

Orbis Global Equity Fund

Shared Investor Refundable Reserve Fee Share Class (A) ("Shared Investor RRF Class (A)")

The Fund is designed to be exposed to all of the risks and rewards of selected global equities. It aims to earn higher returns than world stockmarkets, without greater risk of loss. The performance fee benchmark ("Benchmark") of the Class is the MSCI World Index, including income, after withholding taxes ("MSCI World Index"). Currency exposure is managed separately to equity exposure.

For an initial period of time,* the Shared Investor RRF Class (A) is charging the fee that the Investor Share Class would charge, reduced by 0.3% per annum,[†] with reference to the FTSE World Index, including income, before withholding taxes ("FTSE World Index"). Numerous investors have switched to the Shared Investor RRF Class (A) from the Investor Share Class. This temporary measure will ensure that the fees paid by investors account for underperformance experienced by the Investor Share Class before the inception date of the Shared Investor RRF Class (A). The FTSE World Index is being reported in the relevant sections below during this period.

The average management fee* charged by the Investor Share Class is 1.28% per annum.

* The Shared Investor RRF Class (A) will continue to charge the fee that the Investor Share Class would charge, reduced by 0.3% per annum,[†] with reference to the FTSE World Index until the earlier of the first dealing day (a) on or after 14 May 2023, or (b) on which the average management fee charged by the Investor Share Class equals or exceeds 1.5% per annum of the Investor Share Class' net assets for the period ending on that dealing day and beginning on the later of (i) 12 months prior to that dealing day, or (ii) 14 May 2020. Please refer to the Fund's prospectus for more details.

[†] This 0.3% per annum reduction is provided because investors in the Shared Investor RRF Class (A) are subject to an additional administrative fee, as they separately agree with Allan Gray Proprietary Limited (or one of its affiliates) from time to time.

Past performance is not a reliable indicator of future results. Orbis Fund share prices fluctuate and are not guaranteed. Returns may decrease or increase as a result of currency fluctuations. When making an investment in the Funds, an investor's capital is at risk. See Notices for important information about this Fact Sheet.

¹ Fund data for the period before 14 May 2020 relates to the Investor Share Class.

Fund Objective and Benchmark

The Fund is designed for investors who have made the “asset allocation” decision to invest a predetermined amount in global equities. It seeks higher returns than the average of the world’s equity markets, without greater risk of loss. A benchmark is used by the Fund for two purposes: performance comparison (the “Fund Benchmark”) and performance fee calculation (the “Performance Fee Benchmark”). The Fund Benchmark is the FTSE World Index, including income, before the deduction of withholding taxes (“FTSE World Index”). The Performance Fee Benchmark of the Shared Investor RRF Class (A) is the MSCI World Index, including income and after deduction of withholding taxes.

How We Aim to Achieve the Fund’s Objective/Adherence to Objective

The Fund is actively managed and seeks to remain virtually fully invested in and exposed to global stockmarkets. It invests in equities considered to offer superior fundamental value. These equities are selected using extensive proprietary investment research. Orbis devotes a substantial proportion of its business efforts to detailed “bottom up” investment research conducted with a long-term perspective, believing that such research makes superior long-term performance attainable. The lower the price of a share as compared to its assessed intrinsic value, the more attractive Orbis considers the equity’s fundamental value. The Investment Manager believes that over the long term, equity investing based on this approach offers superior returns and reduces the risk of loss. The Fund may, to the extent permitted by its investment restrictions, also periodically hold cash and cash equivalents when Orbis believes this to be consistent with the Fund’s investment objective.

Exchange rate fluctuations significantly influence global investment returns. For this reason, part of Orbis’ research effort is devoted to forecasting currency trends. Taking into account these expected trends, Orbis actively reviews the Fund’s currency exposure. In doing so, Orbis places particular focus on managing the Fund’s exposure to those currencies considered less likely to hold their long-term value. The Fund’s currency deployment therefore frequently differs significantly from the geographic deployment of its selected equities.

The Fund does not seek to mirror the Fund Benchmark but may instead deviate meaningfully from it in pursuit of superior long-term capital appreciation.

The net returns of the Shared Investor RRF Class (A) from its inception on 14 May 2020, stitched with the net returns of the Investor Share Class from the Fund’s inception to 14 May 2020, have outperformed the stitched Performance Fee Benchmarks of the respective classes. The Fund will experience periods of underperformance in pursuit of its long-term objective.

Management Fee

As is described in more detail in the Fund’s Prospectus, the Fund’s various share classes bear different management fees. The fees are designed to align the Investment Manager’s interests with those of investors in the Fund.

For an initial period of time, the Shared Investor RRF Class (A) is charging the fee that the Investor Share Class would charge, reduced by 0.3% per annum, with reference to the FTSE World Index. Numerous investors have switched to the Shared Investor RRF Class (A) from the Investor Share Class. This temporary measure will ensure that the fees paid by investors account for underperformance experienced by the Investor Share Class before the inception date of the Shared Investor RRF Class (A). The fee that the Investor Share Class would charge that is currently being charged to the Shared Investor RRF Class (A) is calculated as follows:

The fee rate is calculated daily by comparing the Class’ performance over three years against the FTSE World Index, using the Investor Share Class’ performance prior to 14 May 2020. For each percentage point of three year performance above or below that benchmark’s performance, 0.04 percentage points are added to or deducted from 1.5%, subject to the following limits:

- Maximum fee: 2.5% per annum
- Minimum fee: 0.5% per annum

This fee is then reduced by 0.3% per annum. This 0.3% per annum reduction is provided because investors in the Shared Investor RRF Class (A) are subject to an additional administrative fee, as they separately agree with Allan Gray Proprietary Limited (or one of its affiliates) from time to time.

The Shared Investor RRF Class (A) will continue to charge the fee that the Investor Share Class would charge, reduced by 0.3% per annum, with reference to the FTSE World Index until the earlier of the first dealing day (a) on or after 14 May 2023, or (b) on which the average management fee charged by the Investor Share Class equals or exceeds 1.5% per annum of the Investor Share Class’ net assets for the period ending on that dealing day and beginning on the later of (i) 12 months prior to that dealing day, or (ii) 14 May 2020. After this point, the Class’ management fee will instead be charged as follows:

- *Base Fee:* Calculated and accrued daily at a rate of 0.8% per annum of the Class’ net asset value. Investors separately pay an administrative fee directly to Allan Gray Proprietary Limited or one of its affiliates. The Investment Manager or one of its affiliates is entitled to receive a separate fee from Allan Gray Proprietary Limited or one of its affiliates in connection with this administrative fee, related to services the Investment Manager and its affiliates provide to Allan Gray Proprietary Limited or its affiliates.
- *Refundable Performance Fee:* When the performance of the Shared Investor RRF Class (A) (after deducting the Base Fee and an additional 0.3% per annum, which is deemed to be representative of the aforementioned administrative fee) beats the Performance Fee Benchmark over the period from one dealing day to the next, 25% of the value of the outperformance is paid into a reserve and reinvested into the Fund. If the value of the reserve is positive on any dealing day, the Investment Manager is entitled to a performance fee in an amount capped at the lesser of an annualised rate of (a) one-third of the reserve’s net asset value and (b) 2.5% of the net asset value of the Shared Investor RRF Class (A). Fees paid from the reserve to the Investment Manager are not available to be refunded as described below.

When the performance of the Shared Investor RRF Class (A) (after deducting the Base Fee and the aforementioned additional 0.3% per annum) trails the Performance Fee Benchmark over the period from one dealing day to the next, 25% of the value of the underperformance is refunded from the reserve to the Shared Investor RRF Class (A). If at any time sufficient value does not exist in the reserve to provide the refund, a reserve recovery mark is set, and subsequent underperformance is tracked. Such relative losses must be recovered before any outperformance results in any payment to the reserve.

Please review the Fund’s prospectus for additional detail and for a description of the management fee borne by the Fund’s other share classes.

Orbis Global Equity Fund

Shared Investor Refundable Reserve Fee Share Class (A) (“Shared Investor RRF Class (A)”)

Fees, Expenses and Total Expense Ratio (TER)

In addition to the fees payable to its Investment Manager, the Fund bears operating costs, including the costs of maintaining its stock exchange listing, Bermuda government fees, legal and auditing fees, reporting expenses, the cost of preparing its Prospectus and communication costs. Finally, the Fund incurs costs when buying or selling underlying investments. Operating costs (excluding the Investment Manager’s fees, the cost of buying and selling assets, interest and brokerage charges and certain taxes) attributable to the Fund’s Shared Investor RRF Class (A) are currently capped at 0.15% per annum of the net asset value of that class.

Where an investor subscribes or redeems an amount representing 5% or more of the net asset value of the Fund, the Investment Manager may cause the Fund to levy a fee of 0.40% of the net asset value of the Fund’s shares being acquired or redeemed.

The annual management fees charged are included in the TER. The TER is a measure of the actual expenses incurred by the Class over a 12 month period, excluding trading costs. Since Fund and Class returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns. Expenses may vary, so the current TER is not a reliable indicator of future TERs.

Risk/Reward Profile

- The Fund is designed for investors who have made the “asset allocation” decision to invest a predetermined amount in global equities.
- Investments in the Fund may suffer capital loss.
- Investors should understand that the Investment Manager generally assesses an equity investment’s attractiveness using a three-to-five year time horizon.

Returns are net of fees, include income and assume reinvestment of dividends. Figures quoted are for the periods indicated for a \$10,000 investment (lump sum, for illustrative purposes only). Annualised returns show the average amount earned on an investment in the Fund/share class each year over the given time period. This Report does not constitute advice nor a recommendation to buy, sell or hold, nor an offer to sell or a solicitation to buy interests or shares in the Orbis Funds or other securities in the companies mentioned in it.

Collective Investment Schemes (CIS) are generally medium to long-term investments. The value of an investment in the Fund may go down as well as up, and past performance is not a reliable indicator of future results. The Investment Manager provides no guarantee with respect to capital or the Fund's returns. CIS are traded at ruling prices and can engage in borrowing and scrip lending. Commission and incentives may be paid by investors to third parties and, if so, would be included in the overall costs. Individual investors' performance may differ as a result of investment date, reinvestment date and dividend withholding tax, as well as a levy that may apply in the case of transactions representing more than 5% of the Fund's net asset value. The Fund may be closed to new investments at any time in order to be managed in accordance with its mandate. The Fund invests in foreign securities. Depending on their markets, trading in those securities may carry risks relating to, among others, macroeconomic and political circumstances, constraints on liquidity or the repatriation of funds, foreign exchange rate fluctuations, taxation and trade settlement.

Fund Objective and Benchmark

The Yen Classes of the Fund seek higher returns in yen than the Japanese stockmarket, without greater risk of loss. A benchmark is used by the Fund for two purposes: performance comparison (the “Fund Benchmark”) and performance fee calculation (the “Performance Fee Benchmark”). The Fund Benchmark is the Tokyo Stock Price Index, including income, gross of withholding taxes (“TOPIX (gross)”). The Performance Fee Benchmark of the Shared Investor RRF Class (A) is the Tokyo Stock Price Index, including income, net of withholding taxes (“TOPIX (net)”).

How We Aim to Achieve the Fund’s Objective/Adherence to Objective

The Fund is actively managed and is designed to be exposed to all the risks and rewards of selected Japanese equities. The Fund identifies as Japanese equities those equities of companies which are domiciled in Japan, whose securities trade on a Japanese stockmarket or whose business is primarily located in or linked to Japan. These equities are selected using extensive proprietary investment research undertaken by the Investment Manager and its investment advisors. Orbis devotes a substantial proportion of its business efforts to detailed “bottom up” investment research conducted with a long-term perspective, believing that such research makes superior long-term performance attainable. The lower the price of a share as compared to its assessed intrinsic value, the more attractive Orbis considers the equity’s fundamental value. The Investment Manager believes that over the long term, equity investing based on this approach offers superior returns and reduces the risk of loss.

All share classes invest in a portfolio of Japanese equities selected by the Investment Manager. The currency exposure of the Shared Investor RRF Class (A) remains as fully exposed to the yen as practicable. In addition, the Fund may, to the extent permitted by its investment restrictions, also periodically hold cash and cash equivalents when Orbis believes this to be consistent with the Fund’s investment objective.

The Fund does not seek to mirror the TOPIX (gross)/(net) and may deviate meaningfully from them in pursuit of superior long-term capital appreciation.

The net returns of the Shared Investor RRF Class (A) from its inception on 14 May 2020, stitched with the net returns of the Investor Share Class from the Fund’s inception to 14 May 2020, have outperformed the stitched Performance Fee Benchmarks of the respective classes. The Fund will experience periods of underperformance in pursuit of its long-term objective.

Risk/Reward Profile

- The Fund is aimed at investors who are seeking a portfolio the objective of which is to invest in, and be exposed to, Japanese equities.
- Investments in the Fund may suffer capital loss.
- Investors should understand that the Investment Manager generally assesses an equity investment’s attractiveness using a three-to-five year time horizon.

Management Fee

As is described in more detail in the Fund’s Prospectus, the Fund’s various share classes bear different management fees. The fees are designed to align the Manager’s and Investment Manager’s interests with those of investors in the Fund.

The Shared Investor RRF Class (A)’s management fee is charged as follows:

- **Base Fee:** Calculated and accrued daily at a rate of 0.8% per annum of the Class’ net asset value. Investors separately pay an administrative fee directly to Allan Gray Proprietary Limited or one of its affiliates. The Investment Manager or one of its affiliates is entitled to receive a separate fee from Allan Gray Proprietary Limited or one of its affiliates in connection with this administrative fee, related to services the Investment Manager and its affiliates provide to Allan Gray Proprietary Limited or its affiliates.
- **Refundable Performance Fee:** When the performance of the Shared Investor RRF Class (A) (after deducting the Base Fee and an additional 0.3% per annum, which is deemed to be representative of the aforementioned administrative fee) beats the Performance Fee Benchmark over the period from one dealing day to the next, 25% of the value of the outperformance is paid into a reserve and reinvested into the Fund. If the value of the reserve is positive on any dealing day, the Investment Manager is entitled to a performance fee in an amount capped at the lesser of an annualised rate of (a) one-third of the reserve’s net asset value and (b) 2.5% of the net asset value of the Shared Investor RRF Class (A). Fees paid from the reserve to the Investment Manager are not available to be refunded as described below.

When the performance of the Shared Investor RRF Class (A) (after deducting the Base Fee and the aforementioned additional 0.3% per annum) trails the Performance Fee Benchmark over the period from one dealing day to the next, 25% of the value of the underperformance is refunded from the reserve to the Shared Investor RRF Class (A). If at any time sufficient value does not exist in the reserve to provide the refund, a reserve recovery mark is set, and subsequent underperformance is tracked. Such related losses must be recovered before any outperformance results in any payment to the reserve.

Please review the Fund’s prospectus for additional detail and for a description of the management fee borne by the Fund’s other share classes.

Orbis SICAV Japan Equity (Yen) Fund

Shared Investor Refundable Reserve Fee Share Class (A) (“Shared Investor RRF Class (A)”)

Fees, Expenses and Total Expense Ratio (TER)

The relevant class within the Fund bears all expenses payable by such class, which shall include but not be limited to fees payable to its Manager, Investment Manager and additional service providers, fees and expenses involved in registering and maintaining governmental registrations, taxes, duties and all other operating expenses, including the cost of buying and selling assets. However, the Manager and the Investment Manager have agreed that in the current calendar year, except for specified exclusions, operating expenses attributable to the Fund’s Shared Investor RRF Class (A) will be capped at 0.20%. Please refer to the Fund’s Prospectus for a description of the fee cap applicable to its other share classes. Each cap will be automatically extended for further successive one year periods unless terminated by the Manager or the Investment Manager at least three months prior to the end of the then current term. The operating expenses that are capped are all expenses, excluding the Manager’s and Investment Managers’ fees described above under “Management Fee,” the cost of buying and selling assets, interest and brokerage charges, and certain taxes.

Where an investor subscribes or redeems an amount representing 5% or more of the net asset value of the Fund, the Manager may cause the Fund to levy a fee of 0.25% of the net asset value of the Fund’s shares being acquired or redeemed.

The annual management fees charged are included in the TER. The TER is a measure of the actual expenses incurred by the Class over a 12 month period, excluding trading costs. Since Fund and Class returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns. Expenses may vary, so the current TER is not a reliable indicator of future TERs.

Returns are net of fees, include income and assume reinvestment of dividends. Figures quoted are for the periods indicated for a ¥10,000 or €10,000 investment (lump sum, for illustrative purposes only). Annualised returns show the average amount earned on an investment in the Fund/share class each year over the given time period. This Report does not constitute advice nor a recommendation to buy, sell or hold, nor an offer to sell or a solicitation to buy interests or shares in the Orbis Funds or other securities in the companies mentioned in it.

Collective Investment Schemes (CIS) are generally medium to long-term investments. The value of an investment in the Fund may go down as well as up, and past performance is not a reliable indicator of future results. Neither the Manager nor the Investment Manager provides any guarantee with respect to capital or the Fund's returns. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. CIS are traded at ruling prices and can engage in borrowing and scrip lending. Commission and incentives may be paid by investors to third parties and, if so, would be included in the overall costs. Individual investors' performance may differ as a result of investment date, reinvestment date and dividend withholding tax, as well as a levy that may apply in the case transactions representing more than 5% of the Fund's net asset value. The Fund may be closed to new investments at any time in order to be managed in accordance with its mandate. The Fund invests in foreign securities. Depending on their markets, trading in those securities may carry risks relating to, among others, macroeconomic and political circumstances, constraints on liquidity or the repatriation of funds, foreign exchange rate fluctuations, taxation and trade settlement.

Fund Objective and Performance Fee Benchmarks

The Fund is designed for investors seeking capital appreciation on a low risk global investment portfolio. The Fund's returns are intended to be largely independent of the returns of major asset classes such as cash, equities and bonds. The Fund's US\$ Share Classes aim to outperform US\$ Bank Deposits (compound total returns on one month US\$ deposits, currently based on the Bloomberg USDRA rate), while its Euro Share Classes aim to outperform Euro Bank Deposits (compound total returns on one month Euro Deposits, currently based on the Bloomberg EUDRA rate).

How We Aim to Achieve the Fund's Objective/Adherence to Objective

The Fund is actively managed and augments a focused portfolio of selected global equities with hedging of the risk of monetary loss arising from a decline in stockmarkets. It invests in shares considered to offer superior fundamental value. The lower the price of a share as compared to its assessed intrinsic value, the more attractive Orbis considers the equity's fundamental value. Orbis believes that over the long term, equity invested based on this approach offers superior returns and reduces the risk of loss.

Orbis believes the main risk of investing in its selected equities is that their prices will decline if relevant stockmarkets fall significantly. To reduce this risk, the Fund maintains a substantial core level of hedging. When Orbis' research suggests that stockmarkets are overvalued and vulnerable, the Manager increases the hedging above this core level. Similarly, when Orbis' research suggests that stockmarkets represent good value, the Manager lowers the hedging below the core level. The Manager's actions in this regard are limited and the Fund therefore always maintains a significant level of hedging to protect investors from unexpected stockmarket declines. The result is that the Fund's returns are driven mainly by the Manager's ability to select equities that outperform their respective stockmarket indices and not by the overall direction of equity markets. The Fund is therefore able to aim for absolute (or positive) returns.

The net returns of both the US\$ and Euro Standard Class (A) Classes from their inception on 14 May 2020, stitched with the net returns of the US\$ and Euro Standard Classes respectively from the Fund's inception to 14 May 2020, have outperformed their respective performance fee benchmarks and delivered positive returns.

Risk/Reward Profile

- The Fund is designed for investors seeking capital appreciation on a low risk global investment portfolio.
- Investments in the Fund may suffer capital loss.
- Investors should understand that the Manager generally assesses an equity investment's attractiveness using a three-to-five year time horizon.

Management Fee

The Fund's share classes bear different management fees. The fees are designed to align the Investment Manager's interests with those of investors in the Fund.

There are two parts to the fee applicable to the Standard Share Class (A) Classes:

- a base fee of 0.7% per annum, paid monthly, of the total net assets of each Standard Share Class (A); plus
- a performance fee of 20% of the outperformance of each class of Standard Share Class (A)'s daily rate of return relative to its performance fee benchmark (as described in the "Fund Objective and Performance Fee Benchmarks" section above), calculated and accrued on each dealing day and paid monthly. The performance fee incorporates a high water mark.

Investors in the Standard Share Class (A) Classes of the Fund separately pay an administrative fee directly to Allan Gray Proprietary Limited or one of its affiliates. The Investment Manager or one of its affiliates is entitled to receive a separate fee from Allan Gray Proprietary Limited or one of its affiliates in connection with this administrative fee, related to services the Investment Manager and its affiliates provide to Allan Gray Proprietary Limited or its affiliates. The amount of this fee may vary, but will not exceed 0.3% per annum. For purposes of determining the return on which the performance fee is calculated for the Standard Share Class (A) Classes, the administrative fee is deemed to be the maximum possible fee of 0.3% per annum, which then is deducted, along with the base fee, for purposes of calculating the gross return.

Please review the Fund's prospectus for additional detail and for a description of the management fee borne by the Fund's other share classes.

Fees, Expenses and Total Expense Ratio (TER)

The relevant class within the Fund bears all expenses payable by such class, which shall include but not be limited to fees payable to its Manager and additional service providers, fees and expenses involved in registering and maintaining governmental registrations, taxes, duties and all other operating expenses, including the cost of buying and selling investments. However, the Manager has agreed that in the current calendar year, except for specified exclusions, operating expenses attributable to each share class will be capped at 0.15% per annum. The cap will be automatically extended for further successive one year periods unless terminated by the Manager at least three months prior to the end of the then current term. The operating expenses that are capped are all expenses, excluding the Manager's fees described above under "Management Fee," the cost of buying and selling investments, interest and brokerage charges.

Where an investor subscribes or redeems an amount representing 5% or more of the net asset value of the Fund, the Manager may cause the Fund to levy a fee of 0.50% of the net asset value of the Fund's shares being acquired or redeemed.

The annual management fees charged are included in the TER. The TER is a measure of the actual expenses incurred by the Class over a 12 month period, excluding trading costs. Since Fund and Class returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns.

Returns are net of fees, include income and assume reinvestment of dividends. Figures quoted are for the periods indicated for a \$10,000 or €10,000 investment (lump sum, for illustrative purposes only). Annualised returns show the average amount earned on an investment in the Fund/share class each year over the given time period. This Report does not constitute advice nor a recommendation to buy, sell or hold, nor an offer to sell or a solicitation to buy interests or shares in the Orbis Funds or other securities in the companies mentioned in it.

Collective Investment Schemes (CIS) are generally medium to long-term investments. The value of an investment in the Fund may go down as well as up, and past performance is not a reliable indicator of future results. The Manager provides no guarantee with respect to capital or the Fund's returns. CIS are traded at ruling prices and can engage in borrowing and scrip lending. Commission and incentives may be paid by investors to third parties and, if so, would be included in the overall costs. Individual investors' performance may differ as a result of investment date, reinvestment date and dividend withholding tax, as well as a levy that may apply in the case of transactions representing more than 5% of the Fund's net asset value. The Fund may be closed to new investments at any time in order to be managed in accordance with its mandate. The Fund invests in foreign securities. Depending on their markets, trading in those securities may carry risks relating to, among others, macroeconomic and political circumstances, constraints on liquidity or the repatriation of funds, foreign exchange rate fluctuations, taxation and trade settlement.

The discussion topics for the commentaries were selected, and the commentaries were finalised and approved, by Orbis Investment Management Limited, the Fund's Manager. Information in this Report is based on sources believed to be accurate and reliable and provided "as is" and in good faith. The Orbis Group does not make any representation or warranty as to accuracy, reliability, timeliness or completeness of the information in this Report. To the maximum extent permitted by applicable law, the Orbis Group disclaims all liability (whether arising in contract, tort, negligence or otherwise) for any error, omission, loss or damage (whether direct, indirect, consequential or otherwise) in connection with the information in this Report.

Fund Minimum

Minimum investment amounts in the Fund are specified in the Fund's Prospectus, provided that a new investor in the Orbis Funds must open an investment account with Orbis, which may be subject to minimum investment restrictions, country restrictions and/or other terms and conditions. For more information on opening an Orbis investment account, please visit www.orbis.com.

Clients investing via Allan Gray, which includes the Allan Gray Investment Platform, an Allan Gray investment pool or otherwise through Allan Gray Nominees, remain subject to the investment minimums specified by the applicable terms and conditions.

Fund Objective and Benchmark

The Fund seeks higher returns than the average of the equity stock markets of the world’s emerging market countries, without greater risk of loss. The MSCI Emerging Markets Index, including income, net of withholding taxes, is the Fund’s benchmark (the “MSCI Emerging Markets Index”).

How We Aim to Achieve the Fund’s Objective/Adherence to Objective

The Fund is actively managed and is designed to be exposed to all of the risks and rewards of selected Emerging Market equities. The Fund expects to be not less than 90% invested in Emerging Market equity and equity-linked investments. The Fund identifies Emerging Market equity and equity-linked investments as those investments that are issued by a corporate body or other entity domiciled or primarily located in a country represented in the MSCI Emerging Markets Index or the MSCI Frontier Markets Index (together, “Emerging Markets”), traded or listed on an exchange in an Emerging Market or issued by a corporate body or other entity whose business is significantly linked to Emerging Markets. These equities are selected using extensive proprietary investment research. Orbis devotes a substantial proportion of its business efforts to detailed “bottom up” investment research conducted with a long-term perspective, believing that such research makes superior long-term performance attainable. The lower the price of a share as compared to its assessed intrinsic value, the more attractive Orbis considers the equity’s fundamental value. The Investment Manager believes that over the long term, equity investing based on this approach offers superior returns and reduces the risk of loss. The Fund may, to the extent permitted by its investment restrictions, also periodically hold cash and cash equivalents when Orbis believes this to be consistent with the Fund’s investment objective.

Exchange rate fluctuations significantly influence global investment returns. For this reason, part of Orbis’ research effort is devoted to forecasting currency trends. Taking into account these expected trends, Orbis actively reviews the Fund’s currency exposure, focusing, in particular, on managing the Fund’s exposure to those currencies considered less likely to hold their long-term value.

The Fund does not seek to mirror the MSCI Emerging Markets Index and may deviate meaningfully from it in pursuit of superior long-term capital appreciation.

The net returns of the Shared Investor RRF Class (A) from its inception on 14 May 2020, stitched with the net returns of the Investor Share Class from the Fund’s inception to 14 May 2020, have outperformed the stitched Performance Fee Benchmarks of the respective classes. The Fund will experience periods of underperformance in pursuit of its long-term objective.

Risk/Reward Profile

- The Fund is aimed at investors who are seeking a portfolio the objective of which is to be invested in, and exposed to, Emerging Market securities.
- Investments in the Fund may suffer capital loss.
- Investors should understand that the Investment Manager generally assesses an equity investment’s attractiveness using a three-to-five year time horizon.

Management Fee

As is described in more detail in the Fund’s Prospectus, the Fund’s various share classes bear different management fees. The fees are designed to align the Manager’s and Investment Manager’s interests with those of investors in the Fund.

The Shared Investor RRF Class (A)’s management fee is charged as follows:

- **Base Fee:** Calculated and accrued daily at a rate of 0.8% per annum of the Class’ net asset value. Investors separately pay an administrative fee directly to Allan Gray Proprietary Limited or one of its affiliates. The Investment Manager or one of its affiliates is entitled to receive a separate fee from Allan Gray Proprietary Limited or one of its affiliates in connection with this administrative fee, related to services the Investment Manager and its affiliates provide to Allan Gray Proprietary Limited or its affiliates.
- **Refundable Performance Fee:** When the performance of the Shared Investor RRF Class (A) (after deducting the Base Fee and an additional 0.3% per annum, which is deemed to be representative of the aforementioned administrative fee) beats the Performance Fee Benchmark over the period from one dealing day to the next, 25% of the value of the outperformance is paid into a reserve and reinvested into the Fund. If the value of the reserve is positive on any dealing day, the Investment Manager is entitled to a performance fee in an amount capped at the lesser of an annualised rate of (a) one-third of the reserve’s net asset value and (b) 2.5% of the net asset value of the Shared Investor RRF Class (A). Fees paid from the reserve to the Investment Manager are not available to be refunded as described below.

When the performance of the Shared Investor RRF Class (A) (after deducting the Base Fee and the aforementioned additional 0.3% per annum) trails the Performance Fee Benchmark over the period from one dealing day to the next, 25% of the value of the underperformance is refunded from the reserve to the Shared Investor RRF Class (A). If at any time sufficient value does not exist in the reserve to provide the refund, a reserve recovery mark is set, and subsequent underperformance is tracked. Such relative losses must be recovered before any outperformance results in any payment to the reserve.

Prior to 9 Feb 2023, the Shared Investor RRF Class (A) charged the fee that the Investor Share Class would have charged, reduced by 0.3% per annum. Numerous investors switched to the Shared Investor RRF Class (A) from the Investor Share Class. This temporary measure ensured that the fees paid by investors accounted for underperformance experienced by the Investor Share Class before the inception date of the Shared Investor RRF Class (A).

Please review the Fund’s prospectus for additional detail and for a description of the management fee borne by the Fund’s other share classes.

Orbis SICAV Emerging Markets Equity Fund

Shared Investor Refundable Reserve Fee Share Class (A) (“Shared Investor RRF Class (A)”)

Fees, Expenses and Total Expense Ratio (TER)

The relevant class within the Fund bears all expenses payable by such class, which shall include but not be limited to fees payable to its Manager, Investment Manager and additional service providers, fees and expenses involved in registering and maintaining governmental registrations, taxes, duties and all other operating expenses, including the cost of buying and selling assets.

Where an investor subscribes or redeems an amount representing 5% or more of the net asset value of the Fund, the Manager may cause the Fund to levy a fee of 0.75% of the net asset value of the Fund’s shares being acquired or redeemed.

The annual management fees charged are included in the TER. The TER is a measure of the actual expenses incurred by the Class over a 12 month period, excluding trading costs. Since Fund and Class returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns. Expenses may vary, so the current TER is not a reliable indicator of future TERs.

Fund Objective and Benchmark

The Fund seeks to balance investment returns and risk of loss with a diversified global portfolio of equities, fixed income instruments and commodity-linked instruments. It aims for higher long-term returns than its designated combined equity and bond performance benchmark, which is comprised of 60% MSCI World Index with net dividends reinvested and 40% JP Morgan Global Government Bond Index, each expressed in US\$ (the “60/40 Index” or “benchmark”).

How We Aim to Achieve the Fund’s Objective/Adherence to Objective

The Fund is actively managed and invests in equities, fixed income instruments and commodity-linked instruments. Fund weightings among the different asset classes are determined based on their appreciation, income and risk of loss potential, with appropriate diversification.

Equities. The Investment Manager targets the Fund to hold 40-90% of its net asset value in a pool of global equities, including some which may provide exposure to real estate. The Fund invests in shares considered to offer fundamental value and dividend paying potential that is superior to its benchmark. The lower the price of a share as compared to its assessed intrinsic value, the more attractive Orbis considers the equity’s fundamental value. The Investment Manager believes the main risk of investing in equities is that their prices will decline if relevant stockmarkets fall significantly. To reduce this risk, when Orbis’ research suggests that stockmarkets are overvalued and vulnerable, the Investment Manager may reduce exposure to, or hedge, stockmarket risk. When Orbis’ research suggests that stockmarkets represent good value, the Investment Manager may increase exposure to stockmarket risk by decreasing the amount of that hedging. The Investment Manager intends to limit the Fund’s exposure to stockmarkets net of hedging to 75% of its net asset value. Furthermore, the Fund may buy and sell exchange-traded equity call and put options for investment efficiency purposes, but only to the extent the Fund is capable of meeting its payment or delivery obligations related to such options, for example, by holding the underlying security.

Fixed Income Instruments. The Investment Manager targets the Fund to hold 10-50% of its net asset value in fixed income instruments issued by corporate bodies, governments and other entities. These are selected – like equities – with the aim of increasing the Fund’s overall risk-adjusted return. Characteristics such as yield, liquidity and potential diversification benefits are viewed in the context of the risk and reward of the portfolio as a whole. When Orbis’ research suggests that bond markets are overvalued and vulnerable, the Investment Manager may reduce exposure to, or hedge, bond market risk. When Orbis’ research suggests that bond markets represent stronger value, the Investment Manager may increase exposure to bond market risk by decreasing the amount of that hedging. The Investment Manager intends to limit aggregate hedging of the Fund’s stockmarket and bond market exposure to no more than 30% of its net asset value. Importantly, the Investment Manager may cause the Fund to be over this hedging target, at times meaningfully so and/or for extended periods of time where it considers this to be in the best interest of the Fund. The Fund’s fixed income selections in aggregate may differ significantly from the benchmark in duration and credit quality and may include securities of issuers that are under bankruptcy or similar judicial reorganisation, notably distressed debt. In addition, the Fund may invest in money market instruments, cash, cash equivalents and high yield bonds.

Commodity-linked Instruments. The Investment Manager targets the Fund to hold 0-10% of its net asset value in commodity-linked instruments, which may provide the Fund with indirect exposure to commodities. The Fund will gain exposure to commodities if the Investment Manager’s investment research process identifies a commodity or class of commodities as being more attractive than overall equity and fixed income opportunities, taking into account any risk reduction benefits of diversification.

Exchange rate fluctuations significantly influence global investment returns. For this reason, part of Orbis’ research effort is devoted to forecasting currency trends. Taking into account these expected trends, Orbis actively reviews the Fund’s currency exposure. In doing so, it places particular focus on managing the Fund’s exposure to those currencies less likely to hold their long-term value.

The Investment Manager may cause the Fund to be under or over the asset allocation and hedging targets and limits described above where it considers this to be in the best interest of the Fund. The Fund’s holdings may deviate meaningfully from the 60/40 Index.

The net returns of the Shared Investor RRF Class (A) from its inception on 14 May 2020, stitched with the net returns of the Investor Share Class from the Fund’s inception to 14 May 2020, have outperformed the Performance Fee Benchmark of the classes. The Fund will experience periods of underperformance in pursuit of its long-term objective.

Management Fee

As is described in more detail in the Fund’s Prospectus, the Fund’s various share classes bear different management fees. The fees are designed to align the Manager’s and Investment Manager’s interests with those of investors in the Fund.

The Shared Investor RRF Class (A)’s management fee is charged as follows:

- **Base Fee:** Calculated and accrued daily at a rate of 0.8% per annum of the Class’ net asset value. Investors separately pay an administrative fee directly to Allan Gray Proprietary Limited or one of its affiliates. The Investment Manager or one of its affiliates is entitled to receive a separate fee from Allan Gray Proprietary Limited or one of its affiliates in connection with this administrative fee, related to services the Investment Manager and its affiliates provide to Allan Gray Proprietary Limited or its affiliates.
- **Refundable Performance Fee:** When the performance of the Shared Investor RRF Class (A) (after deducting the Base Fee and an additional 0.3% per annum, which is deemed to be representative of the aforementioned administrative fee) beats the Performance Fee Benchmark over the period from one dealing day to the next, 25% of the value of the outperformance is paid into a reserve and reinvested into the Fund. If the value of the reserve is positive on any dealing day, the Investment Manager is entitled to a performance fee in an amount capped at the lesser of an annualised rate of (a) one-third of the reserve’s net asset value and (b) 2.5% of the net asset value of the Shared Investor RRF Class (A). Fees paid from the reserve to the Investment Manager are not available to be refunded as described below.

When the performance of the Shared Investor RRF Class (A) (after deducting the Base Fee and the aforementioned additional 0.3% per annum) trails the Performance Fee Benchmark over the period from one dealing day to the next, 25% of the value of the underperformance is refunded from the reserve to the Shared Investor RRF Class (A). If at any time sufficient value does not exist in the reserve to provide the refund, a reserve recovery mark is set, and subsequent underperformance is tracked. Such relative losses must be recovered before any outperformance results in any payment to the reserve.

Prior to 8 Sep 2022, the Shared Investor RRF Class (A) charged the fee that the Investor Share Class would have charged, reduced by 0.3% per annum. Numerous investors switched to the Shared Investor RRF Class (A) from the Investor Share Class. This temporary measure ensured that the fees paid by investors accounted for underperformance experienced by the Investor Share Class before the inception date of the Shared Investor RRF Class (A).

Please review the Fund’s prospectus for additional detail and for a description of the management fee borne by the Fund’s other share classes.

Orbis SICAV Global Balanced Fund

Shared Investor Refundable Reserve Fee Share Class (A) (“Shared Investor RRF Class (A)”)

Fees, Expenses and Total Expense Ratio (TER)

The relevant class within the Fund bears all expenses payable by such class, which shall include but not be limited to fees payable to its Manager, Investment Manager and additional services providers, fees and expenses involved in registering and maintaining governmental registrations, taxes, duties and all other operating expenses, including the cost of buying and selling assets. However, the Manager and the Investment Manager have agreed that in the current calendar year, except for specified exclusions, operating expenses attributable to the Fund's Shared Investor RRF Class (A) will be capped at 0.20%. Please refer to the Fund's Prospectus for a description of the fee cap applicable to its other share classes. Each cap will be automatically extended for further successive one year periods unless terminated by the Manager or the Investment Manager at least three months prior to the end of the then current term. The operating expenses that are capped are all expenses, excluding the Manager's and Investment Managers' fees described above under "Management Fee," the cost of buying and selling assets, interest and brokerage charges, and certain taxes.

Where an investor subscribes or redeems an amount representing 5% or more of the net asset value of the Fund, the Manager may cause the Fund to levy a fee of 0.40% of the net asset value of the Fund's shares being acquired or redeemed.

The annual management fees charged are included in the TER. The TER is a measure of the actual expenses incurred by the Class over a 12 month period, excluding trading costs. Since Fund and Class returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns. Expenses may vary, so the current TER is not a reliable indicator of future TERs.

Risk/Reward Profile

- The Investment Manager aims to contain the risk of monetary loss to a level that is below the risk of loss experienced by global equity funds but higher than that experienced by government bond funds and cash deposits over the long term. Investors should be aware that this expected reduction in risk of loss comes at the expense of long-term expected return.
- While the Investment Manager expects the Fund's investment approach to result in volatility below that of a typical global equity fund, the Fund's net asset value will fluctuate, and the Fund will experience periods of volatility and negative returns; investments in the Fund may suffer capital loss.
- Investors should understand that the Investment Manager generally assesses an investment's attractiveness over a three-to-five year time horizon.

Returns are net of fees, include income and assume reinvestment of dividends. Figures quoted are for the periods indicated for a \$10,000 investment (lump sum, for illustrative purposes only). Annualised returns show the average amount earned on an investment in the Fund/share class each year over the given time period. This Report does not constitute advice nor a recommendation to buy, sell or hold, nor an offer to sell or a solicitation to buy interests or shares in the Orbis Funds or other securities in the companies mentioned in it.

Collective Investment Schemes (CIS) are generally medium to long-term investments. The value of an investment in the Fund may go down as well as up, and past performance is not a reliable indicator of future results. Neither the Manager nor the Investment Manager provides any guarantee with respect to capital or the Fund's returns. CIS are traded at ruling prices and can engage in borrowing and scrip lending. Commission and incentives may be paid by investors to third parties and, if so, would be included in the overall costs. Individual investors' performance may differ as a result of investment date, reinvestment date and dividend withholding tax, as well as a levy that may apply in the case of transactions representing more than 5% of the Fund's net asset value. The Fund may be closed to new investments at any time in order to be managed in accordance with its mandate. The Fund invests in foreign securities. Depending on their markets, trading in those securities may carry risks relating to, among others, macroeconomic and political circumstances, constraints on liquidity or the repatriation of funds, foreign exchange rate fluctuations, taxation and trade settlement.

Fund Information

The benchmark is a composite index consisting of the MSCI World Index with net dividends reinvested (60%) and the JP Morgan Global Government Bond Index (40%).

Net Equity is Gross Equity minus stockmarket hedging. Fixed Income refers to fixed income instruments issued by corporate bodies, governments and other entities, such as bonds, money market instruments and cash. Fixed Income regional allocation is based on the currency denomination of the instrument. Net Fixed Income is Gross Fixed Income minus bond market hedging. Except where otherwise noted, government fixed income securities are aggregated by time to maturity and issuer. TIPS are not aggregated with ordinary treasuries.

Duration is calculated using the modified duration of the fixed income instruments in the portfolio, or the effective duration in the case of fixed income instruments with embedded options and real effective duration in the case of inflation-linked bonds. Yield to Maturity ("YTM") for the Fund and the JP Morgan Global Government Bond Index is the average of the portfolio's fixed income instruments' YTM, weighted by their net asset value. Real YTM is used for inflation-linked bonds. The calculations are gross and exclude non-performing fixed income instruments.

Fund Minimum

Minimum investment amounts in the Fund are specified in the Fund's Prospectus, provided that a new investor in the Orbis Funds must open an investment account with Orbis, which may be subject to minimum investment restrictions, country restrictions and/or other terms and conditions. For more information on opening an Orbis investment account, please visit www.orbis.com.

Clients investing via Allan Gray, which includes the Allan Gray Investment Platform, an Allan Gray investment pool or otherwise through Allan Gray Nominees, remain subject to the investment minimums specified by the applicable terms and conditions.

Notes to Help You Understand This Report

Certain capitalised terms are defined in the Glossary section of the Orbis Funds' respective Prospectuses, copies of which are available upon request from Allan Gray Unit Trust Management (RF) Proprietary Limited, a Member of the Association for Savings & Investments SA. The country and currency classification for securities follows that of third-party providers for comparability purposes. Emerging Markets follows MSCI classification when available and includes Frontier Markets. Emerging Markets currency exposure is based on currency denomination. Based on a number of factors including the location of the underlying business, Orbis may consider a security's classification to be different and manage the Funds' exposures accordingly. Totals presented in this Report may not sum due to rounding.

Risk measures are ex-post and calculated on a monthly return series. Months to recovery measures the number of months from the preceding peak in performance to recovery of that level of performance.

12 month portfolio turnover for the Orbis Equity and Multi-Asset Class Funds is calculated as the lesser of total security purchases or sales in the Fund over the period, divided by the average net asset value (NAV) of the Fund. Short-term fixed income instruments and net current assets are not included.

12 month name turnover for the Orbis Equity and Multi-Asset Class Funds is calculated as the number of positions held by the Fund at the start of the period but no longer held at the end of the period, divided by the total number of positions held by the Fund at the start of the period. Net current assets are not included.

Active share is a measure of the extent to which the holdings of the Orbis Equity and Multi-Asset Class Funds differ from their respective benchmark's holdings. It is calculated by summing the absolute value of the differences of the weight of each individual security in the specific Orbis Fund, versus the weight of each holding in the respective benchmark index, and dividing by two. For the Multi-Asset Class Funds, three calculations of active share are disclosed. The Portfolio active share incorporates the equity, fixed income, commodity-linked and other securities (as applicable) held by the Orbis Fund and compares those to the holdings of the composite benchmark. The Equity and Fixed Income active shares are calculated as if the equity and fixed income portions of the Orbis Funds are independent funds; each of those two sets of holdings is separately compared to the fully-weighted holdings in the appropriate component of the composite benchmark. Although the Multi-Asset Class Funds hedge stock and bond market exposure, the active share calculations are "gross" and not adjusted to reflect the hedging in place at any point in time.

Benchmark related information is as at the date of production based on data provided by the official benchmark and/or third party data providers. There may be timing differences between the date at which data is captured and reported.

The total expense ratio has been calculated using the expenses, excluding trading costs, and average net assets for the 12 month period ending 28 February 2023.

Orbis SICAV Funds: The Fund expenses exclude portfolio transaction costs. The performance related management fee becomes payable to Orbis on each Dealing Day as defined in the Funds' Prospectus.
