

Orbis Global Equity Fund

The Fund is designed to remain fully invested in global equities. It aims to earn higher returns than world stockmarkets, without greater risk of loss. The benchmark is the FTSE World Index, including income, gross of withholding taxes ("FTSE World Index"). The Fund's currency exposure is managed relative to that of the FTSE World Index.

Past performance is not a reliable indicator of future results. Orbis Fund share prices fluctuate and are not guaranteed. Returns may decrease or increase as a result of currency fluctuations. When making an investment in the Funds, an investor's capital is at risk.

¹ Number of months since the start of the drawdown. This drawdown is not yet recovered.

² 1.5% per annum ± up to 1%, based on 3 year rolling outperformance/(underperformance) vs benchmark.

Legal Notices

This Report does not constitute advice nor a recommendation to buy, sell or hold, nor an offer to sell or a solicitation to buy units of the Orbis Funds or other securities in the companies mentioned in it ("relevant securities"). It has not been prepared in accordance with legal requirements designed to promote the independence of investment research. Orbis, its affiliates, directors and employees (together, the "Orbis Group") are not subject to restrictions on dealing in relevant securities ahead of the dissemination of this Report. Subscriptions are only valid if made on the basis of the current Prospectus of an Orbis Fund.

The discussion topics for the commentaries were selected, and the commentaries were finalised and approved, by either Orbis Investment Management Limited or Orbis Investment Management (B.V.I) Limited, the Funds' Manager or Portfolio Manager, as the case may be. Information in this Report is based on sources believed to be accurate and reliable and provided "as is" and in good faith. The Orbis Group does not make any representation or warranty as to accuracy, reliability, timeliness or completeness of the information in this Report. The Orbis Group disclaims all liability (whether arising in contract, tort, negligence or otherwise) for any error, omission, loss or damage (whether direct, indirect, consequential or otherwise) in connection with the information in this Report.

Orbis Investment Management Limited and Orbis Investment Management (B.V.I.) Limited, the Funds' Manager or Portfolio Manager, are licensed to conduct investment business by the Bermuda Monetary Authority.

Returns are net of fees, include income and assume reinvestment of dividends. Figures quoted are for the periods indicated for a \$10,000, ¥10,000 and €10,000 investment (lump sum, for illustrative purposes only). Annualised returns show the average amount earned on an investment in the Fund/share class each year over the given time period.

Collective Investment Schemes (CIS) are generally medium to long-term investments. The value of an investment in the Funds may go down as well as up, and past performance is not a reliable indicator of future results. No Manager or Portfolio Manager provides any guarantee with respect to capital or the Funds' returns. CIS are traded at ruling prices and can engage in borrowing and scrip lending. Commission and incentives may be paid by investors to third parties and, if so, would be included in the overall costs. Performance shown is for the Fund or share class indicated. Individual investors' performance may differ as a result of investment date, reinvestment date and dividend withholding tax, as well as a levy that may apply in the case of transactions representing more than 5% of a Fund's net asset value. Any Fund may be closed to new investments at any time in order to be managed in accordance with its mandate. The Funds invest in foreign securities. Depending on their markets, trading in those securities may carry risks relating to, among others, macroeconomic and political circumstances, constraints on liquidity or the repatriation of funds, foreign exchange rate fluctuations, taxation and trade settlement.

Notes to Help You Understand This Report

Certain capitalised terms are defined in the Glossary section of the Orbis Funds' respective Prospectuses, copies of which are available upon request from Allan Gray Unit Trust Management (RF) Proprietary Limited, a Member of the Association for Savings & Investments SA. The country and currency classification for equity securities follows that of third party benchmark providers for comparability purposes. Based on a number of factors including the location of the underlying business, Orbis may consider a security's classification to be different and manage the Funds' exposures accordingly. Totals presented in this Report may not sum due to rounding.

12 month portfolio turnover for the Orbis Equity and Multi-Asset Class Funds is calculated as the lesser of total security purchases or sales in the Fund over the period, divided by the average net asset value of the Fund. Short-term fixed income instruments are not included.

12 month name turnover for the Orbis Equity and Multi-Asset Class Funds is calculated as the number of positions held by the Fund at the start of the period but no longer held at the end of the period, divided by the total number of positions held by the Fund at the start of the period. Short-term fixed income instruments are not included.

Active share is a measure of how actively managed the Orbis Equity Funds are. It is calculated by summing the absolute value of the differences of the weight of each individual stock in the specific Orbis Fund, versus the weight of each holding in the respective benchmark index, and dividing by two.

The total expense ratio has been calculated using the expenses, excluding trading costs, and average net assets for the 12 month period ending 31 August 2015.

Orbis Optimal SA Fund: Total Rate of Return for Bank Deposits is the compound total return for one-month interbank deposits in the specified currency. Beta Adjusted Exposure is calculated as Equity Exposure multiplied by a Beta determined using Blume's technique, minus Portfolio Hedging.

Fund Information

Orbis SICAV Global Balanced Fund: The benchmark is a composite index consisting of the MSCI World Index with net dividends reinvested (60%) and the JP Morgan Global Government Bond Index (40%). Net Equity is Gross Equity minus stockmarket hedging. Fixed Income refers to fixed income instruments issued by corporate bodies, governments and other entities, such as bonds, money market instruments and cash and cash equivalents. Fixed Income regional allocation is based on the currency denomination of the instrument.

Prior to 29 November 2002, the Yen Class of the Orbis SICAV Japan Equity Fund was a British Virgin Islands investment company, Orbis Japan Equity (Yen) Fund Limited.

Fund Minimums

Minimum investment amounts in the Orbis Funds are specified in the respective Fund's Prospectus, provided that a new investor in the Orbis Funds must open an investment account with Orbis, which may be subject to minimum investment restrictions, country restrictions and/or other terms and conditions. For more information on opening an Orbis investment account, please visit www.orbis.com.

Clients investing via Allan Gray, which includes the Allan Gray Investment Platform, an Allan Gray investment pool or otherwise through Allan Gray Nominees remain subject to the investment minimums specified by the applicable terms and conditions.

Fees and Charges

The management fees associated with the Funds vary depending upon the share class an investor purchases. Not all share classes are offered by each Fund, and the eligibility criteria for different share classes and/or different Funds vary. Each Orbis Fund's Prospectus (available on www.orbis.com) describes the management fees, share classes and eligibility criteria of that Fund. Immediately below are descriptions of the fees borne by the Funds and share classes specified, which are subject to the lengthier descriptions in the relevant Fund's Prospectus:

Shares of Orbis Global Equity Fund and Investor Share Classes of the Orbis SICAV Funds (Global Balanced, Asia ex-Japan Equity and Japan Equity): The Funds pay a performance-based fee. The fee is based on the net asset value of the Fund (share class, in the case of the Orbis SICAV Funds). The fee rate is calculated weekly by comparing the Fund's (share class, in the case of the Orbis SICAV Funds) performance over three years against its benchmark. For each percentage point of three year performance above or below that benchmark's performance, 0.04 percentage points are added to or subtracted from 1.5%, subject to (a) a maximum fee of 2.5% per annum and (b) a minimum fee of 0.5% per annum. Note: During the first three years of the Global Balanced Fund's existence, (a) returns will be calculated from the launch of the class and grossed up to represent returns over three years and (b) a portion of the fee may be refunded to the Fund pursuant to predetermined conditions.

Shares of Orbis Optimal SA Fund Limited: There are two parts to the fee: (a) a base fee of 1.0% per annum, paid monthly, of the total net assets of each share class; plus (b) a performance fee of 20% of the outperformance of each class of Fund share's weekly rate of return relative to its performance fee hurdle, calculated and accrued on each dealing day and paid monthly. The performance fee incorporates a high water mark.

A schedule of fees and charges and maximum commissions is available on request from the appropriate Manager.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. The latest average fund indices provided by Morningstar are for 20 August 2015. To allow comparison of returns to a common date we have extended the average equity and multi-asset class fund indices to reflect the subsequent movement of the applicable benchmark indices. For the purposes of extending the Average Global Equity Fund Index as a comparator of the Orbis Optimal SA Fund, the FTSE World Index has been used. Average fund returns are not shown for periods of a month or less as high price volatility and late fund reporting regularly cause them to be significantly restated by Morningstar.
