

Our Thinking

The tech sector is better known for its hype than its bargains. Exhibit number one is the FANGs—Facebook, Amazon, Netflix, and Google (Alphabet)—which have become famous market darlings.

We are value-oriented investors, and over the past year we have held three of the four FANGs. More broadly, the Orbis Global Equity Strategy is overweight the Information Technology sector. How do we reconcile this with our contrarian philosophy?

When we say “contrarian”, we don’t mean blindly betting against the crowd. That would be as clever as driving on the wrong side of the road. To us, contrarian investing is about looking at the world through a different lens and digging deep into the fundamentals to find hidden value.

Over our 28-year history, we have often concluded that selected technology shares were undervalued. In fact, the Orbis Global Equity Strategy has been overweight the technology sector for most of its history. Technology companies can offer rapid growth and high profitability, while technology *stocks* are subject to short cycles of extreme sentiment. This combination often creates substantial discounts to intrinsic value—exactly the kind of opportunity we like to exploit.

A good example is Amazon. In early 2017 we built a significant position in the stock because we believed that the market was significantly undervaluing the growth potential and efficiency gains within its e-commerce business. In addition, we believed that the value of its Amazon Web Services segment—the world’s largest provider of cloud services, including almost all of Netflix’s backend infrastructure—was vastly underappreciated. Finally, we felt the long-term value of Amazon’s nascent advertising business was only beginning to be realised.

Sentiment can change quickly in technology, and it wasn’t long before the market’s expectations for growth and margin expansion had risen to a level where the business was no longer cheap compared to our view of its intrinsic value. While we were prepared to invest in Amazon for the long haul, we exited the position in late 2017 as our thesis unfolded more quickly than expected.

We are not always so lucky. In December, we spoke about Symantec, one of the world’s largest cybersecurity firms, which is a top 10 holding in the Orbis Global Equity Strategy. In early May, Symantec’s stock price plummeted almost 35% in a single day on the news that the board’s audit committee was investigating accounting concerns raised by a former employee. When the company held a belated Q&A the following week, they provided reassurance that the

impact would not be material, and the stock recovered slightly. This suggests that the market’s knee-jerk reaction may have been extreme. Based on what we know at this stage, Symantec shares continue to trade below our assessment of intrinsic value. However, the situation is fluid and only time will tell if our view is correct.

One of our newer holdings is Facebook, which is now a top 10 position in the Orbis Global Equity Strategy. Facebook users and shareholders alike were spooked to learn about the allegations that Cambridge Analytica may have obtained private data from around 87 million Facebook accounts. Facebook’s share price fell by about 20% following this news.

While this has been a major embarrassment for the company, we believe the market reaction has been excessive. If anything, greater regulatory scrutiny could actually yield some long-run benefits for the core business. If Facebook is prohibited from sharing its data with third parties, it may develop new methods of engagement that can produce greater opportunities to monetise its collection of differentiated, high-quality assets. These include Facebook, Instagram, and WhatsApp—all of which benefit from strong network effects. People want to join the social networks with the most users and companies want their ads to be seen by the most potential customers.

Facebook ticks both boxes. Along with Google, these two players alone account for more than 80% of global spending (excluding China) on digital ads. This creates another powerful feedback loop—the more ads, the more data on what works, and in turn the more compelling the experience becomes for both advertisers and users. As digital ad spending continues to grow, we believe that Facebook can grow the average revenue per user it generates through advertising. Additionally, we think that the market underappreciates the long-term monetisation potential of Instagram and WhatsApp.

These tepid expectations are reflected in the price. Facebook’s valuation today is only slightly more expensive than the average stock in the S&P 500, but we expect it to compound earnings over the next five years at a much greater rate than the market. We have long been bullish on the company’s prospects and have owned the shares at various times since our initial purchase in 2013. More recently, after a period of sideways performance, we welcomed the opportunity to buy back into the shares.

More broadly, we expect that the technology sector will remain a rich source of idiosyncratic opportunities to purchase stocks at a discount to intrinsic value—just as it has been in the past.

This report does not constitute a recommendation to buy, sell or hold any interests, shares or other securities in the companies mentioned in it nor does it constitute financial advice.

Orbis SICAV Global Balanced Fund

The Fund seeks to balance appreciation of capital, income generation and risk of loss with a diversified global portfolio of equity, fixed income and commodity-linked instruments. It aims to earn higher long-term returns than its benchmark, which is comprised of 60% MSCI World Index with net dividends reinvested and 40% JP Morgan Global Government Bond Index ("60/40 Index"), each in US dollars.

Growth of US\$10,000 investment, net of fees, dividends reinvested

Fund Objective and Benchmark

The Fund seeks to balance appreciation of capital, income generation and risk of loss with a diversified global portfolio. It aims for higher long-term returns than its designated combined equity and bond performance benchmark, which is comprised of 60% MSCI World Index with net dividends reinvested and 40% JP Morgan Global Government Bond Index, each expressed in US\$ (the "60/40 Index").

How We Aim to Achieve the Fund's Objective/Adherence to Objective

The Fund is actively managed and invests in equities, fixed income instruments and commodity-linked instruments. Fund weightings among the different asset classes are determined based on their income, appreciation and risk of loss potential, with appropriate diversification. The Investment Manager may cause the Fund to be under or over the targets described in the remainder of this section when it considers this to be in the Fund's best interest.

Equities. The Investment Manager targets the Fund to hold 40-90% of its net asset value in a pool of global equities. The Fund invests in shares considered to offer fundamental value and dividend paying potential that is superior to its benchmark. The lower the price of a share as compared to its assessed intrinsic value, the more attractive Orbis considers the equity's fundamental value. The Investment Manager believes the main risk of investing in equities is that their prices will decline if relevant stockmarkets fall significantly. To reduce this risk, when Orbis' research suggests that stockmarkets are overvalued and vulnerable, the Investment Manager will reduce exposure to, or hedge, stockmarket risk. When Orbis' research suggests that stockmarkets represent good value, the Investment Manager will increase exposure to stockmarket risk by decreasing the amount of any hedging. The Fund may utilise exchange-traded derivatives for investment efficiency purposes by helping the Fund to be continuously fully exposed to equities (within the Investment Manager's targets) at all times. Furthermore, the Fund may buy and sell exchange-traded equity options for investment efficiency purposes, but only to the extent the Fund is capable of meeting its payment or delivery obligations related to such options, for example, by holding the underlying security.

Fixed Income Instruments. The Investment Manager targets the Fund to hold 10-50% of its net asset value in fixed income instruments issued by corporate bodies, governments and other entities. These are selected to provide current income, liquidity and portfolio diversification for the purpose of reducing risk of loss. When Orbis' research suggests that bond markets are overvalued and vulnerable, the Investment Manager will reduce exposure to, or hedge, bond market risk. When Orbis' research suggests that bond markets represent good value, the Investment Manager will increase exposure to bond market risk by decreasing the amount of that hedging. The Fund's fixed income selections in aggregate may differ significantly from the benchmark in duration and credit quality. In addition, the Fund may invest in money market instruments, cash and cash equivalents.

Commodity-linked Instruments. The Investment Manager targets the Fund to hold 0-10% of its net asset value in commodity-linked instruments, which may provide the Fund with indirect exposure to commodities. The Fund will gain exposure to commodities if the Investment Manager's investment research process identifies a commodity or class of commodities as being more attractive than overall equity and fixed income opportunities, taking into account any risk reduction benefits of diversification.

Exchange rate fluctuations significantly influence global investment returns. For this reason, part of Orbis' research effort is devoted to forecasting currency trends. Taking into account these expected trends, the Investment Manager actively reviews the Fund's currency exposure. Those currencies held but considered vulnerable may be sold in favour of those considered more attractive.

Since inception and over the latest five-year period, the Fund has outperformed its benchmark net of fees. The Fund will experience periods of underperformance in pursuit of its objective of creating long-term wealth for investors. The Fund's holdings usually differ meaningfully from the 60/40 Index.

Risk/Reward Profile

- The Investment Manager aims to contain the risk of monetary loss to a level that is below the risk of loss experienced by global equity funds but higher than that experienced by government bond funds and cash deposits over the long term. Investors should be aware that this expected reduction in risk of loss comes at the expense of long-term expected return.
- Investments in the Fund may suffer capital loss.
- Investors should understand that the Investment Manager generally assesses an investment's attractiveness over a three-to-five year time horizon.

Management Fee

As is described in more detail in the Fund's Prospectus, the Fund's various share classes bear different management fees. The fees are designed to align the Manager's and Investment Manager's interests with those of investors in the Fund. With respect to the Fund's Investor Share Class, the fee is structured as follows: a fee is charged based on the net asset value of the class. The fee rate is calculated weekly by comparing the class' performance over three years against the 60/40 Index. For each percentage point of three year performance above or below that benchmark's performance, 0.04 percentage points are added to or subtracted from 1.5%, subject to the following limits:

- Maximum fee: 2.5% per annum
- Minimum fee: 0.5% per annum

For a description of the management fee borne by the Fund's other share classes, please refer to the Fund's Prospectus.

Fees, Expenses and Total Expense Ratio (TER)

The relevant class within the Fund bears all expenses payable by such class, which shall include but not be limited to fees payable to its Manager, Investment Manager and additional services providers, fees and expenses involved in registering and maintaining governmental registrations, taxes, duties and all other operating expenses, including the cost of buying and selling assets. However, the Manager and the Investment Manager have agreed that in the current calendar year, except for specified exclusions, operating expenses attributable to the Fund's Investor Share Class will be capped at 0.20%. Please refer to the Fund's Prospectus for a description of the fee cap applicable to its other share classes. Each cap will be automatically extended for further successive one year periods unless terminated by the Manager or the Investment Manager at least three months prior to the end of the then current term. The operating expenses that are capped are all expenses, excluding the Manager's and Investment Managers' fees described above under "Management Fee," the cost of buying and selling assets, interest and brokerage charges.

Where an investor subscribes or redeems an amount representing 5% or more of the net asset value of the Fund, the Manager may cause the Fund to levy a fee of 0.40% of the net asset value of the Fund's shares being acquired or redeemed.

The annual management fees charged are included in the TER. The TER is a measure of the actual expenses incurred by the class over a 12 month period, excluding trading costs. Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns. Expenses may vary, so the current TER is not a reliable indicator of future TERs.

Additional Information

South African residents should contact Allan Gray Unit Trust Management (RF) Proprietary Limited at 0860 000 654 (toll free from within South Africa) or offshore_direct@allangray.co.za to receive, free of charge, additional information about a proposed investment (including prospectus, application forms, annual reports and a schedule of fees, charges and maximum commissions). The Investment Manager can be contacted at +1 441 296 3000 or clientservice@orbis.com. The Fund's Depository is Citibank Europe plc, Luxembourg Branch, 31 Z.A. Bourmicht, L-8070 Bertrange, Luxembourg. All information provided herein is subject to the more detailed information provided in the Fund's Prospectus.

Share Price and Transaction Cut Off Times

Share prices are calculated on a net asset value basis by share class, normally as of 5:30 pm (Bermuda time) (i) in the case of the Investor Share Class and Institutional Investor Share Class, each Thursday (or, if a Thursday is not a business day, the preceding business day), (ii) in the case of the Refundable Reserve Fee Share Classes, the first Thursday of each calendar month and any other Thursday on which an investor transacts in such class (or, if a Thursday is not a business day, the preceding business day), (iii) on the last calendar day of each month (or, if that is not a weekday, the preceding weekday) and/or (iv) any other days in addition to (or substitution for) any of the days described in (i), (ii) or (iii), as determined by the Manager without notice.

Subscriptions are only valid if made on the basis of the Fund's current Prospectus. To be processed on a given dealing day: subscription requests into an Orbis Fund that is not an Orbis SICAV Fund must be submitted by 5:00 pm on that dealing day; subscription requests into an Orbis Fund that is an Orbis SICAV Fund must be submitted by 5:30 pm; redemption requests from an Orbis Fund that is not an Orbis SICAV Fund must be submitted by 12 noon; redemption requests from an Orbis Fund that is an Orbis SICAV Fund must be submitted by 5:30 pm; requests to switch from an Orbis Fund that is not an Orbis SICAV Fund to a different Orbis Fund that is also not an Orbis SICAV Fund must be submitted by 12 noon; requests to switch from an Orbis SICAV Fund into a different Orbis Fund that is not an Orbis SICAV Fund must be submitted by 5:00 pm; requests to switch from an Orbis Fund that is not an Orbis SICAV Fund to a different Orbis Fund that is an Orbis SICAV Fund must be submitted by 12 noon; and requests to switch from an Orbis Fund that is an Orbis SICAV Fund to a different Orbis Fund that is also an Orbis SICAV Fund must be submitted by 5:30 pm. All times given are Bermuda time, and all requests must be properly completed and accompanied by any required funds and/or information.

Share prices, updated weekly, are available

Legal Notices

Returns are net of Investor Share Class fees, include income and assume reinvestment of dividends. Figures quoted are for the periods indicated for a \$10,000 investment (lump sum, for illustrative purposes only). Annualised returns show the average amount earned on an investment in the Fund/share class each year over the given time period. This Report does not constitute advice nor a recommendation to buy, sell or hold, nor an offer to sell or a solicitation to buy interests or shares in the Orbis Funds or other securities in the companies mentioned in it.

Collective Investment Schemes (CIS) are generally medium to long-term investments. The value of an investment in the Fund may go down as well as up, and past performance is not a reliable indicator of future results. Neither the Manager nor the Investment Manager provides any guarantee with respect to capital or the Fund's returns. CIS are traded at ruling prices and can engage in borrowing and scrip lending. Commission and incentives may be paid by investors to third parties and, if so, would be included in the overall costs. Individual investors' performance may differ as a result of investment date, reinvestment date and dividend withholding tax, as well as a levy that may apply in the case of transactions representing more than 5% of the Fund's net asset value. The Fund may be closed to new investments at any time in order to be managed in accordance with its mandate. The Fund invests in foreign securities. Depending on their markets, trading in those securities may carry risks relating to, among others, macroeconomic and political circumstances, constraints on liquidity or the repatriation of funds, foreign exchange rate fluctuations, taxation and trade settlement.

The discussion topics for the commentaries were selected, and the commentaries were finalised and approved, by Orbis Investment Management Limited, the Fund's Investment Manager. Information in this Report is based on sources believed to be accurate and reliable and provided "as is" and in good faith. The Orbis Group does not make any representation or warranty as to accuracy, reliability, timeliness or completeness of the information in this Report. The Orbis Group disclaims all liability (whether arising in contract, tort, negligence or otherwise) for any error, omission, loss or damage (whether direct, indirect, consequential or otherwise) in connection with the information in this Report.

Fund Information

The benchmark is a composite index consisting of the MSCI World Index with net dividends reinvested (60%) and the JP Morgan Global Government Bond Index (40%).

Net Equity is Gross Equity minus stockmarket hedging. Fixed Income refers to fixed income instruments issued by corporate bodies, governments and other entities, such as bonds, money market instruments and cash and cash equivalents. Fixed Income regional allocation is based on the currency denomination of the instrument. Net Fixed Income is Gross Fixed Income minus bond market hedging.

Fund Minimum

Minimum investment amounts in the Fund are specified in the Fund's Prospectus, provided that a new investor in the Orbis Funds must open an investment account with Orbis, which may be subject to minimum investment restrictions, country restrictions and/or other terms and conditions. For more information on opening an Orbis investment account, please visit www.orbis.com.

Clients investing via Allan Gray, which includes the Allan Gray Investment Platform, an Allan Gray investment pool or otherwise through Allan Gray Nominees, remain subject to the investment minimums specified by the applicable terms and conditions.

Sources

The 60/40 Index returns are calculated by Orbis using end of day index level values licensed from MSCI ("MSCI Data"). For the avoidance of doubt, MSCI is not the benchmark "administrator" for, or a "contributor", "submitter" or "supervised contributor" to, the blended returns, and the MSCI Data is not considered a "contribution" or "submission" in relation to the blended returns, as those terms may be defined in any rules, laws, regulations, legislation or international standards.
