companies represent 36% of the Fund. Among the larger holdings in this sector are Eastern Tobacco, Square Pharmaceuticals, and Ginebra San Miguel Inc (GSMI). We added to all of these positions in Q4. Revised conditions for the cigarette manufacturing licence tender in Egypt have recently been released and they are not as bearish for Eastern Tobacco as some initially feared. Despite this, Eastern Tobacco continues to trade on a price-to-earnings ratio below 6 times. Square Pharmaceuticals has been the industry leader in Bangladesh since 1985, continues to grow its revenue and earnings and has management ownership of more than 30%; however, it trades on an undemanding price-to-earnings ratio of 8.2 times excluding their net cash. GSMI owns the world's best-selling gin brand by volume. At an 8.8 times price-to-earnings ratio it trades at a significant discount to global alcohol stocks.

12% of the Fund is invested in the resource sector, with the largest positions being in Zimplats, Central Asia Metals and NAC Kazatomprom. These holdings provide exposure to platinum group metals (PGMs), copper, zinc, lead, and uranium. These miners trade on low multiples of our normal free cash flow estimates and the supply-demand outlook for their commodities is supportive for prices.

The Fund is materially overweight Nigerian stocks. The Nigerian All Share Index is trading at 2002 levels when measured in US dollars. While these stocks are attractively priced, we intend to reduce their weighting. This is being hampered by difficulties in repatriating funds from Nigeria. We are monitoring the situation closely.

The Fund's holdings have a weighted average five-year return on equity of 28% and are trading on attractive valuations given their quality and growth prospects. We are considering the possible impacts of further COVID-19 waves on individual companies, preferring to invest in businesses with robust balance sheets and strong competitive positions which are expected to be less fragile to potential lockdown restrictions. We are assessing the intrinsic value of the businesses under a range of scenarios and investing in those that offer asymmetric upside potential.

Definitions

Frontier Markets means markets included in the MSCI Frontier Emerging Markets (FEM) Index and Beyond Frontier markets. Beyond Frontier markets are markets not included in developed, emerging or frontier indices. Frontier Market Equities means equity in companies domiciled, geographically located or with significant business interests in Frontier Markets, regardless of the location of the stock exchange listing.

Information and content

The Fund is incorporated and registered under the laws of Bermuda and is supervised by the Bermuda Monetary Authority. The primary custodian of the Fund is Citibank N.A., New York Offices. The custodian can be contacted at 390 Greenwich Street, New York, New York, 10012, USA. The Investment Manager has appointed Allan Gray Unit Trust Management (RF) Proprietary Limited (the "Representative") as its representative for the purpose of approval in terms of the Collective Investment Schemes Control Act 45 of 2002. The Representative is incorporated under the laws of South Africa and is supervised by the Financial Sector Conduct Authority (FSCA).

The Fund may be closed to new investments at any time to be managed according to its mandate. Shares in the Fund are traded at ruling prices and the Fund can engage in borrowing and scrip lending. The Fund may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. This report does not constitute a financial promotion, a recommendation, an offer to sell or a solicitation to buy shares in the Fund. Investments in the Fund are made according to the terms and conditions and subject to the restrictions set out in the prospectus. The offering of shares in the Fund may be restricted in certain jurisdictions. Please contact the Allan Gray service team to confirm if there are any restrictions that apply to you.

Class C shares are only available to certain eligible investors who are subject to an additional administration fee separately agreed with an Allan Gray Group entity.

Performance

Collective investment schemes in securities (unit trusts or mutual funds) are generally medium- to long-term investments. Where annualised performance is mentioned, this refers to the average return per year over the period. The value of shares may go down as well as up and past performance is not necessarily a guide to future performance. Movements in exchange rates may cause the value of underlying international investments to go up or down. Neither the Investment Manager, the Fund nor the Representative provides any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. Actual investor performance may differ as a result of the investment date, the date of reinvestment and applicable taxes.

MSCI Index

Source: MSCI. MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indexes or any securities or financial products. This report is not approved, endorsed, reviewed or produced by MSCI. None of the MSCI data is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such.

Share price

Share prices are calculated on a net asset value basis, which is the total market value of all assets in the Fund including any income accruals and less any permissible deductions from the Fund divided by the number of shares in issue. Forward pricing is used. The weekly price of the Fund is normally calculated each Friday. Purchase requests must be received by the Registrar of the Fund by 17:00 South African time on that dealing day to receive that week's price. Redemption requests must be received by the Registrar of the Fund by 17:00 South African time, on the particular dealing day on which shares are to be redeemed to receive that week's price.

Fees and charges

Permissible deductions from the Fund may include management fees, brokerage, securities transfer tax, auditor's fees, bank charges and custody fees. A schedule of fees, charges and maximum commissions is available on request from the Representative.

Total expense ratio (TER) and transaction costs

The total expense ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past one- and three-year periods. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged) and other expenses like audit fees. Transaction costs (including brokerage, securities transfer tax and investor protection levies where applicable) are shown separately. Transaction costs are necessary costs in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of fund, the investment decisions of the investment manager and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns. As collective investment scheme expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money. The sum of the TER and transaction costs is shown as the total investment charge (TIC).

Risks

There is no assurance that the investment approach of the Fund will be successful or that the Fund will achieve its investment objective. It should be appreciated that the value of shares in the Fund can go down as well as up, that investors may not realise the amount initially invested, and that past performance data is not necessarily indicative of future performance.

Frontier markets

There are significant risks involved in investing in shares listed in the Fund's universe of developing countries including liquidity risks, sometimes aggravated by rapid and large outflows of "hot money" and capital flight, concentration risk, currency risks, political and social instability, the possibility of expropriation, confiscatory taxation or nationalisation of assets and the establishment of foreign exchange controls which may include the suspension of the ability to transfer currency from a given country. In many cases, such risks are significantly higher than those in developed markets. Frontier market countries have varying laws and regulations and, in some, foreign investment is controlled or restricted in varying degrees.

Contractual risk

The Fund can use derivatives to manage its exposure to stock markets, currencies and/or interest rates and this exposes the Fund to contractual risk. Contractual risk includes the risk that a counterparty will not settle a transaction according to its terms and conditions because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, causing the Fund to suffer a loss. Such contract counterparty risk is accentuated for contracts with longer maturities where events may intervene to prevent settlement, or where the Fund has concentrated its transactions with a single or small group of counterparties.

Derivatives

Borrowing, leveraging, and trading securities on margin will result in interest charges and, depending on the amount of trading activity, such charges could be substantial. The low margin deposits normally required in futures and forward trading utilized by the Fund permit a high degree of leverage; accordingly, a relatively small price movement in a futures or forward contract may result in immediate and substantial losses to the investor. Price movements of forward contracts and other derivative contracts in which the assets of the Fund may be invested are highly volatile and are influenced by, among other things, interest rates, changing supply and demand relationships, trade, fiscal, monetary and exchange control programs and policies of governments, and national and international political and economic events and policies. Forward contracts are not traded on exchanges and are not standardised; rather, banks and dealers act as principals in these markets, negotiating each transaction on an individual basis. Trading in forward contracts is substantially unregulated and there is no limitation on daily price movements.

Operating expense cap

The Investment Manager has agreed with the Fund that except for specified exclusions, operating expenses attributable to the Fund will be capped at a rate of 0.15% per annum during the Fund's financial year. The cap will be automatically extended for further successive one-year periods unless the Investment Manager notifies the Fund that the cap will not continue at least three months prior to the expiry of the term, as extended. The Investment Manager will meet expenses incurred in excess of such cap and will not seek reimbursement from the Fund. The operating expenses that are capped are all expenses excluding the fees of the Investment Manager, the cost of buying and selling assets and custody fees.
