

## Orbis Global Balanced

When we set up the Orbis Global Balanced Strategy ten years ago, we wanted to do a conventional thing in an unconventional way. Our aim was to generate pleasing returns with a moderate risk profile. That's conventional. But rather than looking to asset class decisions as the key driver of returns, we built the strategy to draw on our core skills: in-depth company research and bottom-up security selection.

That has always been built into the structure of the Strategy. At inception, we knew what we thought of the opportunity set in 2013, but we did not know what the market would throw at us over the next ten years—let alone the environments future generations of Orbis investors will face over the next fifty. Reflecting that uncertainty, the Strategy has always had wide flexibility in its asset class exposures. Not because we want to tactically flip between equities and bonds, but because we never want our clients to be stuck holding unattractive securities simply to meet an asset class target. For us, the key question has never been how much of the portfolio to have in equities or bonds, but which equities and bonds are attractive enough to win the bottom-up competition for our clients' capital.

Ten years later, that concept has been borne out—a bottom-up approach to multi-asset investing can work. That is not to say returns since inception have been up to our standards. They haven't been, and over the long term we believe we can deliver significantly higher relative returns than clients have experienced thus far. But encouragingly, security selection has been by far the biggest driver of relative returns, putting paid to the notion that security selection is just a garnish on the side of asset class calls.

Both asset class exposures and our individual holdings have evolved substantially over the past ten years, though that is easy to miss amid smaller month-to-month changes.

At inception, the biggest overweight in the portfolio was to technology stocks. The second largest was to telecommunications companies, which represented five of the top ten holdings. Energy holdings were just 7% of the portfolio, similar to the Strategy's benchmark. Over 85% of the portfolio was invested in selected equities, with just 10% in fixed income, and nothing in sovereign bonds.

Today, technology and communication services are among the biggest underweights in the Strategy, while energy and industrials are the largest concentrations. 75% of the portfolio is invested in our favourite shares, with nearly 20% in fixed income, and just under 10% in sovereign bonds.

As the opportunity set has changed, so has the portfolio—a reflection of our active approach. The three greatest shifts have been the rise in bond yields, the dominance of the US stockmarket, and the wide disparity in the price of cheap versus expensive businesses.

In 2013, global government bonds were priced for a yield of 1.8% per annum to maturity, a level we regarded as return-free risk. Yet for most of the Strategy's history, bond prices rose, pushing yields as low as 0.4% in 2020. We know we must have sounded like Cassandra! Our fear of inflation and higher interest rates hurt performance for eight of the first ten years. More recently, being attuned to those risks has protected clients as synchronised drawdowns in equity and bond markets have led to the worst year in decades for passive balanced portfolios. Global government bonds now yield about 3%, and we believe inflation-linked and corporate bonds are now attractive enough to warrant substantial portions of our clients' capital. We have never hated bonds; we just hated their prices.

The dominance of the US stockmarket and the ascendance of its valuations has been another major shift. Back in 2013, global equity indices were more than just pale imitations of the S&P 500—the US represented just half of world stockmarkets, versus 70% today. Much of that dominance has come from rising valuations, with the S&P going from 12 times earnings in 2013 to a peak of 24 times in 2021, as corporate profits reached record levels. We have never liked paying inflated multiples of record profits, so we have found other regions more fertile hunting grounds for ideas. That has hurt performance to date, but should be rewarding if the US market comes back to earth.

The last great shift over the past decade has been the yawning gap between the prices of cheaply versus richly valued shares. Life is frustrating for a contrarian investor when prices move further and further away from fundamental value, as they have for much of the Strategy's history. That gap reached record levels in 2021, and has started to relent—but only started. As things stand today, the valuation gap has only been wider in 21 months over the last 35 years, and most of those months were in 2020 and 2021.

## Orbis Global Balanced *(continued)*

We believe much of the complacency of the past decade is yet to be driven out. If we are right, that could continue to prove challenging for traditional portfolios, but should be rewarding for investors, who own reasonably priced businesses that generate lots of cash. That leaves us enthusiastic about the relative return potential of the Strategy in the years ahead.

We believe we are well placed to deliver on that opportunity. More than markets have changed over the last decade. Our team has, too. The multi-asset team now includes eight people, and each analyst has the flexibility to look across equities and fixed income, with backgrounds ranging from bond trading and equity analysis to law, journalism, and diplomacy. Far from having to canvass brokers to find corporate bonds, brokers now bring interesting bonds to us when they become available. And the team has fulfilled a personal goal of mine—to ensure that Global Balanced does not merely draw on the awesome resources of the wider Orbis investment team, but actively contributes to our efforts in other Strategies. It has been satisfying to see that happen, whether with credit experts helping us avoid vulnerable business in 2020, or seeing equity ideas researched by the multi-asset team bought in other portfolios. Along the way, we have built and refined our tools, setting us up to ensure that current and future generations of Orbis multi-asset investors can learn and thrive on behalf of clients. Having proved the concept over the last decade, we look forward to continuing to put it to work in the decades ahead.

# Orbis SICAV Global Balanced Fund

## Shared Investor Refundable Reserve Fee Share Class (A) ("Shared Investor RRF Class (A)")

The Fund is actively managed and seeks to balance investment returns and risk of loss with a diversified global portfolio of equity, fixed income and commodity-linked instruments. It aims to earn higher long-term returns than its benchmark ("Benchmark"), which is comprised of 60% MSCI World Index with net dividends reinvested and 40% JP Morgan Global Government Bond Index ("JPM GBI"), (together, "60/40 Index") each in US dollars.

### Growth of US\$10,000 investment, net of fees, dividends reinvested

The Shared Investor RRF Class (A) inception on 14 May 2020 (date indicated by dashed line above), but the Class continued to charge the fee that the Investor Share Class would have charged, reduced by 0.3% per annum,<sup>2</sup> from inception to 8 Sep 2022. Information for the Fund for the period before the inception of the Shared Investor RRF Class (A) relates to the Investor Share Class.

### Fund Objective and Benchmark

The Fund seeks to balance investment returns and risk of loss with a diversified global portfolio of equities, fixed income instruments and commodity-linked instruments. It aims for higher long-term returns than its designated combined equity and bond performance benchmark, which is comprised of 60% MSCI World Index with net dividends reinvested and 40% JP Morgan Global Government Bond Index, each expressed in US\$ (the “60/40 Index” or “benchmark”).

### How We Aim to Achieve the Fund’s Objective/Adherence to Objective

The Fund is actively managed and invests in equities, fixed income instruments and commodity-linked instruments. Fund weightings among the different asset classes are determined based on their appreciation, income and risk of loss potential, with appropriate diversification.

**Equities.** The Investment Manager targets the Fund to hold 40-90% of its net asset value in a pool of global equities, including some which may provide exposure to real estate. The Fund invests in shares considered to offer fundamental value and dividend paying potential that is superior to its benchmark. The lower the price of a share as compared to its assessed intrinsic value, the more attractive Orbis considers the equity’s fundamental value. The Investment Manager believes the main risk of investing in equities is that their prices will decline if relevant stockmarkets fall significantly. To reduce this risk, when Orbis’ research suggests that stockmarkets are overvalued and vulnerable, the Investment Manager may reduce exposure to, or hedge, stockmarket risk. When Orbis’ research suggests that stockmarkets represent good value, the Investment Manager may increase exposure to stockmarket risk by decreasing the amount of that hedging. The Investment Manager intends to limit the Fund’s exposure to stockmarkets net of hedging to 75% of its net asset value. Furthermore, the Fund may buy and sell exchange-traded equity call and put options for investment efficiency purposes, but only to the extent the Fund is capable of meeting its payment or delivery obligations related to such options, for example, by holding the underlying security.

**Fixed Income Instruments.** The Investment Manager targets the Fund to hold 10-50% of its net asset value in fixed income instruments issued by corporate bodies, governments and other entities. These are selected – like equities – with the aim of increasing the Fund’s overall risk-adjusted return. Characteristics such as yield, liquidity and potential diversification benefits are viewed in the context of the risk and reward of the portfolio as a whole. When Orbis’ research suggests that bond markets are overvalued and vulnerable, the Investment Manager may reduce exposure to, or hedge, bond market risk. When Orbis’ research suggests that bond markets represent stronger value, the Investment Manager may increase exposure to bond market risk by decreasing the amount of that hedging. The Investment Manager intends to limit aggregate hedging of the Fund’s stockmarket and bond market exposure to no more than 30% of its net asset value. Importantly, the Investment Manager may cause the Fund to be over this hedging target, at times meaningfully so and/or for extended periods of time where it considers this to be in the best interest of the Fund. The Fund’s fixed income selections in aggregate may differ significantly from the benchmark in duration and credit quality and may include securities of issuers that are under bankruptcy or similar judicial reorganisation, notably distressed debt. In addition, the Fund may invest in money market instruments, cash, cash equivalents and high yield bonds.

**Commodity-linked Instruments.** The Investment Manager targets the Fund to hold 0-10% of its net asset value in commodity-linked instruments, which may provide the Fund with indirect exposure to commodities. The Fund will gain exposure to commodities if the Investment Manager’s investment research process identifies a commodity or class of commodities as being more attractive than overall equity and fixed income opportunities, taking into account any risk reduction benefits of diversification.

Exchange rate fluctuations significantly influence global investment returns. For this reason, part of Orbis’ research effort is devoted to forecasting currency trends. Taking into account these expected trends, Orbis actively reviews the Fund’s currency exposure. In doing so, it places particular focus on managing the Fund’s exposure to those currencies less likely to hold their long-term value.

The Investment Manager may cause the Fund to be under or over the asset allocation and hedging targets and limits described above where it considers this to be in the best interest of the Fund. The Fund’s holdings may deviate meaningfully from the 60/40 Index.

The net returns of the Shared Investor RRF Class (A) from its inception on 14 May 2020, stitched with the net returns of the Investor Share Class from the Fund’s inception to 14 May 2020, have outperformed the Performance Fee Benchmark of the classes. The Fund will experience periods of underperformance in pursuit of its long-term objective.

### Management Fee

As is described in more detail in the Fund’s Prospectus, the Fund’s various share classes bear different management fees. The fees are designed to align the Manager’s and Investment Manager’s interests with those of investors in the Fund.

The Shared Investor RRF Class (A)’s management fee is charged as follows:

- **Base Fee:** Calculated and accrued daily at a rate of 0.8% per annum of the Class’ net asset value. Investors separately pay an administrative fee directly to Allan Gray Proprietary Limited or one of its affiliates. The Investment Manager or one of its affiliates is entitled to receive a separate fee from Allan Gray Proprietary Limited or one of its affiliates in connection with this administrative fee, related to services the Investment Manager and its affiliates provide to Allan Gray Proprietary Limited or its affiliates.
- **Refundable Performance Fee:** When the performance of the Shared Investor RRF Class (A) (after deducting the Base Fee and an additional 0.3% per annum, which is deemed to be representative of the aforementioned administrative fee) beats the Performance Fee Benchmark over the period from one dealing day to the next, 25% of the value of the outperformance is paid into a reserve and reinvested into the Fund. If the value of the reserve is positive on any dealing day, the Investment Manager is entitled to a performance fee in an amount capped at the lesser of an annualised rate of (a) one-third of the reserve’s net asset value and (b) 2.5% of the net asset value of the Shared Investor RRF Class (A). Fees paid from the reserve to the Investment Manager are not available to be refunded as described below.

When the performance of the Shared Investor RRF Class (A) (after deducting the Base Fee and the aforementioned additional 0.3% per annum) trails the Performance Fee Benchmark over the period from one dealing day to the next, 25% of the value of the underperformance is refunded from the reserve to the Shared Investor RRF Class (A). If at any time sufficient value does not exist in the reserve to provide the refund, a reserve recovery mark is set, and subsequent underperformance is tracked. Such relative losses must be recovered before any outperformance results in any payment to the reserve.

Prior to 8 Sep 2022, the Shared Investor RRF Class (A) charged the fee that the Investor Share Class would have charged, reduced by 0.3% per annum. Numerous investors switched to the Shared Investor RRF Class (A) from the Investor Share Class. This temporary measure ensured that the fees paid by investors accounted for underperformance experienced by the Investor Share Class before the inception date of the Shared Investor RRF Class (A).

Please review the Fund’s prospectus for additional detail and for a description of the management fee borne by the Fund’s other share classes.

# Orbis SICAV Global Balanced Fund

## Shared Investor Refundable Reserve Fee Share Class (A) (“Shared Investor RRF Class (A)”)

### Fees, Expenses and Total Expense Ratio (TER)

The relevant class within the Fund bears all expenses payable by such class, which shall include but not be limited to fees payable to its Manager, Investment Manager and additional services providers, fees and expenses involved in registering and maintaining governmental registrations, taxes, duties and all other operating expenses, including the cost of buying and selling assets. However, the Manager and the Investment Manager have agreed that in the current calendar year, except for specified exclusions, operating expenses attributable to the Fund's Shared Investor RRF Class (A) will be capped at 0.20%. Please refer to the Fund's Prospectus for a description of the fee cap applicable to its other share classes. Each cap will be automatically extended for further successive one year periods unless terminated by the Manager or the Investment Manager at least three months prior to the end of the then current term. The operating expenses that are capped are all expenses, excluding the Manager's and Investment Managers' fees described above under "Management Fee," the cost of buying and selling assets, interest and brokerage charges, and certain taxes.

Where an investor subscribes or redeems an amount representing 5% or more of the net asset value of the Fund, the Manager may cause the Fund to levy a fee of 0.40% of the net asset value of the Fund's shares being acquired or redeemed.

The annual management fees charged are included in the TER. The TER is a measure of the actual expenses incurred by the Class over a 12 month period, excluding trading costs. Since Fund and Class returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns. Expenses may vary, so the current TER is not a reliable indicator of future TERs.

### Risk/Reward Profile

- The Investment Manager aims to contain the risk of monetary loss to a level that is below the risk of loss experienced by global equity funds but higher than that experienced by government bond funds and cash deposits over the long term. Investors should be aware that this expected reduction in risk of loss comes at the expense of long-term expected return.
- While the Investment Manager expects the Fund's investment approach to result in volatility below that of a typical global equity fund, the Fund's net asset value will fluctuate, and the Fund will experience periods of volatility and negative returns; investments in the Fund may suffer capital loss.
- Investors should understand that the Investment Manager generally assesses an investment's attractiveness over a three-to-five year time horizon.

## Additional Information

South African residents should contact Allan Gray Unit Trust Management (RF) Proprietary Limited at 0860 000 654 (toll free from within South Africa) or offshore\_direct@allangray.co.za to receive, free of charge, additional information about a proposed investment (including prospectus, application forms, annual reports and a schedule of fees, charges and maximum commissions). The Investment Manager can be contacted at +1 441 296 3000 or clientservice@orbis.com. The Fund's Depository is Citibank Europe plc, Luxembourg Branch, 31 Z.A. Bourmicht, L-8070 Bertrange, Luxembourg. All information provided herein is subject to the more detailed information provided in the Fund's Prospectus.

## Share Price and Transaction Cut Off Times

Share prices are calculated for the Investor Share Class(es), on a net asset value basis by share class, normally as of 5:30 pm (Bermuda time), (a) each Thursday (or, if a Thursday is not a business day, the preceding business day), (b) on the last business day of each month and/or (c) any other days in addition to (or substitution for) any of the days described in (a) or (b), as determined by the Investment Manager or Manager (as indicated in the Fund's prospectus) without notice. Share prices are calculated for the (i) Standard Share Class(es), (ii) Standard Share Class(es) (A), (iii) Shared Investor Refundable Reserve Fee Share Class(es) and (iv) Shared Investor Refundable Reserve Fee Share Class(es) (A) on a net asset value basis by share class, normally as of 5:30 pm (Bermuda time), (a) each business day and/or (b) any other days in addition to (or substitution for) any of the days described in (a), as determined by the Investment Manager or Manager (as indicated in the Fund's prospectus) without notice.

Subscriptions are only valid if made on the basis of the Fund's current Prospectus. To be processed on a given dealing day: subscription requests into an Orbis Fund that is not an Orbis SICAV Fund must be submitted by 5:00 pm on that dealing day; subscription requests into an Orbis Fund that is an Orbis SICAV Fund must be submitted by 5:30 pm; redemption requests from an Orbis Fund that is not an Orbis SICAV Fund must be submitted by 12 noon; redemption requests from an Orbis Fund that is an Orbis SICAV Fund must be submitted by 5:30 pm; requests to switch from an Orbis Fund that is not an Orbis SICAV Fund to a different Orbis Fund that is also not an Orbis SICAV Fund must be submitted by 12 noon; requests to switch from an Orbis SICAV Fund into a different Orbis Fund that is not an Orbis SICAV Fund must be submitted by 5:00 pm; requests to switch from an Orbis Fund that is not an Orbis SICAV Fund to a different Orbis Fund that is an Orbis SICAV Fund must be submitted by 12 noon; and requests to switch from an Orbis Fund that is an Orbis SICAV Fund to a different Orbis Fund that is also an Orbis SICAV Fund must be submitted by 5:30 pm. All times given are Bermuda time, and all requests must be properly completed and accompanied by any required funds and/or information.

Share prices, updated every dealing day, are available:

- for the Shared Investor RRF Share Class(es) (A) and Standard Share Class(es) (A), from the Allan Gray Unit Trust Management (RF) Proprietary Limited's website at [www.allangray.co.za](http://www.allangray.co.za), and
- for the Shared Investor RRF Share Class(es), Standard Share Class(es), and Investor Share Class(es), from the Orbis website at [www.orbis.com](http://www.orbis.com).

Weekly prices can be obtained via e-mail, by registering with Orbis for this service at the Orbis website at [www.orbis.com](http://www.orbis.com).

## Legal Notices

Returns are net of fees, include income and assume reinvestment of dividends. Figures quoted are for the periods indicated for a \$10,000 investment (lump sum, for illustrative purposes only). Annualised returns show the average amount earned on an investment in the Fund/share class each year over the given time period. This Report does not constitute advice nor a recommendation to buy, sell or hold, nor an offer to sell or a solicitation to buy interests or shares in the Orbis Funds or other securities in the companies mentioned in it.

Collective Investment Schemes (CIS) are generally medium to long-term investments. The value of an investment in the Fund may go down as well as up, and past performance is not a reliable indicator of future results. Neither the Manager nor the Investment Manager provides any guarantee with respect to capital or the Fund's returns. CIS are traded at ruling prices and can engage in borrowing and scrip lending. Commission and incentives may be paid by investors to third parties and, if so, would be included in the overall costs. Individual investors' performance may differ as a result of investment date, reinvestment date and dividend withholding tax, as well as a levy that may apply in the case of transactions representing more than 5% of the Fund's net asset value. The Fund may be closed to new investments at any time in order to be managed in accordance with its mandate. The Fund invests in foreign securities. Depending on their markets, trading in those securities may carry risks relating to, among others, macroeconomic and political circumstances, constraints on liquidity or the repatriation of funds, foreign exchange rate fluctuations, taxation and trade settlement.

The discussion topics for the commentaries were selected, and the commentaries were finalised and approved, by Orbis Investment Management Limited, the Fund's Investment Manager. Information in this Report is based on sources believed to be accurate and reliable and provided "as is" and in good faith. The Orbis Group does not make any representation or warranty as to accuracy, reliability, timeliness or completeness of the information in this Report. To the maximum extent permitted by applicable law, the Orbis Group disclaims all liability (whether arising in contract, tort, negligence or otherwise) for any error, omission, loss or damage (whether direct, indirect, consequential or otherwise) in connection with the information in this Report.

## Fund Information

The benchmark is a composite index consisting of the MSCI World Index with net dividends reinvested (60%) and the JP Morgan Global Government Bond Index (40%).

Net Equity is Gross Equity minus stockmarket hedging. Fixed Income refers to fixed income instruments issued by corporate bodies, governments and other entities, such as bonds, money market instruments and cash. Fixed Income regional allocation is based on the currency denomination of the instrument. Net Fixed Income is Gross Fixed Income minus bond market hedging. Except where otherwise noted, government fixed income securities are aggregated by time to maturity and issuer. TIPS are not aggregated with ordinary treasuries.

Duration is calculated using the modified duration of the fixed income instruments in the portfolio, or the effective duration in the case of fixed income instruments with embedded options and real effective duration in the case of inflation-linked bonds. Yield to Maturity ("YTM") for the Fund and the JP Morgan Global Government Bond Index is the average of the portfolio's fixed income instruments' YTM, weighted by their net asset value. Real YTM is used for inflation-linked bonds. The calculations are gross and exclude non-performing fixed income instruments.

## Fund Minimum

Minimum investment amounts in the Fund are specified in the Fund's Prospectus, provided that a new investor in the Orbis Funds must open an investment account with Orbis, which may be subject to minimum investment restrictions, country restrictions and/or other terms and conditions. For more information on opening an Orbis investment account, please visit [www.orbis.com](http://www.orbis.com).

Clients investing via Allan Gray, which includes the Allan Gray Investment Platform, an Allan Gray investment pool or otherwise through Allan Gray Nominees, remain subject to the investment minimums specified by the applicable terms and conditions.

## Sources

The 60/40 Index values are calculated by Orbis using end of day index level values licensed from MSCI ("MSCI Data"). Average Fund data source: © 2023 Morningstar, Inc. All rights Reserved. Such information (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. The latest average fund indices provided by Morningstar are for 22 December 2022. To allow comparison of returns to a common date we have extended the average equity and multi-asset class fund indices to reflect the subsequent movement of the applicable benchmark indices. Average fund returns are not shown for periods of a month or less as high price volatility and late fund reporting regularly cause them to be significantly restated by Morningstar.

### Notice regarding appointment of a director of Orbis Investment Management Limited (the “Company”)

On 1 January 2023, Mark Dunley-Owen was appointed as a Director of the Company. Mr. Dunley-Owen joins the existing Directors, Alexander Cutler, Matthew Furr, Darren Johnston, Ashley Lynn, Anne Marwick and Garth Rempel on the Board of Directors of the Company.

### Notes to Help You Understand This Report

Certain capitalised terms are defined in the Glossary section of the Orbis Funds’ respective Prospectuses, copies of which are available upon request from Allan Gray Unit Trust Management (RF) Proprietary Limited, a Member of the Association for Savings & Investments SA. The country and currency classification for securities follows that of third-party providers for comparability purposes. Emerging Markets follows MSCI classification when available and includes Frontier Markets. Emerging Markets currency exposure is based on currency denomination. Based on a number of factors including the location of the underlying business, Orbis may consider a security’s classification to be different and manage the Funds’ exposures accordingly. Totals presented in this Report may not sum due to rounding.

Risk measures are ex-post and calculated on a monthly return series. Months to recovery measures the number of months from the preceding peak in performance to recovery of that level of performance.

12 month portfolio turnover for the Orbis Equity and Multi-Asset Class Funds is calculated as the lesser of total security purchases or sales in the Fund over the period, divided by the average net asset value (NAV) of the Fund. Short-term fixed income instruments and net current assets are not included.

12 month name turnover for the Orbis Equity and Multi-Asset Class Funds is calculated as the number of positions held by the Fund at the start of the period but no longer held at the end of the period, divided by the total number of positions held by the Fund at the start of the period. Net current assets are not included.

Active share is a measure of the extent to which the holdings of the Orbis Equity and Multi-Asset Class Funds differ from their respective benchmark’s holdings. It is calculated by summing the absolute value of the differences of the weight of each individual security in the specific Orbis Fund, versus the weight of each holding in the respective benchmark index, and dividing by two. For the Multi-Asset Class Funds, three calculations of active share are disclosed. The Portfolio active share incorporates the equity, fixed income, commodity-linked and other securities (as applicable) held by the Orbis Fund and compares those to the holdings of the composite benchmark. The Equity and Fixed Income active shares are calculated as if the equity and fixed income portions of the Orbis Funds are independent funds; each of those two sets of holdings is separately compared to the fully-weighted holdings in the appropriate component of the composite benchmark. Although the Multi-Asset Class Funds hedge stock and bond market exposure, the active share calculations are “gross” and not adjusted to reflect the hedging in place at any point in time.

Benchmark related information is as at the date of production based on data provided by the official benchmark and/or third party data providers. There may be timing differences between the date at which data is captured and reported.

The total expense ratio has been calculated using the expenses, excluding trading costs, and average net assets for the 12 month period ending 31 December 2022.

Orbis SICAV Funds: The Fund expenses exclude portfolio transaction costs. The performance related management fee becomes payable to Orbis on each Dealing Day as defined in the Funds’ Prospectus.

### Additional Notices for Orbis SICAV Funds

This is a marketing communication as defined by the ESMA guidelines on marketing materials. You should consider the relevant offering documents including the Fund Prospectus and Key Investor Information document before making any final investment decisions. These offering documents are available in English on our website ([www.orbis.com](http://www.orbis.com)). Please refer to the respective Fund’s Prospectus for full information on the risks associated with investing.

Investors in a SICAV Fund can obtain a summary of their investor rights in English on our website ([www.orbis.com](http://www.orbis.com)). When investing in the Orbis Funds an investor acquires shares within the Fund and not in the underlying assets held within the Fund. The return of your investment may change as a result of currency fluctuations if the return is calculated in a currency different from the currency shown in this Report.

### Notice on Dealing Day Changes
