Fund Objective and Benchmark

The Fund seeks to balance appreciation of capital, income generation and risk of loss with a diversified global portfolio. It aims for higher long-term returns than its designated combined equity and bond performance benchmark, which is comprised of 60% MSCI World Index with net dividends reinvested and 40% JP Morgan Global Government Bond Index, each expressed in US\$ (the "60/40 Index").

How We Aim to Achieve the Fund's Objective/Adherence to Objective

The Fund is actively managed and invests in equities, fixed income instruments and commodity-linked instruments. Fund weightings among the different asset classes are determined based on their income, appreciation and risk of loss potential, with appropriate diversification. The Portfolio Manager may cause the Fund to be under or over the targets described in the remainder of this section when it considers this to be in the Fund's best interest.

Equities. The Portfolio Manager targets the Fund to hold 40-90% of its net asset value in a pool of global equities. The Fund invests in shares considered to offer fundamental value and dividend paying potential that is superior to its benchmark. The lower the price of a share as compared to its assessed intrinsic value, the more attractive Orbis considers the equity's fundamental value. The Portfolio Manager believes the main risk of investing in equities is that their prices will decline if relevant stockmarkets fall significantly. To reduce this risk, when Orbis' research suggests that stockmarkets are overvalued and vulnerable, the Portfolio Manager will reduce exposure to, or hedge, stockmarket risk. Similarly, when Orbis' research suggests that stockmarkets represent good value, the Portfolio Manager will increase exposure to stockmarket risk by decreasing the amount of any hedging. The Fund may utilise exchange-traded derivatives for investment efficiency purposes by helping the Fund to be continuously fully exposed to equities (within the Portfolio Manager's targets) at all times. Furthermore, the Fund may also buy and sell exchange-traded equity call and put options for investment efficiency purposes, but only to the extent the Fund is capable of meeting its payment or delivery obligations related to such options, for example, by holding the underlying security.

Fixed Income Instruments. The Portfolio Manager targets the Fund to hold 10-50% of its net asset value in fixed income instruments issued by corporate bodies, governments and other entities. These are selected to provide current income, liquidity and portfolio diversification for the purpose of reducing risk of loss. The Fund's fixed income selections in aggregate may differ significantly from the benchmark in duration and credit quality. In addition, the Fund may invest in money market instruments, cash and cash equivalents.

Commodity-linked Instruments. The Portfolio Manager targets the Fund to hold 0-10% of its net asset value in commodity-linked instruments, which may provide the Fund with indirect exposure to commodities. The Fund will gain exposure to commodities if the Portfolio Manager's investment research process identifies a commodity or class of commodities as being more attractive than overall equity and fixed income opportunities, taking into account any risk reduction benefits of diversification.

Exchange rate fluctuations significantly influence global investment returns. For this reason, part of Orbis' research effort is devoted to forecasting currency trends. Taking into account these expected trends, the Portfolio Manager actively reviews the Fund's currency exposure. Those currencies held but considered vulnerable may be sold in favour of those considered more attractive.

The Fund's holdings usually differ meaningfully from the 60/40 Index.

As the Fund is less than five years old, it is too early to tell if it has met its objective. However, since inception the Fund has outperformed its benchmark net of fees, and we are confident the Fund will meet its objective over the long term. The Fund will experience periods of underperformance in pursuit of its long-term objective.

Risk/Reward Profile

- The Portfolio Manager aims to contain the risk of monetary loss to a level that is below the risk of loss experienced by global equity funds but higher than that experienced by government bond funds and cash deposits over the long term. Investors should be aware that this expected reduction in risk of loss comes at the expense of long-term expected return.

- Investments in the Fund may suffer capital loss.
- Investors should understand that the Portfolio Manager generally assesses an investment's attractiveness over a three-to-five year time horizon.

Management Fee

As is described in more detail in the Fund's Prospectus, the Fund's various share classes bear different management fees. The fees are designed to align the Manager's and Portfolio Manager's interests with those of investors in the Fund. With respect to the Fund's Investor Share Class, the fee is structured as follows: a fee is charged based on the net asset value of the class. The fee rate is calculated weekly by comparing the class' performance over three years against the 60/40 Index. For each percentage point of three year performance above or below that benchmark's performance, 0.04 percentage points are added to or subtracted from 1.5%, subject to the following limits:

- Maximum fee: 2.5% per annum
- Minimum fee: 0.5% per annum

For a description of the management fee borne by the Fund's other share classes, please refer to the Fund's Prospectus.

Fees, Expenses and Total Expense Ratio (TER)

The relevant class within the Fund bears all expenses payable by such class, which shall include but not be limited to fees payable to its Manager, Portfolio Manager and additional services providers, fees and expenses involved in registering and maintaining governmental registrations, taxes, duties and all other operating expenses, including the cost of buying and selling assets. However, the Manager and the Portfolio Manager have agreed that in the current calendar year, except for specified exclusions, operating expenses attributable to the Fund's Investor Share Class will be capped at 0.20%. Please refer to the Fund's Prospectus for a description of the fee cap applicable to its other share classes. Each cap will be automatically extended for further successive one year periods unless terminated by the Manager or the Portfolio Manager at least three months prior to the end of the then current term. The operating expenses that are capped are all expenses, excluding the Manager's and Portfolio Managers' fees described above under "Management Fee," the cost of buying and selling assets, interest and brokerage charges.

Where an investor subscribes or redeems an amount representing 5% or more of the net asset value of the Fund, the Manager may cause the Fund to levy a fee of 0.40% of the net asset value of the Fund's shares being acquired or redeemed.

The annual management fees charged are included in the TER. The TER is a measure of the actual expenses incurred by the class over a 12 month period, excluding trading costs. Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns. Expenses may vary, so the current TER is not a reliable indicator of future TERs.

Notices

UCITS V Disclosure for the Orbis SICAV Funds

The UCITS V Directive came into force in Luxembourg on 1 June 2016 (the "Effective Date"). The general objectives of UCITS V are to increase protection and transparency for investors by (i) enhancing the rules on the responsibilities of fund depositaries, (ii) introducing remuneration policy requirements, and (iii) imposing a rigorous and uniform sanctions regime across EU Member States.

Under the new rules, UCITS funds must appoint a single authorised depositary responsible for, among other things, safekeeping and segregation of fund assets, monitoring cash movements to and from the fund, and overseeing the performance of the fund manager's key functions. Importantly, under most circumstances, depositaries now have strict liability for the loss of any fund assets held in custody.

To reflect the new rules, Citibank Europe plc, Luxembourg Branch, the entity serving as the Orbis SICAV's custodian, paying agent, administrator, domiciliary, registrar and transfer agent was appointed by the Orbis SICAV in the role of depositary. Accordingly, the Custodian and Paying Agent Services Agreement dated 20 August 2007 has been amended and restated. To compensate Citibank for the expansion of its role and potential liability, an annual fee of 0.25 bps (or 0.0025%) of assets under management has been payable by the Orbis SICAV funds since the Effective Date.

Returns are net of Investor Share Class fees, include income and assume reinvestment of dividends. Figures quoted are for the periods indicated for a \$10,000 investment (lump sum, for illustrative purposes only). Annualised returns show the average amount earned on an investment in the Fund/share class each year over the given time period. This Report does not constitute advice nor a recommendation to buy, sell or hold, nor an offer to sell or a solicitation to buy interests or shares in the Orbis Funds or other securities in the companies mentioned in it.

Collective Investment Schemes (CIS) are generally medium to long-term investments. The value of an investment in the Fund may go down as well as up, and past performance is not a reliable indicator of future results. Neither the Manager nor the Portfolio Manager provides any guarantee with respect to capital or the Fund's returns. CIS are traded at ruling prices and can engage in borrowing and scrip lending. Commission and incentives may be paid by investors to third parties and, if so, would be included in the overall costs. Individual investors' performance may differ as a result of investment date, reinvestment date and dividend withholding tax, as well as a levy that may apply in the case of transactions representing more than 5% of the Fund's net asset value. The Fund may be closed to new investments at any time in order to be managed in accordance with its mandate. The Fund invests in foreign securities. Depending on their markets, trading in those securities may carry risks relating to, among others, macroeconomic and political circumstances, constraints on liquidity or the repatriation of funds, foreign exchange rate fluctuations, taxation and trade settlement.

Fund Information

The benchmark is a composite index consisting of the MSCI World Index with net dividends reinvested (60%) and the JP Morgan Global Government Bond Index (40%).

Net Equity is Gross Equity minus stockmarket hedging. Fixed Income refers to fixed income instruments issued by corporate bodies, governments and other entities, such as bonds, money market instruments and cash and cash equivalents. Fixed Income regional allocation is based on the currency denomination of the instrument.

The country and currency classification for equity securities follows that of third party benchmark providers for comparability purposes. Based on a number of factors including the location of the underlying business, Orbis may consider a security's classification to be different and manage the Fund's exposures accordingly.

**Fund Minimum**

Minimum investment amounts in the Fund are specified in the Fund's Prospectus, provided that a new investor in the Orbis Funds must open an investment account with Orbis, which may be subject to minimum investment restrictions, country restrictions and/or other terms and conditions. For more information on opening an Orbis investment account, please visit www.orbis.com.

Clients investing via Allan Gray, which includes the Allan Gray Investment Platform, an Allan Gray investment pool or otherwise through Allan Gray Nominees, remain subject to the investment minimums specified by the applicable terms and conditions.
