Commentary

Your Fund's exposure to the technology sector has been declining during the year as a result of bottom-up decisions to allocate capital to more attractive ideas. That said, at 20%, the Fund's weighting to technology remains notably higher than that of the benchmark, particularly in Asia. NetEase, one of China's top online game companies, and Baidu, China's dominant search engine, are examples. NetEase is the Fund's third-largest holding and has a strong record of successful game development. The stock has been one of your Fund's biggest winners this year, and we believe the company remains well-positioned to benefit from its current hit games as well as an exciting pipeline of new games. By contrast, Baidu, whose earnings are driven by online advertising, remains deeply out of favour with investors. In our view, however, both revenue and earnings will grow meaningfully over the long term as advertising continues to shift online and internet penetration in China grows.

Collective Investment Schemes (CIS) are generally medium to long-term investments. The value of participatory interests may go down as well as up and past performance is not a reliable indicator of future results. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. CIS are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request from Allan Gray Unit Trust Management Limited, a member of the Association for Savings & Investments SA. Commission and incentives may be paid by investors to third parties and if so, would be included in the overall costs. The Fund is priced weekly. Figures quoted are for the periods indicated for a \$10 investment, using NAV-NAV prices, with income distributions reinvested. Performance is quoted in US dollar currency terms.
