

Our Thinking

Macro noises

As bottom-up stockpickers, we don't spend much of our time analysing macroeconomic or political headlines. We believe we can do a better job by focusing on the fundamentals of individual businesses. But we can't afford to bury our heads in the sand like ostriches. It would be foolish to ignore economic or political developments that might have a meaningful impact on the value of companies that we are analysing.

The looming trade war between the US and most everyone else is a good example. It reached a new pitch earlier this year when the US imposed taxes on steel and aluminium imports from many countries including China, allies in the EU, Japan, and Korea, and hitherto trade partners Canada and Mexico. The EU retaliated with tariffs on American products including bourbon, blue jeans, and motorcycles, and China imposed tariffs on pork, fruit, steel pipes, and ethanol from the US. That exchange started a rally of retaliation and escalation, and the US is now proposing tariffs on \$200bn worth of Chinese imports, a threat China is prepared to counter.

For China, a trade spat would be one thing if the economy were in great health, but with noise of a slowdown growing louder, the trade war could upend the country's economic balance. We can see the same warning signs as everyone else—debt has risen rapidly, bad debt is mounting, growth is slowing, and the country's investments in infrastructure may be too excessive to be effective.

We don't know how the trade war or the Chinese economic situation will play out, and we certainly have no idea what is in President Trump's head. Perhaps more importantly, we have no "house view" on these issues. Instead, our analysts form independent views of how these macro events could affect the fundamentals of the companies they research.

What we own

Not all Chinese businesses are equally vulnerable to a slowdown. Consider NetEase, a Chinese online game and internet company. Entertainment spending is discretionary, and so likely to fall if growth slows. But *which* entertainment spending? If you are feeling pinched, you may cut down on relatively expensive nights out before dropping your relatively cheap Netflix subscription. Like Netflix, the games NetEase produces are an incredibly cheap form of entertainment, so we believe the company's earnings should be relatively resilient in a macro slowdown. Slowdown or no slowdown, NetEase has a loyal client base, a strong balance sheet with close to 20% of its market capitalisation in cash, an exciting game pipeline, and an effective management team. As a result, we believe any macro issues in China are more likely to hurt sentiment than the company's long-term intrinsic value. We continue to find the stock

attractive, and we added to the Funds' positions after share price weakness earlier this year.

But in some cases, macroeconomic concerns are real issues for companies' fundamentals. For example, tariffs could substantially impact Japanese automaker Nissan Motor. We bought the stock because it traded at a huge discount to the Japanese market, and its earnings appeared to be depressed. We believed that discount was unwarranted. In our view, the company had solid growth prospects in emerging markets, favourable cost-cutting opportunities thanks to a well-timed investment in Mitsubishi Motors, and scope for an earnings recovery in the US by reducing promotional price deals there. But as most of Nissan's US sales are imported, the tariff threat widened the range of possible outcomes for the business, at a time when we were already losing conviction due to the company's struggles with pricing in that market. We sold most of the Funds' shares in the company in favour of companies with similar valuations where we have more conviction. As tariff developments continue to change, we continue to assess their impact on the business.

Macroeconomic concerns can also affect companies that are neither in China nor directly exposed to tariffs. With China consuming roughly half of the world's production in steel, coal, copper, and nickel, a prolonged slowdown could severely impact mining businesses. Accordingly, we assess these companies' exposure to China and whether that risk is already factored into the market's valuation. The Funds continue to hold positions in Vale, Mitsubishi, Sumitomo, Peabody Energy, and Mitsui, at weights that balance the companies' risks against their generally low valuations.

What we don't own

As important as what we own is what we don't own. While we still like selected companies with exposure to China and trade issues, the Funds do not own any of the country's banks, steelmakers, or aluminium producers. Many of these companies appear superficially cheap, but in our view, they may be cheap for good reason.

And while we still like selected Chinese equities, our exposure to the Chinese yuan is largely hedged in our Global Equity and Global Balanced Strategies. China's debt-fuelled investment poses a significant risk to the country's banking system, and should a banking crisis unfold, China's central bank would likely respond with monetary easing, which ought to devalue the currency.

We can't control the macro environment or the noise around it, but the resulting pessimism can create opportunities for contrarians to invest in good companies at temporarily depressed prices. That's why we continue to spend the vast majority of our time focusing on what we *can* control—the price we pay for individual securities.

This report does not constitute a recommendation to buy, sell or hold any interests, shares or other securities in the companies mentioned in it nor does it constitute financial advice.

Orbis SICAV Global Balanced Fund

The Fund seeks to balance appreciation of capital, income generation and risk of loss with a diversified global portfolio of equity, fixed income and commodity-linked instruments. It aims to earn higher long-term returns than its benchmark, which is comprised of 60% MSCI World Index with net dividends reinvested and 40% JP Morgan Global Government Bond Index ("60/40 Index"), each in US dollars.

Fund Objective and Benchmark

The Fund seeks to balance appreciation of capital, income generation and risk of loss with a diversified global portfolio. It aims for higher long-term returns than its designated combined equity and bond performance benchmark, which is comprised of 60% MSCI World Index with net dividends reinvested and 40% JP Morgan Global Government Bond Index, each expressed in US\$ (the "60/40 Index").

How We Aim to Achieve the Fund's Objective/Adherence to Objective

The Fund is actively managed and invests in equities, fixed income instruments and commodity-linked instruments. Fund weightings among the different asset classes are determined based on their income, appreciation and risk of loss potential, with appropriate diversification. The Investment Manager may cause the Fund to be under or over the targets described in the remainder of this section when it considers this to be in the Fund's best interest.

Equities. The Investment Manager targets the Fund to hold 40-90% of its net asset value in a pool of global equities. The Fund invests in shares considered to offer fundamental value and dividend paying potential that is superior to its benchmark. The lower the price of a share as compared to its assessed intrinsic value, the more attractive Orbis considers the equity's fundamental value. The Investment Manager believes the main risk of investing in equities is that their prices will decline if relevant stockmarkets fall significantly. To reduce this risk, when Orbis' research suggests that stockmarkets are overvalued and vulnerable, the Investment Manager will reduce exposure to, or hedge, stockmarket risk. When Orbis' research suggests that stockmarkets represent good value, the Investment Manager will increase exposure to stockmarket risk by decreasing the amount of any hedging. The Fund may utilise exchange-traded derivatives for investment efficiency purposes by helping the Fund to be continuously fully exposed to equities (within the Investment Manager's targets) at all times. Furthermore, the Fund may buy and sell exchange-traded equity options for investment efficiency purposes, but only to the extent the Fund is capable of meeting its payment or delivery obligations related to such options, for example, by holding the underlying security.

Fixed Income Instruments. The Investment Manager targets the Fund to hold 10-50% of its net asset value in fixed income instruments issued by corporate bodies, governments and other entities. These are selected to provide current income, liquidity and portfolio diversification for the purpose of reducing risk of loss. When Orbis' research suggests that bond markets are overvalued and vulnerable, the Investment Manager will reduce exposure to, or hedge, bond market risk. When Orbis' research suggests that bond markets represent good value, the Investment Manager will increase exposure to bond market risk by decreasing the amount of that hedging. The Fund's fixed income selections in aggregate may differ significantly from the benchmark in duration and credit quality. In addition, the Fund may invest in money market instruments, cash and cash equivalents.

Commodity-linked Instruments. The Investment Manager targets the Fund to hold 0-10% of its net asset value in commodity-linked instruments, which may provide the Fund with indirect exposure to commodities. The Fund will gain exposure to commodities if the Investment Manager's investment research process identifies a commodity or class of commodities as being more attractive than overall equity and fixed income opportunities, taking into account any risk reduction benefits of diversification.

Exchange rate fluctuations significantly influence global investment returns. For this reason, part of Orbis' research effort is devoted to forecasting currency trends. Taking into account these expected trends, the Investment Manager actively reviews the Fund's currency exposure. Those currencies held but considered vulnerable may be sold in favour of those considered more attractive.

Since inception, the Fund has outperformed its benchmark net of fees. The Fund will experience periods of underperformance in pursuit of its objective of creating long-term wealth for investors. The Fund's holdings usually differ meaningfully from the 60/40 Index.

Risk/Reward Profile

- The Investment Manager aims to contain the risk of monetary loss to a level that is below the risk of loss experienced by global equity funds but higher than that experienced by government bond funds and cash deposits over the long term. Investors should be aware that this expected reduction in risk of loss comes at the expense of long-term expected return.
- Investments in the Fund may suffer capital loss.
- Investors should understand that the Investment Manager generally assesses an investment's attractiveness over a three-to-five year time horizon.

Management Fee

As is described in more detail in the Fund's Prospectus, the Fund's various share classes bear different management fees. The fees are designed to align the Manager's and Investment Manager's interests with those of investors in the Fund. With respect to the Fund's Investor Share Class, the fee is structured as follows: a fee is charged based on the net asset value of the class. The fee rate is calculated weekly by comparing the class' performance over three years against the 60/40 Index. For each percentage point of three year performance above or below that benchmark's performance, 0.04 percentage points are added to or subtracted from 1.5%, subject to the following limits:

- Maximum fee: 2.5% per annum
- Minimum fee: 0.5% per annum

For a description of the management fee borne by the Fund's other share classes, please refer to the Fund's Prospectus.

Fees, Expenses and Total Expense Ratio (TER)

The relevant class within the Fund bears all expenses payable by such class, which shall include but not be limited to fees payable to its Manager, Investment Manager and additional services providers, fees and expenses involved in registering and maintaining governmental registrations, taxes, duties and all other operating expenses, including the cost of buying and selling assets. However, the Manager and the Investment Manager have agreed that in the current calendar year, except for specified exclusions, operating expenses attributable to the Fund's Investor Share Class will be capped at 0.20%. Please refer to the Fund's Prospectus for a description of the fee cap applicable to its other share classes. Each cap will be automatically extended for further successive one year periods unless terminated by the Manager or the Investment Manager at least three months prior to the end of the then current term. The operating expenses that are capped are all expenses, excluding the Manager's and Investment Managers' fees described above under "Management Fee," the cost of buying and selling assets, interest and brokerage charges.

Where an investor subscribes or redeems an amount representing 5% or more of the net asset value of the Fund, the Manager may cause the Fund to levy a fee of 0.40% of the net asset value of the Fund's shares being acquired or redeemed.

The annual management fees charged are included in the TER. The TER is a measure of the actual expenses incurred by the class over a 12 month period, excluding trading costs. Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns. Expenses may vary, so the current TER is not a reliable indicator of future TERs.

Past performance is not a reliable indicator of future results. Orbis Fund share prices fluctuate and are not guaranteed. Returns may decrease or increase as a result of currency fluctuations. When making an investment in the Funds, an investor's capital is at risk.

Orbis SICAV Global Balanced Fund

Additional Information

South African residents should contact Allan Gray Unit Trust Management (RF) Proprietary Limited at 0860 000 654 (toll free from within South Africa) or offshore_direct@allangray.co.za to receive, free of charge, additional information about a proposed investment (including prospectus, application forms, annual reports and a schedule of fees, charges and maximum commissions). The Investment Manager can be contacted at +1 441 296 3000 or clientservice@orbis.com. The Fund's Depository is Citibank Europe plc, Luxembourg Branch, 31 Z.A. Bourmicht, L-8070 Bertrange, Luxembourg. All information provided herein is subject to the more detailed information provided in the Fund's Prospectus.

Share Price and Transaction Cut Off Times

Share prices are calculated on a net asset value basis by share class, normally as of 5:30 pm (Bermuda time) (i) in the case of the Investor Share Class and Institutional Investor Share Class, each Thursday (or, if a Thursday is not a business day, the preceding business day), (ii) in the case of the Refundable Reserve Fee Share Classes, the first Thursday of each calendar month and any other Thursday on which an investor transacts in such class (or, if a Thursday is not a business day, the preceding business day), (iii) on the last calendar day of each month (or, if that is not a weekday, the preceding weekday) and/or (iv) any other days in addition to (or substitution for) any of the days described in (i), (ii) or (iii), as determined by the Manager without notice.

Subscriptions are only valid if made on the basis of the Fund's current Prospectus. To be processed on a given dealing day: subscription requests into an Orbis Fund that is not an Orbis SICAV Fund must be submitted by 5:00 pm on that dealing day; subscription requests into an Orbis Fund that is an Orbis SICAV Fund must be submitted by 5:30 pm; redemption requests from an Orbis Fund that is not an Orbis SICAV Fund must be submitted by 12 noon; redemption requests from an Orbis Fund that is an Orbis SICAV Fund must be submitted by 5:30 pm; requests to switch from an Orbis Fund that is not an Orbis SICAV Fund to a different Orbis Fund that is also not an Orbis SICAV Fund must be submitted by 12 noon; requests to switch from an Orbis SICAV Fund into a different Orbis Fund that is not an Orbis SICAV Fund must be submitted by 5:00 pm; requests to switch from an Orbis Fund that is not an Orbis SICAV Fund to a different Orbis Fund that is an Orbis SICAV Fund must be submitted by 12 noon; and requests to switch from an Orbis Fund that is an Orbis SICAV Fund to a different Orbis Fund that is also an Orbis SICAV Fund must be submitted by 5:30 pm. All times given are Bermuda time, and all requests must be properly completed and accompanied by any required funds and/or information.

Share prices, updated weekly, are available

Legal Notices

Returns are net of Investor Share Class fees, include income and assume reinvestment of dividends. Figures quoted are for the periods indicated for a \$10,000 investment (lump sum, for illustrative purposes only). Annualised returns show the average amount earned on an investment in the Fund/share class each year over the given time period. This Report does not constitute advice nor a recommendation to buy, sell or hold, nor an offer to sell or a solicitation to buy interests or shares in the Orbis Funds or other securities in the companies mentioned in it.

Collective Investment Schemes (CIS) are generally medium to long-term investments. The value of an investment in the Fund may go down as well as up, and past performance is not a reliable indicator of future results. Neither the Manager nor the Investment Manager provides any guarantee with respect to capital or the Fund's returns. CIS are traded at ruling prices and can engage in borrowing and scrip lending. Commission and incentives may be paid by investors to third parties and, if so, would be included in the overall costs. Individual investors' performance may differ as a result of investment date, reinvestment date and dividend withholding tax, as well as a levy that may apply in the case of transactions representing more than 5% of the Fund's net asset value. The Fund may be closed to new investments at any time in order to be managed in accordance with its mandate. The Fund invests in foreign securities. Depending on their markets, trading in those securities may carry risks relating to, among others, macroeconomic and political circumstances, constraints on liquidity or the repatriation of funds, foreign exchange rate fluctuations, taxation and trade settlement.

The discussion topics for the commentaries were selected, and the commentaries were finalised and approved, by Orbis Investment Management Limited, the Fund's Investment Manager. Information in this Report is based on sources believed to be accurate and reliable and provided "as is" and in good faith. The Orbis Group does not make any representation or warranty as to accuracy, reliability, timeliness or completeness of the information in this Report. The Orbis Group disclaims all liability (whether arising in contract, tort, negligence or otherwise) for any error, omission, loss or damage (whether direct, indirect, consequential or otherwise) in connection with the information in this Report.

Fund Information

The benchmark is a composite index consisting of the MSCI World Index with net dividends reinvested (60%) and the JP Morgan Global Government Bond Index (40%).

Net Equity is Gross Equity minus stockmarket hedging. Fixed Income refers to fixed income instruments issued by corporate bodies, governments and other entities, such as bonds, money market instruments and cash and cash equivalents. Fixed Income regional allocation is based on the currency denomination of the instrument. Net Fixed Income is Gross Fixed Income minus bond market hedging.

Fund Minimum

Minimum investment amounts in the Fund are specified in the Fund's Prospectus, provided that a new investor in the Orbis Funds must open an investment account with Orbis, which may be subject to minimum investment restrictions, country restrictions and/or other terms and conditions. For more information on opening an Orbis investment account, please visit www.orbis.com.

Clients investing via Allan Gray, which includes the Allan Gray Investment Platform, an Allan Gray investment pool or otherwise through Allan Gray Nominees, remain subject to the investment minimums specified by the applicable terms and conditions.
